MCF SERIES 1W AND 2W CARBON FILM RESISTORS

RoHS Compliant Available

multicomp

Features
- Automatically insertable
- High quality performance

Specifications
- Res. tolerance: ±5%
- Overload voltage rated @ 700V(1W) and 1000V(2W)
- Operating temp. range: -55°C to +155°C
- Temperature coeff.: 10Ω = ±350ppm/°C 11Ω to 99kΩ = ±450ppm/°C 100kΩ = -700ppm/°C, +0ppm/°C

L=12mm, Dia.=5mm
Lead length=28mm, Lead dia.=0.7mm
Supplied bandoliered on tape (box=1K pcs)

L=16mm, Dia.=5.5mm
Lead length=28mm, Lead dia.=0.8mm
Supplied bandoliered on tape (box=1K pcs)

ERA SERIES METAL FILM THERMOSENSITIVE CHIP RESISTORS

RoHS Compliant Available

Panasonic

Features:
- Suitable for temperature correction circuits
- Temperature coefficient value 1500 to 3900 x 10–6/°C
- High performance Quick response to temperature change
- Linearity Excellent linear resistance value change in wide temperature range (–40 °C to +125 °C)
- High reliability, High density placing
- Small size and lightweight for PWB size reduction and lightweight products
- Suitable for both reflow and flow soldering

Mfg. Part No.	Resistance (ohms)	Dimensions	Power Rating (mW)	Case Style	Stock No.	Price Each 1-9
ERA-S33J102V	100	± 5%	100	0805 [2012 Metric]	53W3935	0.70

METAL FILM RESISTORS

ERA SERIES RECTANGULAR TYPE METAL FILM CHIP RESISTORS

RoHS Compliant Available

Panasonic

Features:
- Small size and lightweight
- High reliability
- Low T.C.R. & current noise, excellent non-linearity
- Suitable for both reflow and flow soldering

METAL FILM RESISTORS

VISHAY.

Features
- Small size - conformal coated
- Flame retardant epoxy coating
- Excellent high frequency characteristics
- Exceptionally low noise; typically 0.10 uV/V
- Low voltage coefficient to ± 5ppm/Volt

CMF07 STYLE INDUSTRIAL METAL FILM RESISTORS - 0.5 WATT, 250V

METAL PRECISION, ULTRA–HIGH STABILITY FILM RESISTORS

RoHS Compliant Available

VISHAY.

Features
- Very Stable at High Frequencies
- Low Temperature Coefficient of Resistance
- Low Noise and Voltage Coefficient
- Replaces Wirewound Bobbins
- Proprietary Epoxy Coating For Superior Moisture Protection
- Small Package

Applications
- Precision Test Equipment
- Instrumentation

Specifications
- Rated Dissipation @ 85°C: **Series PTF-56**: 0.125W; **Series PTF-65**: 0.25W
- Limiting Element Voltage (Approx.): PTF-56: 300V; PTF-65: 500V

HVR SERIES HIGH OHMIC/HIGH VOLTAGE METAL FILM LEADED RESISTORS

RoHS Compliant Available

VISHAY

Features
- High pulse loading (up to 10 kV) capability
- Small size (0207/6411)
- Compatible with lead (Pb)-free and lead containing soldering processes

Applications
- Power supplies
- Electronic ballast
- White goods
- Television

NFR SERIES FUSIBLE AXIAL METAL FILM RESISTORS

RoHS Compliant Available

VISHAY.

Features
- High power in small package
- High stability, reliability and uniformity characteristics
- Defined interruption behaviour (fusing time)
- Non-flammable

Applications
- Audio
- Video

Specifications
- Tolerance: ± 5%
- Operating temp. range: -55°C to +155°C

PRECISION METAL FILM RESISTORS

RoHS Compliant Available

multicomp

Resistors feature nichrome elements for stable performance and low noise in various environments. Epoxy-coated for maximum moisture protection. Tolerance: ±1%. Temperature coefficient: ±50ppm/°C. Operating temperature: -55°C to +125°C. *Additional values available; go online or call.*

MRS25 SERIES PROFESSIONAL LEADED METAL FILM RESISTORS

RoHS Compliant Available

VISHAY.

Features
- MBB/SMA 0207 professional
- Small outline package
- Low noise

Specifications
- Tolerance: ± 1%
- Temp. Coeff.: ± 50ppm/K
- Power rating @70C: 600mW

MIL TYPE 55182 RNC (ERC) METAL FILM RESISTORS

VISHAY.

Features
- Meets Requirements of MIL-PRF-55182
- Very Low Noise (- 40 dB)
- Verified Failure Rate (Contact Factory for Current Level)
- 100 % Stabilization and Screening Tests. Group A Testing, if Desired, to Customer Requirements
- Controlled Temperature Coefficient
- Epoxy Coating Provides Superior Moisture Protection
- Standard Lead on RNC Product is Solderable and Weldable

Specifications
- Working Voltage: 200V (RNC50 and RNC55), 250 V (RNC60)
- Operating Temperature Range: - 65/+ 175°C
- Exceeds MIL-R-10509

Axial lead resistors. MIL-R-55182 qualified, have "S" level failure rate. Tolerance: 0.1%. Operating temperature: -65°C to +175°C. Most popular values listed, additional values available; *go online or call.*

CMF SERIES INDUSTRIAL METAL FILM RESISTORS

RoHS Compliant Available

VISHAY.

Features
- Small size - conformal coated
- Flame retardant epoxy coating
- Excellent high frequency characteristics
- Exceptionally low noise; typically 0.10 uV/V
- Low voltage coefficient to ± 5ppm/Volt

RN SERIES, MIL-R-10509 QUALIFIED METAL FILM RESISTORS

VISHAY.

Features

- Very Low Noise (-40 dB)
- Very Low Voltage Coefficient (5 ppm/V)
- Controlled Temperature Coefficient
- Flame Retardant Epoxy Coating
- Commercial Alternatives to Military Styles are Available with Higher Power Ratings.

ELECTRICAL SPECIFICATIONS

Model	Power Rating @ 70°C (W) RNxxD (100ppm)	Power Rating @ 125°C (W) RNxxC (50ppm) & RNxxE (25ppm)	Max. Working Voltage (V)	Dielectric Withstanding Voltage (V_{AC})
RN55	0.125	0.1	200	450
RN60	0.25	0.125	300	500
RN65	0.5	0.25	350	900

Type RN55D will meet or exceed electrical, environmental, dimensional requirements of MIL-R-10509. Operating temperature: –55°C to +175°C. For a complete list of stocked values, please call or visit us online.

RN SERIES MIL-R-10509 METAL GLAZED RESISTORS

TT electronics IRC

Features:
- Digital marking per MIL-R-10509
- Spiralled or laser helixed to resistance value, tolerance
- High Temperature soldered termination-lead assembly
- Tin-lead electroplated copper leads
- Tough molded jacket

MIL Type	Tolerance (+/- %)	Temp. Coeff. (ppm/°C)	MIL Power Rating (Watts)	Voltage Rating (max)

5063JD (VISHAY MBA) SERIES SPACE MISER METAL FILM RESISTORS

RoHS Compliant Available

VISHAY.

Features
- Approved according to CECC 40101-806
- Advanced thin film technology
- Excellent overall stability: class 0.25

Specifications
- Power dissipation rating up to 1 W
- Wide professional range: 0.22Ω- 22 MΩ
- Temperature Coeff.: ±100ppm/°C
- Working Voltage: 200V
- Res. Tolerance: ±1%
- Power Rating: 0.4W

Specifications
- Industrial
- Telecommunication
- Medical equipment

A homogeneous film of metal alloy is deposited on high grade BALOX ceramic body. Coated with a blue lacquer for electrical, mechanical and climatic protection. Encapsulation is resistant to all cleaning solvents in accordance with "MIL-STD-202E, method 215" and "IEC 60068-2-45." Nominal Resistance and Tolerance are Marked Using 5 Colored Bands. For a complete list of stocked values, please visit us online.

SFR25(5043E) SERIES STANDARD METAL FILM RESISTORS

RoHS Compliant Available

VISHAY.

Features
- Low Noise (max 1.5uV/V for Res. Less Than 1 MΩ)
- Small Size (SFR16S-0204, SFR25/25H-0207)

Specifications
- Power Rating @ 70°C: 0.4W or 0.5W
- Temp. Coefficient: ±100ppm/°C
- Tolerance: ±1%
- Working Voltage 200V or 250V

Encapsulation is Resistant to all Cleaning Solvents, in Accordance With "MIL-STD-202E, Method 215", and "IEC 60068-2045".

Many more values in stock, please call or visit us online for a complete listing.

POWER RATING: 400mW — 250V

B0207C-F LEGACY PROFESSIONAL LEADED THIN FILM RESISTORS

RoHS Compliant Available

VISHAY.

Applications
- Industrial
- Telecommunication
- Medical Equipment

Features
- Advanced Thin Film Technology
- Excellent Overall Stability: Class 0, 25
- Current callout is the Vishay MBB series
- Sizes: DIN 0207, CECC B

General purpose resistor for all fields of professional electronics where reliability and stability is of major concern. Tested in accordance with CECC 40101-806 which refers to EN 140000 (IEC 60115-1) and EN 140100 (IEC 60115-2). For a complete list of stocked values, please visit us online.

CCF55/CCF60 SERIES INDUSTRIAL METAL FILM RESISTORS

RoHS Compliant Available

VISHAY.

Specifications
- Temperature Coeff.: ±100 ppm
- Voltage Rating: 250V; 350V **(CCF02 only)**; 500V **(CCF60 only)**
- Operating Temp. Range: -65°C to +230°C **(CCF02 only)**
  -65°C to +150°C **(CCF07)**
  -65°C to +165°C **(CCF55 & CCF60)**

Features
- Superior electrical performance
- Flame retardant epoxy conformal coating

TYPE RLR (MIL-PRF-39017) AXIAL LEAD METAL FILM RESISTORS

VISHAY.

FEATURES

- High Reliability
- Meets Requirements of MIL-PRF-39017 (RLR Only)
- Epoxy Coated Construction Provides Superior Moisture Protection
- Very Low Noise (- 40 dB)

PR (5073NW LEGACY) SERIES PROFESSIONAL POWER METAL FILM RESISTORS

RoHS Compliant Available

VISHAY.

Features
- Vishay PR Series (displaying legacy nomenclature)
- High power in small packages (1 W/0207 size to 3 W/0617 size)
- Defined interruption behavior

Applications
- All General Purpose Power Applications

Specifications
- Temp. Coefficient: ±250ppm/°C
- Res. Tolerance: ±5%
- Working Voltage: 350V

Coated with a red, nonflammable lacquer which provides electrical, mechanical and climatic protection. Coating is not resistant to aggressive fluxes. Encapsulation is resistant to all cleaning solvents in accordance with MIL-STD-202E, method 215, and IEC 60068-2-45. Approval Category: IEC 60115-1, IEC 60115-4

CPF SERIES HIGH TEMPERATURE FLAMEPROOF METAL FILM POWER RESISTORS

RoHS Compliant Available

VISHAY.

Features

- High-power rating, small size
- Flameproof, high-temperature coating
- Low noise and low voltage coefficient
- Excellent high frequency characteristics
- Special filming and coating process

Specifications

- Rated Dissipation @ 70°C: **SeriesCPF–1**: 1W; **Series CPF–2**: 2W; Type CPF–3: 3W
- Limiting Element Voltage: Approx. 250V for **Series CPF-1**; 350V for **CPF-2**; 500V for **CPF-3**
- Operating Temperature: -65°C to +230°C
- Insulation Resistance: $10^{10}\Omega$
- Tolerance: F = ±1%; J = ±5%

DIMENSIONS (mm)

MFR SERIES AXIAL TERMINAL METAL FILM RESISTORS

RoHS Compliant Available

Welwyn

Specifications
- Temperature Coeff:
- MFR3: ± 50ppm/°C
- MFR4: ± 50ppm/°C
- MFR5:less than or equal to 10:150ppm/°C more than 10:100ppm/°C

Features
- Professional grade approved to BSCECC 40101-803 and 019
- Tolerances down to 0.5%
- Temperature coefficient down to 50ppm/°C

RC SERIES PRECISION AXIAL TERMINAL METAL FILM RESISTORS

RoHS Compliant Available

Welwyn

Features
- Meets or exceedes CECC requirements
- Low TCR and tolerance
- Low noise and negligible voltage coefficient

Specifications
- Tolerance: ± 0.1%
- Power rating @ 70°C: 250mW
- Temperature coeff.: ± 15ppm/°C

THICK FILM CHIP RESISTOR KITS, SURFACE MOUNT

SMD

RoHS Compliant Available

VISHAY

Features
- New engineering design kits contain ¼ E96 series
- Values specified as ± 1% tolerance and ± 100ppm/K temp. coefficient

Mfg. Part No.	Kit Contents	Range of Resistor Values	Stock No.	Price 1-2
● LAE1ACHIP0402KFE96	100 Each of 122 Values of 0402 Chip Resistors	10ohm to 1Mohm + Jumper	78T2136	378.62
● LAE1BCHIP0603KFE96	50 Each of 122 Values of 0603 Chip Resistors	10ohm to 1Mohm + Jumper	78T2137	427.23
● LAE1CCHIP0805KFE96	50 Each of 122 Values of 0805 Chip Resistors	10ohm to 1Mohm + Jumper	78T2138	482.56
● LAE1DCHIP1206KFE96	50 Each of 122 Values of 1206 Chip Resistors	10ohm to 1Mohm + Jumper	76T3404	522.00

4100R SERIES THICK FILM MOLDED DIPS

RoHS Compliant Available

BOURNS

Types 4114R-1, 4116R-1

Types 4114R-2, 4116R-2

Features
- Compatible with Automatic Insertion Equipment
- Marking on Contrasting Background for Permanent Identification

Specifications
- Tolerance Isolated and Bussed:10 ohm–49 ohm: ±1 ohms; 50 ohm–5 Mohm: ±2%
- Tolerance Dual Terminator: below 100 ohms ±2 ohms; 100 ohm to 5 Mohm ±2 %
- Resistance Range: 10Ω to 10MΩ
- Maximum Operating Voltage: 100V
- Temperature Coefficient: 50Ω to 2.2MΩ: ± 100 ppm/°C; 50Ω: ± 250ppm/°C; 2.2MΩ: ± 250ppm/°C
- TCR Tracking: 50ppm/°C
- Operating Temperature: -55°C to + 125°C
- Insulation Resistance: 10,000MΩ Min.
- Dielectric Withstanding Voltage: $200V_{RMS}$
- Lead Solderability: Meet Requirements of MIL-STD-202 Method 208
- Package Power Rating @ 70°C: 4114R: 1.69W, 4116R: 2.25W

4600X SERIES LOW-PROFILE CONFORMAL SIP RESISTOR NETWORKS

RoHS Compliant Available

BOURNS

BUSSED RESISTORS

Type 4600X-101

ISOLATED RESISTORS

Type 4600X-102

Features
- Low-profile provides compatibility with DIPs
- Recommended for rosin flux and solvent clean or no clean flux processes
- Marking on contrasting background for permanent identification

Specifications
- Tolerance: ±2%
- Temperature Coefficient: ±100ppm/°C
- Dielectric Withstanding Voltage: $200V_{RMS}$
- Moisture Resistance: ±0.50%
- Load Life: ±1.00%
- Operating Temperature: -55° to +125°C

Additional resistance values available; *go online or call*.

4300R SERIES MOLDED SIP RESISTOR NETWORKS

RoHS Compliant Available

BOURNS®

Type 4300R-101
Bussed Configuration

Type 4300R-104
Dual-Terminator

Features
- Low-profile provides compatibility with DIPs
- Compatible with automatic insertion equipment
- Marking on contrasting background for permanent identification
- Superior package integrity

Specifications
- Tolerance Isolated and Bussed:10 ohm–49 ohm: ±1 ohms; 50 ohm–5 Mohm: ±2%
- Tolerance Dual Terminator: below 100 ohms ±2 ohms; 100 ohm to 5 Mohm ±2 %
- Temperature Coefficient: ±100ppm/°C (50Ω to 2.2MΩ); ±250ppm/°C (> 2.2MΩ or < 50Ω)
- Dielectric Withstanding Voltage: $200V_{RMS}$
- Moisture Resistance: ±0.50%
- Load Life: ±1.00%
- Operating Temperature: -55° to +125°C

Additional values available; *go online or call.*

EXB-A, EXB-D EXB-E SERIES THICK FILM CHIP RESISTOR NETWORKS

RoHS Compliant Available

Panasonic

Features:
- High density
- Thick film resistive element
- 10 terminals, 8 resistors
- Resistance tolerance: ±5%
- Temperature coefficient: ±200ppm/°C
- Power rating at 70°C: 0.063W **EXB-A, EXB-E series**; 0.05W **EXB-D series**
- Operating temperature range: -55°C to +125°C

CSC SERIES COATED THICK FILM SIP NETWORKS

RoHS Compliant Available

VISHAY.

Specifications
- Res. tolerance: ±2%
- Temperature coefficient: ±100ppm/°C
- Dielectric strength: 200VAC
- Operating temperature: -55°C to +125°C
- Height: 0.195″ (4.95)
- Lead spacing: 0.100″ (2.54)

Features
- Low profile
- Reduces total assembly costs
- Resistor elements protected by tough epoxy conformal coating
- Wide resistance range

Most popular sizes listed. Additional values available; *go online or call.*

MIL-PRF-83401 QUALIFIED THIN FILM SIP RESISTOR NETWORKS

VISHAY.

C Schematic (Pin 1 Common)

Bussed (Pin 1 Common)

G Schematic (Isolated)

Isolated

Features
- MIL-PRF-83401 qualified (cage code 57489)
- Low profile design
- Rugged molded construction with standoff
- Choice of 6, 8 or 10 pin/leads
- Hot fused tin/lead 60/40 solder dipped
- 100% screened to groups A MIL-PRF-83410 testing
- Bussed or isolated (schematic C and G)

Specifications
- Res. tolerances to 0.2%
- Temperature coefficient: 50ppm/°C
- Working voltage: 100V
- Operating temperature: -55°C to +125°C
- Height: 0.195″ (4.95mm)
- Lead spacing: 0.100″ (2.54mm)

Single-In-Line (SIP) resistor networks are available in 6, 8, and 10 pins in schematic C (Bussed - Pin 1 Common) and G (Isolated) styles. They incorporate Vishay Dale Thin Film's patented passivated nichrome film to give superior performance on temperature coefficient of resistance, thermal stability, noise, voltage coefficient, power handling and resistance stability. Leads are attached to the metallized alumina substrates by Thermo-Compression bonding. Body is molded thermoset plastic with gold-plated copper alloy leads.

MC4 SERIES HIGH VOLTAGE DIP RESISTOR NETWORKS

RoHS Compliant Available

OHMITE

NEW

Features:
- Unique terminals allow spacing between board and resistor
- Design allows multiple configurations
- 2500V max. per resistor per pack; 10KV total
- 8-pin isolated network

Specifications:
- Power rating per resistor: 750mW
- No. of resistors: 4
- Voltage rating: 2.5kV

EXB SERIES THICK FILM CHIP RESISTOR ARRAYS

RoHS Compliant Available

Panasonic

Features:
- High density
- Isolated
- Convex or concave terminal construction
- Thick film resistive element
- Resistance tolerance: ±5%
- Temperature coefficient: ±200ppm/°C
- Operating temperature range: -55°C to +125°C

MEGASURGE NTC INRUSH CURRENT LIMITERS

RoHS Compliant Available

AMETHERM Circuit Protection Thermistors

Applications
- AC Motors
- Power Supplies
- Motor Drives
- Audio Amplifiers
- Battery Charges
- Frequency Generators
- Plasma Cutting Tools
- MRI Machines
- Toroidal Transformers up to 4.0kVA

bigAMP™ INRUSH CURRENT LIMITERS

RoHS Compliant Available

AMETHERM Circuit Protection Thermistors

Applications
- Switching Power Supplies
- AC Motors
- Uninterruptible Power Supplies (UPSs)
- Frequency Generators

Ametherm's bigAMP™ Surge Limiters are specially designed Inrush Current Limiters able to withstand up to 36 amperes of continuous current and 260 joules of input energy.

HONEYWELL FENWAL GLASS-ENCAPSULATED CHIP NTC THERMISTORS, 135 SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features
- Rugged DO-35 Glass Encapsulation
- Hermetically-Sealed
- Solderable, Weldable, Tinned Copper-Clad Steel Leads
- Tighter tolerances available

Specifications
- Operating Temp: -60°C to +300°C
- Time Constant: 4 Sec. Max.
- DC Power: 2.5mW/°C
- Tolerance: ±10 %, except **mfr. part no. 135-xxxLFW**, ±1°C from 0°C to 100°C

Applications
- Telecom, Automation, Appliances

HONEYWELL FENWAL UNI-CURVE® R-T MATCHED INTERCHANGEABLE NTC THERMISTORS, 192 SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features
- Resistance Temperature Curve Interchangeability
- High Stability and Reliability
- Epoxy-Coated

Specifications
- Time Constant: 15 Sec.
- DC Power: 0.75mW/°C
- Operating Temperature: 0°C to +125°C

Applications
- Temperature Measurement and Control

HONEYWELL FENWAL GLASS PROBE NTC THERMISTORS, 120 AND 121 SERIES

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE. All Found Here.

Features
- Shock-Resistant, Hermetically-Sealed Glass Probes
- Weldable/Solderable Dumet Leads

Specifications
- Tolerance: ±20%
- Time Constant: 120 Series: 10 Sec.; 121 Series: 22 Sec.
- DC Power: 120 Series: 0.5mW/°C; 121 Series: 1mW/°C
- Max. Operating Temperature: 300°C

Applications
- Temperature Measurement and Control in Fluids and Air Sensors

GE's Thermometrics NTC Type MS Series

RoHS Compliant Available

Amphenol
Advanced Sensors

Features
- Low-Cost Solid-State Sensor
- High Sensitivity to Changes in Temperature
- Epoxy-Coated Point-Matched Disc Thermistors have 0.010" Nickel PTFE Insulated Lead Wires

Specifications
- Temperature Accuracy: ±1°C @ 25°C
- Dissipation Constant: 1.4 mW/°C
- Time Constant: 15 sec.
- Operating Temperature: –50°C to +150°C.

Applications
- Suitable for Temperature Measurement, Control and Compensation
- Suitable for PCB and Probe Mountings

GE's Thermometrics NTC Interchangeable Type DC95 Series

Amphenol
Advanced Sensors

Features
- Epoxy Coating with Tinned Copper Leads
- Interchangeable Sensor @ 0.1°C
- Replacements Do Not Require Trimming or Recalibration

Specifications
- Dissipation Constant: (Still Air): 1mW/°C; (Stirred Oil): 8mW/°C
- Thermal Time Constant: (Still Air): 10 sec.; (Stirred Oil): 1 sec.
- Max. Power @ 25°C: 75mW
- Operating Temperature: ±0.2°C over 0°C to +70°C
- Lead Size: 1.5" x 0.012" Dia.

NTC TEMPERATURE-SENSING THERMISTORS

RoHS Compliant Available

VISHAY.

Features
- Accuracy Over A Wide Temperature Range
- High Stability
- Excellent Performance Ratio
- Color Band Markings for Easier Identification

Specifications
- Radial-Leaded
- Solder Mounts in Any Position
- Operating Temperature: -40°C to +150°C
- Dissipation Factor: 7mw/°K

Applications
- Temperature Sensing and Control

Thermistors have negative temperature coefficient. Device consists of a chip with 2 tinned solid copper-plated leads. Gray lacquered and color-coded but not insulated.

EPOXY INTERCHANGEABLE NTC THERMISTORS, 44000 SERIES

RoHS Compliant Available

measurement SPECIALTIES

Specifications
- Time Constant: 1 Sec. Max. in Oil Bath
- Time Constant: 10 Sec. Max. in Still Air
- Operating Temperature: -80°C to +120°C

Provide accurate and stable temperature sensing for application of temperature measurement, control, indication and compensation. Time constant: 1 sec. max. in oil bath, 10 sec. max. in still air.

3303 SERIES SMD TRIMMING POTENTIOMETERS

RoHS Compliant Available

BOURNS®

Features
- Recommended for reflow processing
- Rotor design compatible with pick and place and automatic adjustment equipment
- Supplied in 8 mm embossed tape, compatible with automatic assembly equipment
- Rear adjust version available
- 3 mm size meets EIA/EIAJ standard trimmer footprint
- RoHS compliant* - see processing information on lead free surface mount trimmers

3313 SERIES 3mm SINGLE-TURN SMT, CERMET TRIMMERS

RoHS Compliant Available

BOURNS® SMD

Features
- Surface Mount, 3mm Square, Single-Turn Cermet, Sealed Trimming Potentiometer
- Compatible With SMD Manufacturing Processes
- Rotor Stop for "In-Circuit" Adj.
- Plastic Housing for RF Applications

Specifications
- Tolerance: ±20%
- Dielectric Strength: 500 VAC
- Standard Resistance Range: 10Ω to 2MΩ
- Power Rating @ 70°C: 0.125 Watt; @ +125°C: 0 Watt
- Temperature Coefficient: >100Ω: ±100 ppm/°C
- Operating Temperature: -55°C to +125°C
- Rotational Life: 100 Cycles
- Torque: 50g-cm Max.
- Stop Strength: 200g-cm Min.

3314 SERIES 4mm SQUARE SINGLE-TURN, SMT, CERMET TRIMMING POTENTIOMETERS

RoHS Compliant Available

BOURNS® SMD

Features
- Surface Mount, 4mm Square, Single Turn, Cermet, Industrial, Sealed Trimming Potentiometer
- Compatible With Surface Mount Manufacturing Processes
- Compatible With Popular Vacuum Pick-And-Place Equipment
- Side-Adjust Style, J-Hook, Gull-Wing and Pinned Configurations Available, *go online or call*
- Meets EIA, EIAJ, IPC, VRCI SMD Standard Trimmer Designs

Specifications
- Tolerance: ±20%
- Dielectric Strength: 500 VAC
- Standard Resistance Range: 10Ω to 2MΩ
- Solderability: Per MIL-STD-202
- Power Rating @ 70°C: 0.25 Watt; @125°C: 0 Watt
- Temperature Coefficient: ±100 ppm/°C
- Operating Temp.: -55°C to +125°C
- Contact Resistance Variation: 3% or 3Ω
- Rotational Life: 100 Cycles
- Torque: 180g-cm Typical
- Stop Strength: 300g-cm Typical

3345 SERIES ½" ROUND SINGLE-TURN WIREWOUND TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- ½" Dia., Single Turn, Industrial, Wirewound, Sealed Trimmer
- Also available with a thumbwheel or screwdriver adjustment. *Go online or call for availability.*

Specifications
- Tolerance: ±5%
- Dielectric Strength: 1500 VAC
- Power Rating @ 70°C: 1 Watt
- Operating Temperature: -55°C to +150°C
- Rotational Life: 200 cycles
- Torque: 5 oz.-in max
- Temperature Coefficient +/-50 ppm/°C max.

3352 SERIES THUMBWHEEL TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- ⅜" Diameter Single-Turn, Cermet, Industrial, Open Frame Trimming Potentiometer
- Stable Cermet Element Offers Infinite Resolution
- 7 Pin Styles Available

Specifications
- Tolerance: ±20%
- Absolute Minimum Resistance: 2Ω
- Dielectric Strength: 500 VAC
- Power Rating @ 85°C: 0.50 Watt; @ +125°C: 0 Watt
- Temperature Coefficient: ≥2k: ±100 ppm/°C; <2k: ±150 ppm/°C
- Operating Temperature: -55°C to +125°C
- Contact Resistance Variation: 1% or 1Ω (Whichever is Greater)
- Rotational Life: 200 Cycles
- Torque: 3.0 oz.-in. Max.
- Stop Strength: 8 oz.-in. Min.

3362 SERIES ¼" SQUARE SINGLE TURN CERMET TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- Sealed body suitable for Industrial applications
- Miniature Package
- Rotor Designed For Automatic Machine Adjust Interface
- Withstands Harsh Environments and Immersion Cleaning Processes

Specifications
- Tolerance: ±10%
- Absolute Minimum Resistance: 1% or 2Ω (Whichever is Greater)
- Dielectric Strength: 900 VAC
- Power Rating: 0.50 Watt @ 70°C; @ 125°C: 0 Watt
- Operating Temperature: -55°C to +125°C
- Rotational Life: 200 Cycles
- Torque: 3.0 oz.-in. Max.
- Stop Strength: 7.0 oz.-in. Min.
- Contact Resistance Variation: 1% or 2Ω (Whichever Is Greater)
- Temperature Coefficient: ±100 ppm/°C

3329 SERIES ¼" ROUND SINGLE-TURN CERMET TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- 5 Standard Terminal Styles
- Listed on the QPL for style RJ50 per MIL-PRF-22097 and RJR50 per High-Rel MIL-PRF-39035

Specifications
- Tolerance: ±10%
- Dielectric Strength: 600 VAC
- Rated Power @ 85°C: 0.5 Watt
- Standard Resistance: 10Ω to 1MΩ
- Contact Resistance Variation: 3% or 3Ω Max. (Whichever Is Greater)
- Temperature Coefficient: ±100 ppm/°C
- Operating Temperature: -55°C to +150°C
- Rotational Life: 200 Cycles
- Torque: 5.0 oz-in. Max.
- Stop Strength: 5.0 oz.-in. Min.

Additional values and terminal styles available, *go online or call.*

3306 SERIES 6mm ROUND SINGLE TURN TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- 6mm Round/Single-Turn/Cermet Industrial/Open-Frame
- Dust resistant/splash resistant covers
- Cross Slot Adjustment Options
- Horizontal and Vertical Mounting Styles
- PC Board Standoffs and Retention

Specifications
- Tolerance: ±25%
- Absolute minimum resistance: 2% max. (≤2K = 30Ω)
- Contact resistance Variation: 3% max.
- Power rating (100V Max.) at 70°C: 0.2W
- Operating Temperature: -25°C to +100°C
- Temperature coefficient: ±250ppm/°C
- Load Life: 1,000 hours 0.2W @ 70°C (5% ΔTR)
- Torque (Operating): 4.5 oz-in. max.

MCWIW1015 SERIES 6mm SQUARE INDUSTRIAL SINGLE TURN CERMET TRIMMERS

RoHS Compliant Available

multicomp

Specifications
- Resistance Tolerance: ±10%
- Temperature coeff.: ±100ppm/°C
- Oper. Temp. Range: -55°C to +125°C
- Power Rating @ 70°C: 0.25W
- Max. Working Voltage: 200V
- Torque: 25 mN-m max.
- Load Life: 1,000 hours 0.25W @ 70°C
- Rotational Life: 200 cycles

Features
- Top adjust trimmer
- Wash process compatible
- Fully sealed

43P SERIES 0.75″ RECTANGULAR INDUSTRIAL 18 TURN CERMET TRIMMERS

RoHS Compliant Available

VISHAY

Features
- Fully Sealed
- Panel mount
- Solder terminations for improved reliability
- Multi-finger wiper for improved C.R.V.
- Screwdriver Adjustment

Specifications
- Tolerance: ±10%
- Power Rating @ 70°C: 0.5 Watt
- Temperature Coefficient: 10, 20, and 50Ω: -100 to +200 ppm/°C; 100Ω to 2MΩ: ±100 ppm/°C
- Contact Resistance Variation: 1% or 1 (Whichever is Greater)
- Operating Temperature: -55°C to + 125°C
- Rotational Life: 200 Cycles
- Max. Voltage: 250 V
- Operating Torque: 2 Ncm

Applications
- Automatic Soldering
- General-Purpose

MULTI-TURN TRIMMERS

3006 SERIES LOW PROFILE ¾" RECTANGULAR 15-TURN CERMET TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- Sealed body suitable for Industrial applications
- Low PC Board Profile: only ¼" High
- Transparent Housing on Type 3006P Allows Visual Set-Up Without Hook-Up and Instrumentation
- Panel Mount Option: add "Z" suffix. *Go online or call for availability.*

Specifications
- Tolerance: ±10%
- Standard Resistance Range: 10Ω to 5MΩ
- Dielectric Strength: 1000 VAC
- Power Rating @ 70°C: 0.75 Watt
- Temperature Coefficient: ±100ppm/°C
- Contact Resistance Variation: 1.0% or 1Ω max. (Whichever is Greater)
- Operating Temperature: -55°C to +125°C
- Rotational Life: 200 Cycles
- Adjustment Angle: 15 Turns Nominal
- Torque: 5.0 oz.-in. Max.
- Nominal Resolution: Infinite

70 SERIES 1.25" RECTANGULAR 20 TURN CERMET TRIMMERS

RoHS Compliant Available

VISHAY.

Type 70Y

Type 70L

Features
- Units Are Resistant to Humidity, Shock and Vibration
- 20-Turn Screwdriver Adjustment with Idling End Stops
- Type 70Y PC Pin Units; Type 70L Insulated Wire Lead Units
- Body Mounting Holes: 0.093" (2.38) on 1" (25.40)

Applications
- High-Wattage and Temperature

Specifications
- Tolerance: ±10%
- Power Rating @ 70°C: 0.5 Watt
- Operating Temperature: -55°C to +150°C
- Resistance Range: 10Ω to 2MΩ
- Temperature Coefficient: ±100 ppm/°C
- CRV: 3% or 3Ω, whichever is greater

Order **mfg. part no. 8T000** *trimmer adjustment tool separately on page 637.*

3059 SERIES 1¼″ RECTANGULAR, 22 TURN CERMET TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- Sealed body suited for industrial applications
- Listed on the QPL for style RJ12 per MIL-PRF-22097
- Panel mount option available, *add suffix 'M' to type number*

Specifications
- Tolerance: ±10%
- Dielectric strength: 900 VAC
- Power rating @ 70°C: 1 Watt
- Standard resistance: 10Ω to 2MΩ
- Absolute minimum resistance: 1% or 2Ω Max. (whichever is greater)
- Effective travel: 22 Turns Nom.

Y Style

- Temperature coefficient: ±100 ppm/°C
- Operating temperature: -55°C to +150°C
- Rotational life: 200 Cycles
- Torque: 5 oz.-in. Max.

6 SERIES SNAP-ON PANEL MOUNT EXTENDING ADAPTERS FOR 43 & 70 SERIES

RoHS Compliant Available

VISHAY.

Features
- Optional Adjustment Shafts Available
- Snap-in Assembly
- 6-1 indicates 43 Series; 6-2 indicates 70 Series

Mechanical Specifications
- Body Material: Molded Polyester Plastic
- Bushing Material: Brass, Nickel-Plated
- Bushing Hardware: Panel Nut and Lock Washer

SERIES 6-1 FOR USE WITH 43 SERIES

Mfg. Part No.	Shaft Extension	Stock No.	Price Each 1-24	Price Each 25-49

T93 SERIES MULTI-TURN CERMET TRIMMING POTENTIOMETERS

RoHS Compliant Available

VISHAY.

Features
- Fully Sealed, Water Washable Container IP67

Specifications
- Tolerance: ±10%
- Power Rating @ 85°C: 0.5 Watt
- Electrical Travel: 19 Turns ±2
- Dielectric Strength: 1000 V_{RMS}
- Operating Temp.: -55°C to +155°C
- Dimensions: 0.386H x 0.382W x 0.197D″
- Lead Length: 0.197″
- Lead Spacing (LS): 0.1″
- Lead Dia.: 0.02″
- Adjustment Slot: 0.024 x 0.024″

"A" in type number denotes in-line configuration; "B" denotes offset configuration; see diagrams above.

MULTI-TURN TRIMMERS

3214 SERIES 4mm 5-TURN SMT, CERMET TRIMMING POTENTIOMETERS

SMD RoHS Compliant Available BOURNS

Features
- Surface Mount, 4mm Square, Multiturn Cermet, Industrial, Sealed Trimming Potentiometer
- Withstands Board Wash Processing
- Pick-And-Place Centering Design, With Flush Adjustment

Specifications
- Tolerance: ±10%
- Dielectric Strength: 600 VAC
- Standard Resistance Range: 10Ω to 2MΩ
- Contact Resistance Variation: 3% or 3Ω Max.
- Adjustment Angle: 5-Turns Nom.
- Temperature Coefficient: ±100 ppm/°C
- Solderability: Per MIL-STD-202
- Power Rating @ 85°C: 0.25 Watt
- Operating Temp.: -65°C to +150°C
- Rotational Life: 200 Cycles
- Torque: 180g-cm Max.

3262 SERIES ¼" 12-TURN CERMET TRIMMERS

RoHS Compliant Available

BOURNS

Features
- Sealed body suited for Industrial applications
- Listed on the QPL for style RJ26 per MIL-R-22097 and RJR26 per High-Rel MIL-R-39035
- Patented drive mechanism

Specifications
- Tolerance: ±10%
- Dielectric Strength: 600V
- Absolute Minimum Resistance: 1% or 2Ω (whichever is greater)
- Contact Resistance Variation: 3% or 3Ω (whichever is greater)
- Effective Travel: 12-Turns Nom.
- Power Rating @ 85°C: 0.25W
- Temperature Coefficient: ±100ppm/°C
- Rotatonal Life: 200 Cycles
- Torque: 3.0 oz.-in. Max.

45 SERIES 4mm SQUARE, 15-TURN SMD CERMET TRIMMING POTENTIOMETERS

RoHS Compliant Available

TT electronics BI Technologies

Specifications
- Tolerance: ± 10%
- Input Voltage: 300 VDC **max.** or rms not to exceed power rating
- Slider Current 100 mA **max.** or within rated power, whichever is less
- Power Rating @ 85°C: 250 mW
- Actual Electrical Travel: 9 turns nominal
- Dielectric Strength: 600 Vrms
- Rotational Life: 200 cycles (3% ΔRT, 1% CRV)
- Temperature Coefficient: ± 100ppm/°C
- Operating Temperature Range: –65°C to +150°C

Features
- High resolution
- Space saving SMD package for the most compact board designs
- Sealed to withstand aggressive water wash
- Long life - set and forget construction

3296 SERIES ⅜" SQUARE 25-TURN CERMET TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- Sealed body suitable for Industrial applications
- Listed on the QPL for style RJ24 per MIL-R-22097 and RJR24 per High-Rel MIL-R-39035
- 5-Terminal Styles
- Chevron Seal Design

Specifications
- Tolerance: ±10%
- Contact Resistance Variation: 1% or 3 Ohms Max. (Whichever Is Greater)
- Dielectric Strength: 900 VAC
- Power Rating @ 70°C: 0.5 Watt
- Temperature Coefficient: ±100 ppm/°C
- Operating Temperature: -55°C to +150°C
- Rotational Life: 200 Cycles
- Torque Max: 3.0 oz.-in.

More values and mounting hardware (H-117P) are available, *go online or call.*

68 SERIES ⅜" SQUARE MULTI-TURN CERMET TRIMMERS

RoHS Compliant Available

TT electronics BI Technologies

- Tolerance: ±10%
- Contact Resistance Variation: 1% or 10hm, whichever is greater
- Torque: 5 oz.-in.
- Rotational Life: 200 Cycles
- Input voltage: 200 VDC
- Power rating: 0.5 Watt
- Dielectric strength: 900 V_{rms}
- Insulation resistance: 1000 MΩ
- Temperature coefficient: ±100 ppm/°C
- Operating temperature range: -55°C to +125°C

3250 SERIES ½″ SQUARE 25 TURN WIREWOUND TRIMMERS

RoHS Compliant Available

BOURNS®

Features
- Sealed body suited for industrial applications
- Meets MIL-R-27208; MIL-R-39015
- Panel mount option available, add **M** suffix; *go online or call.*

Specifications
- Tolerance: ±5%
- Dielectric Strength: 1000 VAC
- Standard Resistance Range: 10Ω to 50kΩ
- Power Rating @ 85°C: 1.0 Watt
- Temperature Coefficient: ±50 ppm/°C
- Rotational Life: 200 Cycles
- Torque: 5.0 oz.-in. Max.
- Operating Temperature: -65°C to +150°C

64 SERIES 0.375″ SQUARE INDUSTRIAL 21 TURN CERMET TRIMMERS

RoHS Compliant Available

VISHAY.

Specifications
- Tolerance: ±10%
- Power Rating @ 70°C: 0.5 Watt
- Temperature Coefficient: < 100Ω, 0 to +250 ppm/°C; ≥ 100Ω, 100 ppm/°C
- Operating Temperature: –55°C to +125°C
- Contact Resistance Variation: <1% typical
- Operating Torque: 1.5 Ncm
- Rotational Life: 200 cycles
- Dielectric Strength: 1000 Volts

Features
- Fully Sealed
- Excellent Operational Stability
- Positive Gear Drive and Solder Terminations
- 25-Turn Nominal Effective Travel
- Adjustment Screw Position: 64P Series and 64X Series, Side; 64W Series and 64Y Series, Top

Order **mfg. part no. 8T000** *trimmer adjustment tool separately on page 637.*

ULTRA HIGH PRECISION BULK METAL® FOIL TRIMMERS

RoHS Compliant Available

VISHAY PRECISION GROUP

Specifications:
- A smooth and unidirectional resistance with leadscrew adjustment
- Load life stability: 0.5% maximum ΔR under full rated power at +25°C for 2000h
- Electrostatic discharge (ESD) up to 25,000V
- Settability: 0.05% typical; 0.1% maximum
- Setting stability: 0.1% typical; 0.5% maximum, ΔSS
- Power rating: 0.75W at + 25°C
- Backlash: < 0.05%
- Tap test: 0.05% typical; 0.1% maximum
- "O"-ring prevents ingress of fluids during any board cleaning operation

HONEYWELL CLAROSTAT 58C SERIES SINGLE-TURN WIREWOUND POTENTIOMETERS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Specifications
- Tolerance: ±10%
- Power Rating @ 40°C: 4 Watt
- Electrical Rotation: 300°±5°
- Effective Rotation: 280°±5°
- Operating Temperature: -55°C to +105°C
- Dielectric Strength: 1000 VAC
- Linearity: 2%
- Rotational Life: 25000 cycles

Potential Applications
- Manual controls
- Welding and heating

Features
- Robust nickel-plated brass shaft and bushings
- Wirewound element
- Linear taper
- Very stable over the operating temperature

Bushing: ⅜ x ⅜". Shaft: ¼ x 2" FMS plain round. Diameter 1.688" (42.86) x 0.813" (20.64) deep. Military version is RA30.

RV4 AND RV6 SERIES ⅞″ DIAMETER SINGLE-TURN ROUND PANEL MOUNT POTENTIOMETERS

RoHS Compliant Available

ETI SYSTEMS

Specifications
- Resistance Element: Carbon
- Tolerance: ±10% or ±20%
- Mechanical rotation: 295°
- Dielectric strength: 750VRMS (RV4); 900VRMS (RV6)
- Operating Voltage 500V (RV4); 350V (RV6)
- Derating: Derates Linearly @ 70°C and to 0% @ 120°C
- Operating Temp Range: -65°C to +125°C
- Rotational life: 25,000 cycles
- Load life: 1000 hours at 70°
- Torque: 0.5 oz/in to 6 oz/in

Features
- Hot molded carbon element
- Gold-plated terminals
- Stainless-steel shaft and housing
- Quality meeting or exceeding MIL-R-94 - QPL listed
- Fourth (center) terminal
- High life

PTV111 SERIES 11mm SINGLE TURN POTENTIOMETERS

RoHS Compliant Available

BOURNS®

Features
- Carbon element
- Insulated shaft
- Snap-in clip
- Center detent option

Specifications
- Tolerance: +/-20%
- Power rating: 0.05 Watt
- Max. operating voltage: 50 VAC, 20 VDC
- Rotational life: 10,000 cycles minimum
- Torque: 20 to 200 gcm

Applications
- Audio/TV sets
- Car radio
- Amplifiers/mixers/drum machines/synthesizers
- PCs/monitors
- Appliances

FLATTENED INSULATED SHAFT - LINEAR TAPER

50 SERIES ½″ PANEL CONTROLS

RoHS Compliant Available

BOURNS®

Features
- Conductive Plastic, Square, Sealed Control
- Linear and Audio Tapers
- PC Board and Bushing Mount
- Gangable
- Metal Bushing and Shaft

Specifications
- Dielectric Strength: 1500 VAC Min.
- Power Rating @ 70°C: Linear Taper: 0.5 Watt; Audio Taper: 0.25 Watt
- Stop Strength: 5 in.-lb.
- Operating Temperature: +1°C to +125°C
- Shaft Torque: 0.2 to 2.0 in.-oz. (0.15-1.4Ncm)

81 SERIES SINGLE-TURN ⅝″ PANEL CONTROL

RoHS Compliant Available

BOURNS®

Specifications
- Dielectric Strength: 1500 VAC Min.
- Insulation Resistance: 1000 MΩ Min.
- Rotational Life: 100,000 Cycles
- Stop Strength: 4 in.-lb.
- Running Torque:
- (Nonlocking Bushings): 0.2 to 1.5 oz. in. (0.14-1.06Ncm);
- (Locking Bushings): 0.2 to 4.0 in.-oz. (0.15-2.82Ncm)

Features
- Single-Turn, Square, Wirewound Control
- Metal Shaft and Bushing
- Consistant, Smooth Rotation
- Gangable
- Up to 4 Section Types Available, *Go online or call*

83/84 SERIES 5/8″ PANEL CONTROL

RoHS Compliant Available

BOURNS®

Features
- 10-Turn, Square, Wirewound Control
- Compatible with Other Series 80 Models
- Modular Panel Control Package
- Up to 3 Section Types Available, *go online or call*

Specifications
- Power Rating: 1W
- Dielectric Strength: 1500 VAC Min.
- Insulation Resistance: 1000 MΩ Min.
- Operating Temp.: +1°C to +125°C
- Rotational Life: 1,000,000 revolutions, except where noted*
- Shaft Torque: 0.25 to 2.0 in.-oz. (0.18-1.41Ncm)
- Stop Strength: 48 oz.-in. (33.90Ncm) Min.

3800 SERIES PANEL CONTROLS

RoHS Compliant Available

BOURNS®

Features
- **Types 3851, 3852** and **3856** are ¾" dia., conductive plastic or cermet panel mount controls
- Requires minimal depth
- **Type 3862** is ½" dia., cermet panel mount control

All panel controls are single-turn except **type 3856** which are 3¾"-turn. Type numbers with **"A"** or **"AL" suffix** feature linear tapers with +/-10% tolerance; **"BL" suffix** feature linear tapers with +/-20% tolerance.

Specifications	Type 3851, 3852, 3856	Type 3862
Taper	Linear	
Dielectric Strength	900 VAC Min.	750 VAC Min.
Solderability	Meets MIL-STD-202, Method 301	
Operating Temperature	−1°C to +125°C	
Rotational Life	50,000 Cycles	
Shaft Torque	0.5 to 6.0 oz.-in. for ⅜" Bushing 0.3 to 6.0 oz.-in. for ¼" Bushing	5 oz.-in. Max.
Stop Strength	5 in.-lb. Max.	3 in.-lb. Max.

- Carbon element
- Center detent option
- Solder Lug Termination

Applications
- Various commercial applications
- Sound processing equipment
- Guitar and sound system amplifiers
- Appliances

Specifications
- Operating Temperature: -10°C to +70°C
- Power Rating: 0.5W (Lin), 0.25W (Audio)
- Max. Operating Voltage: 500V (Lin); 250V (Audio)
- Rotational Noise: 150 mV max.
- Mechanical Angle: 300 ° ±5 °
- Rotational Torque: 20 to 200 g-cm
- Stop Strength: 8 kg-cm min.
- Rotational Life:
  15,000 cycles min. (Std.)
  500,000 cycles min. (High)

P231 SERIES 24mm SINGLE TURN, CONDUCTIVE PLASTIC INDUSTRIAL PANEL POTENTIOMETERS

RoHS Compliant Available

TT electronics BI Technologies

Specifications
- Resistance Tolerance: ±20%
- Rotational Torque, Maximum 2.5 oz-in
- Residual Resistance: 3Ω max.
- Power Rating: 0.5W
- Dielectric Strength: 500V_{AC}
- Insulation Resistance: 100 Mohms @ 1000V_{DC}
- Input Voltage: 200V_{AC} max.
- Operating Temp. Range: -20°C to +70°C

Features
- Metal Shaft/ Bushing
- 100,000 Cycle Life
- Side Adjust, Solder Lugs
- 300° ±10% Total Mechanical Travel

6637 SERIES ⅞" DIAMETER CONDUCTIVE PLASTIC, SINGLE-TURN PRECISION POTENTIOMETERS

RoHS Compliant Available

BOURNS®

Features
- Single Turn, Conductive Plastic, Precision Potentiometer
- Excellent Resolution
- High Rotational Life
- Bushing Mount
- Additional Options Available, *go online or call*

Specifications
- Tolerance: ±10%
- Power Rating: 1W @ 70°C
- Dielectric Strength: 750 VAC
- Temperature Coefficient: ±500 ppm°/C Max.
- Solderability: Meets MIL-STD-202 Method 301
- Rotational Life: 10,000,000 Cycles
- Torque: 0.5oz.-in. (0.40Ncm) Max.
- Linearity: 1%
- Operating Temp. Range: +1°C to +125°C

Mfg. Part No.	Res. (Ohms)	Stock No.	Price Each 1-9	Price Each 10-49

157 SERIES 0.875″ SINGLE-TURN CONDUCTIVE PLASTIC PRECISION POTENTIOMETERS

RoHS Compliant Available

VISHAY

Features
- Bushing Mount Unit
- Plated Brass Terminals
- Aluminum Housing 11/32″ Behind Panel; 1/4″ Stainless Steel, Non-Magnetized Shaft

Specifications
- Tolerance: ±20%
- Power Rating @ 40°C: 1 Watt
- Temperature Coefficient: ±600 ppm/°C
- Dielectric Strength: 1000 V_{rms}
- Rotational Life: 5 million shaft revolutions
- Torque: 0.25oz.-in.
- Linearity: ±2%
- Operating Temp.: –55°C to +125°C

Mfg. Part No.	Res. (Ohms)	Stock No.	Price Each 1-4	Price Each 5-9

357 SERIES SINGLE-TURN CONDUCTIVE PLASTIC BUSHING MOUNT POTENTIOMETERS

RoHS Compliant Available

VISHAY

Features
- Compact, Single-Turn Conductive Plastic Position Sensors Offer Versatility in a Variety of Applications
- Plastic Housing
- Brass, Nickel-Plated Bushing
- Solder-Plated, Turret-Style Terminals
- 1/4″ Stainless Steel Non-Magnetic Shaft

Specifications
- Standard Tolerance: ±20%
- Power Rating @ 70°C: 1W
- Dielectric Strength: 1000 V_{rms}
- Temperature Coefficient: ±600ppm/°C
- Output Smoothness: 0.1% Max.
- Torque: 0.5oz.-in.
- Linearity: ±2%
- Mechanical Rotation: 360° Continuous
- Electrical Rotation: 340°± 3°
- Mechanical Life: 10,000,000 Cycles
- Operating Temperature: -55°C to +125°C

LCP12 SERIES GENERAL-PURPOSE LINEAR MOTION POTENTIOMETERS

RoHS Compliant Available

ETI SYSTEMS

Applications
- Test and Lab Equipment
- Industrial Applications
- Medical Equipment (non-life support)

Features
- Conductive Plastic Element
- Black, Anodized Aluminum Body
- Stainless Steel Shaft
- Gold-Plated Terminals

Specifications
- Tolerance: 20%
- Linearity: 0.5% to 1.5%
- Friction: 1.8 oz.
- Unit Weight: 10 to 35 grams
- Life Expectancy: 20 million strokes

Mfg. Part No.	Res. (Ohms)	Stroke Length	Linearity (%)	Power (W)	Stock No.	Price Each 1-4	Price Each 5-9

LCP8 SERIES MINIATURE LINEAR MOTION POTENTIOMETERS

RoHS Compliant Available

ETI SYSTEMS

Applications
- Medical Equipment (non-life support)
- Test and Lab Equipment
- Robotics

Features
- Conductive Plastic Element
- Bronze Bearings

Specifications
- Tolerance: 15% standard
- Linearity: 2% standard
- Power Rating: 0.2 Watt
- Life Expectancy: 20 million strokes
- Electrical Stroke: 0.433 - 0.500 inches
- Friction: 30 grams
- Unit Weight: 0.2 ounces

Type **LCP8P** has plain shaft; Type **LCP8T** has a threaded 2-56 UNC-2A shaft; Type **LCP8S** has internal spring return

Mfg. Part No.	Res. (Ohms)	Stock No.	Price Each 1-4	Price Each 5-9

SP22E/SW22E SERIES GENERAL-PURPOSE SINGLE TURN POTENTIOMETERS

RoHS Compliant Available

ETI SYSTEMS

Features
- Conductive Plastic Element
- Gold Plated Terminals
- High Temp. Thermoplastic Housing
- Stainless Steel Shaft

Specifications
- Tolerance: ±10%
- Linearity: ±1.0%
- Power Rating: 1 Watt
- Electrical Angle: 320° ±5°
- Mechanical Angle: 320° ±5°
- Torque: Below 0.8 oz.-in.
- Weight: Approx. 0.7 oz.
- Life Expectancy: 10 million turns

Applications
- Robotics
- Industrial
- Non-Life support Medical Equipment
- Test and Lab Equipment

SP22G SERIES HIGH-TEMPERATURE PLASTIC HOUSING SINGLE TURN POTENTIOMETERS

RoHS Compliant Available

ETI SYSTEMS

Features
- Brass Bushing
- Conductive Plastic Element
- Solderable Double Turret Terminals
- ⅛" Dia. Stainless Steel Shaft
- High Temperature Plastic Housing

Applications
- Robotics
- Industrial
- Heavy Equipment
- Test and Lab Equipment

SP22GS

Specifications
- Tolerance: ±10% standard
- Linearity: ±1.0% standard
- Power Rating: 1 Watt
- Operating Temperature: -55°C to +125°C
- Contact Resistance Variation: below 2%
- End Resistance: 0.2% max.
- Mechanical Angle: 360°(continuous)
- Electrical Angle: 340° ±4°
- Hysterisis (backlash effect): below 0.5°
- Torque: 0.7 oz. in.
- Weight: Approx. 1.1 oz. max.
- Life Expectancy: 10 million turns

P270 SERIES 27mm SINGLE TURN INDUSTRIAL CONDUCTIVE PLASTIC PANEL POTENTIOMETERS

RoHS Compliant Available

TT electronics

BI Technologies

Specifications
- Resistance Tolerance: ±10%
- Residual Resistance: 6Ω max.
- Power Rating: 2W
- Dielectric Strength: $1000V_{AC}$
- Insulation Resistance: 50 MΩ @ $500V_{DC}$
- Input Voltage: $500V_{DC}$ not to exceed power rating
- Operating Temp. Range: -55°C to +120°C
- Seal Type: S (Sealed), D (Dust Proof)
- Rotational Torque: Dust Proof: 2.0 oz.-in, Sealed: 3.5 oz.-in

Features
- Metal Shaft, 6.5mm Brass Bushing
- 1 Million Cycle Life
- Panel Mount, Solder Lugs
- 300° ±10% Total Mechanical Travel
- Heavy Duty Applications

MOLDED COMPOSITION POTENTIOMETERS

RoHS Compliant Available

OHMITE

Specifications
- Power Rating: 2 Watt
- Voltage (RMS): 500 V
- Operating Temperature: -55°C to +120°C
- Behind Panel: 0.625"
- Diameter: 1.16"
- Rotation: 312°±3°

Features
- Low noise, smooth operation
- In accordance with "Mil" RV4N (CU and CMU Series) & RV4L (CLU Series)

Ohmite molded composition potentiometers are designed for applications in military devices, industrial equipment and in equipment requiring a convenient resistance control device. Elements are molded into a single, integral structure and have a metal cover that protects and shields the internal parts.

Models **CU**, **CLU**, and **CMU** are 0.625" behind panel, Model **CCU** is 1.266 behind panel

533/534/535/536 SERIES PRECISION WIREWOUND POTENTIOMETERS

RoHS Compliant Available

VISHAY

Features
- Two-Gang, Rear Shaft Extensions
- Special Shafts
- Dual Concentric
- Shaft Size: 0.812″ x 0.250″dia.
- Bushing: ⅜″ 2A

Specifications
- Standard Tolerance: ±5%
- Dielectric Strength: 1000 V_{rms} min. 60Hz
- Load Life: 900 Hours
- Operating Temperature: -55°C to +125°C
- Power Rating @ 70°C: 1.0 Watt (Type 533); 2.0 Watt (Type 534 and Type 536); 1.5 Watt (Type 535)
- Temperature Coefficient of Resistance: 20 ppm/°C
- Linearity: ±0.25%
- Rotational Life (Shaft Revolutions): 300,000 (Type 533), 1Million (Type 534 and Type 536), 500,000 (Type 535)

3400S SERIES 1 13/16″ DIA. 10 TURN WIREWOUND PRECISION POTENTIOMETERS

RoHS Compliant Available

BOURNS

Features
- 10-Turn, Wirewound, Precision Potentiometer
- Bushing Mount, Sealable
- High Stop Strength
- Gold-Plated Solder Lugs

Specifications
- Tolerance: ±3%
- Dielectric Strength: 1000 VAC
- Power Rating @ 40°C: 5 Watts
- Temp. Coefficient: ±20 ppm/°C Max.
- Solderability: Meets MIL-STD-202, Method 301
- Rotational Life: 2,000,000 Cycles
- Stop Strength: 550oz.-in. (388Ncm)
- Torque: 2.0oz.-in. (1.4Ncm) Max.
- Operating Temp: +1°C to +125°C
- Independent Linearity: 0.15%

±0.05% linearity available; *go online or call*.

RoHS Compliant Available

BOURNS®

Features
- 10-Turn, Wirewound/Hybrid Precision Potentiometer
- Bushing Mount
- Sealable, Gangable
- Terminals: Gold-Plated Solder Lugs
- Resistance Range Available: 50 to 200kΩ
- Optional High Torque, Center Tap and Custom Features Available, *Go online or call*

Specifications
- Tolerance: ±3%
- Power Rating @ +70°C: 2 Watt
- Independent Linearity: ±0.20%
- Dielectric Strength: 1500 VAC
- Temperature Coefficient: ±50 ppm/°C Max.
- Solderability: Meets MIL-STD-202, Method 301
- Rotational Life: 2,000,000 Cycles
- Stop Strength: 96oz.-in. (67.8Ncm) Min.
- Torque: 0.6oz.-in. (0.42Ncm) Max.
- Ganging: 2 Cups Max.

3540S WIREWOUND AND 3541H HYBRITON®, 7/8″ DIAMETER, 10 TURN, PRECISION POTENTIOMETERS

RoHS Compliant Available

BOURNS®

Features
- 10-Turn, Wirewound/Hybrid Precision Potentiometer
- Bushing Mount
- Gangable with Common or Concentric Shafts
- Optional Anti-Rotation Lug, High Torque, 0.1% Linearity and Custom Specs Available, *Go online or call*

Specifications
- Tolerance: ±5% (Type 3540S); ±10% (Type 3541H)
- Power Rating: 2W @ 70C
- Temperature Coeff.: ±50ppm/°C (3540S) and ±100ppm/°C(3541H)
- Operating Temp. Range: -40°C to +125°C
- Dielectric Strength: 1000 VAC
- Solderability: Meets MIL-STD-202, Method 301
- Rotational Life: 1,000,000 (Type 3540S); 5,000,00 (type 3541H) Revolutions
- Stop Strength: 75oz.-in. (53Ncm) Min.
- Torque: 0.6oz.-in. (0.35Ncm) Max.

3590S SERIES 7/8" DIAMETER, 10 TURN, WIREWOUND PRECISION POTENTIOMETER

RoHS Compliant Available

BOURNS®

Features
- Plastic or Metal Shaft and Bushings
- Anti-Rotation Pin, PC Pin, and other custom options available, *Go online or call*
- Bushing Mount
- Solder Lug Style
- Full body sealed
- Designed for use in HMI applications

Specifications
- Tolerance: ±5%
- Power Rating: 2W @ 40°C
- Absolute Minimum Resistance: 1Ω or 0.1% (Whichever is Greater)
- Dielectric Strength: 2000 VAC
- Temperature Coefficient: ±50 ppm/°C
- Solderability: Meets MIL-STD-202, Method 301
- Rotational Life: 1,000,000 Cycles
- Stop Strength: 64oz.-in. (45Ncm) Min.
- Torque: 0.5oz.-in. (0.40Ncm) Max.
- Linearity: 0.25%

830 SERIES 1 13/16" 3-TURN WIREWOUND POTENTIOMETERS

RoHS Compliant Available

VISHAY.

Features
- Shaft Length with Bushing: 0.812 × 0.250" Dia.
- Bushing: 3/8-32×5/16"

Specifications
- Tolerance: <200 Ohms: ±5%; ≥200 Ohms: ±3%
- Power Rating: 0.5 W @ 70°C
- Dielectric Strength: 1000 V_{rms}
- Electrical Rotation: 1080°+4° to –0°
- Independent Linearity: ±0.25%
- Rotational Life: 500,000 Shaft Revolutions
- Operating Temperature: –55°C to +125°C
- Linearity: +/- 0.25% standard
- Operating Torque: 1.26 oz.-in.

Applications:
- Machine Controls and Industrial Test Instruments

P08x SERIES CONDUCTIVE PLASTIC ROTARY POTENTIOMETERS

RoHS Compliant Available

TT electronics
BI Technologies

Specfications
- Resistance tolerance: ± 20%
- Input voltage: 50VAC **max.**
- Power rating: 0.05W (B taper); 0.025W (A taper)
- Dielectric strength: 300VAC, sea level
- Insulation resistance: 100 MΩ **min.**
- Actual electrical travel: 270°; w/ Switch = 230° **nom.**
- Switch power rating: 3A @ 16VDC
- Operating temperature range -55°C to +125°C
- Rotational life: 30,000 cycles (Switch); 100,000 cycles (Pot)

Features
- Side Adjust
- Dust proof
- Rotary switch option
- Detent option
- Multiple gangs available

POTENTIOMETERS

SMR46 SERIES PRECISION MULTI-TURN WIREWOUND POTENTIOMETER

RoHS Compliant Available

ETI SYSTEMS

Features
- Wirewound Element. Aluminum Anodized Housing and Servo Lid
- Snap Action Switches at Each End of Travel
- Switches Isolated from Pot Circuit
- Stainless Steel Shaft. Silver Plated Terminals. Bushing Bearings

Application
- Robotics
- Heavy Equipment
- Industrial Applications

Specifications
- Resistance Tolerance: ± 3% standard
- Linearity Tolerance: ± 0.3% standard
- Power Rating: 5 Watts (10 turn) 2.5 Watts
- Rotational Torque: 28 oz. in.
- Life Expectancy: 2 million turns

3610 SERIES 10 TURN PRECISION KNOBPOT WITH DIGITAL DISPLAY

BOURNS

Features
- Space-Saving, Snap-In Mounting: Extends only 5/8" Behind Most Panels
- Easily Read 3 Character Digital Dial
- Gold-Plated J-Hook Terminals

Specifications
- Tolerance: ±5%
- Power Rating @ +25°C: 1.5 Watt
- Dielectric Withstanding Voltage: 1000 VAC Min.
- Temperature Coefficient: ±50 ppm/°C Max./Wire
- Solderability: Meets MIL-STD-202, Method 301
- Rotational Life: 50,000 Revolutions
- Torque: 7.0 oz.-in.
- Stop Strength: 20 oz.-in. (14Ncm) Min.
- Operating Temperature: +1°C to +85°C

P16S SERIES KNOB POTENTIOMETERS WITH SWITCH

RoHS Compliant Available

VISHAY

Features
- Ideal for military, professional and industrial applications
- Compact (integrated)
- On/Off switch — actuation counter clockwise
- Detent and electric cut off at beginning of travel
- Linear taper
- Fully sealed — container and panel
- 16mm dia. black plastic control knob
- Test according to CECC 41000 or IEC 60393-1
- Compliant to RoHS Directive 2002/95/EC

Specifications
- Power rating @ 40°C: 1W
- Electrical travel: 220° ±10°
- Mechanical travel: 300° ±5°
- Switching current: 100mA max.
- Dielectric strength on knob: 2000 V_{rms}
- Operating temperature: -40°C to +85°C

P16S series panel-mount cermet potentiometers features knob driving. Mounting hardware and terminals are situated on the back side of the panel reducing required clearance.

HONEYWELL CLAROSTAT COMMERCIAL 10-TURN CALIBRATED SCALE DIALS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features
- Accurate Readings
- Zero Backlash
- Brake Lever Option

Specifications
- Mounting Requirement: 1 sq. in. Panel Space
- For ¼" (6.35) diameter shafts

Mfg. Part No.	Finish	Brake	Stock No.	Price Each 1-9	Price Each 10-24
● 412	Black	Yes	08F585	36.42	35.26
● 411	Black	No	08F586	41.04	29.43
● 462 DIAL	Clear	Yes	08F587	39.12	37.00

(4195)

HONEYWELL CLAROSTAT 316 SERIES SCALE DIGITAL READOUT DIALS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features
- 15-Turns
- Large, Easy-to-Read Numerals
- 0.875" (22.23) Diameter Dial
- Minimum Backlash
- Positive Brake Lever
- For ¼" (6.35) diameter shafts

Mfg. Part No.	Description	Stock No.	Price Each 1-5	Price Each 6-14

⅞" DIA LOW COST PLASTIC ANALOG TURNS COUNTING DIALS

RoHS Compliant Available

TT electronics
BI Technologies

Characteristics
- 0.875" (22.23) Diameter Dial
- Counts to 9.99 Turns
- Positive Action Locking Mechanism, Brake Lever Adjustment for Higher Torque
- Numeral in Window (0-9) Indicates Completed Turns, Graduated Circular Dial Shows Percent of Partial Turn
- Mounting Hardware Included

Mfg. Part No.	Numerals/Background	Shaft Diameter	Stock No.	Price Each 1-4

MF46 SERIES CONCENTRIC TURNS COUNTING DIAL

RoHS Compliant Available

ETI SYSTEMS

Specifications
- Counts up to 20 turns.
- 100 Dial Gradations.
- Aluminum Housing. Black Nylon Knob.
- Special Flexible Coupling Prevents Irregular Rotation and Non-uniform Torque.
- Dial with 100 Gradations for Exceptional Setability.
- Diameter - 1 13/16"; Extension from Panel - 1"

Mfg. Part No.	Shaft Dia.	Finish	Over Center Lock	Stock No.	Price Each 1-4	Price Each 5-9

12-½ WATT LINEAR WIREWOUND RHEOSTATS

RoHS Compliant Available

OHMITE

Features
- Operates at Max. Hot Spot Temperature Rise of 300° @ 40°C Ambient
- Useful for Operating at High Military Ambients Derated Linearly at Zero at 340°
- Vitreous Enamel Coating Except for Units 3500 Ohms or More
- Open Core Design

Specifications
- Shaft Torque: 1-6oz.-in.
- Rotation: 300° ±5°
- Tolerance: ±10%
- Mounts with ¼-32 Bushing and Hex Nut on Panels to 0.125" (3.18) Thick

Order **mfg. part no. 5151E** *knob separately on page 652.*

RHS (Model H)

RJS (Model J)

RKS (Model K)

RLS (Model L)

RNS (Model N)

Dimension "M" 1.188" (30.16)

Mounting: Panels to 1.25" (31.75) thick with 0.25-20 flat-head screws

Model N

Specifications:

- Resistance Wire is Wound on Solid Ceramic Core
- Turns Are Locked in with Either Vitreous Enamel or Silicone-Ceramic Material
- Contact Brushes Are Metal Graphite
- Terminals at Each End of Winding Permit Unit to Be Used as a Potentiometer
- Current Ratings Shown Assume Use in Free Air.
- If Units are Enclosed, Wattage Should be Reduced to as Much as 50%, Depending on Ventilation

Model	Shaft Dia.	Shaft Torque	Rotation (±5°)	Max. Panel Thickness	Mounting Hardware

5105 Handwheel without Pointer

5110 Fingergrip Knob without Pointer

5103, 5116 Barknob

Any knob can be used with any rheostat and tap switch model which has the corresponding shaft diameter. Knobs are fastened to shafts with slotted set screws.

Mfg. Part No.	Shaft Diameter	Stock No.	Price Each 1-24	Price Each 25-99
● 5103E	1/4″ (6.35)	64K9287	7.35	6.28
● 5104E	3/8″ (9.53)	64K9289	29.91	27.34
● 5105E	3/8″ (9.53)	64K9291	24.41	22.31
● 5106E	1/4″ (6.35)	64K9293	33.86	30.95
● 5109E	1/4″ (6.35)	64K9296	30.35	27.74

RHEOSTAT DIAL PLATES

RoHS Compliant Available

OHMITE

Features
- Figures and Lines are Etched on Black Background for Contrast and Ease of Reading
- Divisions Indicate Approximate Percentage of Rheostat Resistance in Circuit

Order knobs separately; *on this page.*

EVQWK SERIES EDGE DRIVE JOG ENCODERS

RoHS Compliant Available

Panasonic

Features:
- Tactile rotary operation and push operation

Specifications:
- Encoder detents: 15 points
- Encoder rotation torque: 1mN m to 10mN m
- Encoder contact resistance: 1ohm (max.)
- Push-on switch operating force: 4.5N
- Push-on switch contact resistance: 100mohm

Applications:
- Memory paging and transmitting
- Menu selection and input for portable electronic equipment

Mfg. Part No.	Encoder Resolution Pulses/360°	Push-On Switch Travel (mm)	Rotational Life (Revolutions)	Height (mm)	Stock No.	Price Each 1-9
EVQ-WK4001	15	0.3	100000	5.4	52W2548	5.20
EVQ-WKA001	15	0.2	100000	3.65	53W5030	6.73

(208979)

EVE-V SERIES 11MM SQUARE GS ENCODER

RoHS Compliant Available

Panasonic

Specifications:
- Rotation angle: 360° (endless)
- Shaft pull/push strength: 100N (min.)
- Shaft wobble: 0.6xL/30mm (max.)
- Standard rotation torque: 3mN m to 20mN m
- Output signal: Phase A and B
- Contact resistance: 1ohm (max.)
- Chattering: 2ms (max.)
- Insulation resistance: 50Mohm (min.) at 250VDC
- Dielectric withstanding voltage: 300VAC for 1 minute
- Push-on switch: SPST
- Switch rating: 20mA 16VDC

Applications:
- Car audio, navigation, air conditioners

Applications:
- Low profile: wave soldering 4mm

Mfg. Part No.	Resolution Pulses/360°	Operating Life (Cycles min.) Encoder/Switch	Stock No.	Price Each 1-9
EVE-VCGJL016B	16	30000/30000	52W2250	2.55

PEC11 SERIES - 12mm INCREMENTAL ENCODERS

RoHS Compliant Available

BOURNS®

Specifications:
- Rotational life: 30,000 revolutions
- Rotational speed: 60 rpm maximum
- Contact Rating: 1 mA @ 5 VDC

Features:
- Push switch option
- Compact, rugged design
- Metal bushing/shaft

METAL FLATTED SHAFT

EM14 SERIES ROTARY OPTICAL ENCODER WITH SWITCH

RoHS Compliant Available

BOURNS®

Specifications:
- Supply Voltage: 5 VDC +/- 0.25 VDC
- Switch Power Rating: 12 VDC/20 mA
- Rotational life: 1,000,000 cycles
- No detent
- Mechanical Angle: 360°
- Operating temperature: -40°C to 70°C
- Mounting torque: 18 lb-in. max

Applications:
- Medical Equipment
- Professional Audio
- Test and Measurement
- Industrial Controls
- Avionics

Features:
- Compact Package Size
- Lead free
- 2-bit quadrature code
- HCMOS, CMOS, and TTL compatible
- Splashproof shaft seal
- High Rotational Cycle Life
- Axial lead
- Cable/Connector Option

EN SERIES ROTARY OPTICAL ENCODERS

RoHS Compliant Available

BOURNS®

Features
- 2-Channel Quadrature Output
- Bushing or Servo Mount
- Square Wave Signal
- Compact
- CMO and TTL Compatible
- Long Life
- High Operating Speed

Specifications
- Operating Temperature: -40°C to +85°C
- Torque: A and C Bushings: 1.5 oz.-in. Max.; S Bushing: 0.1 oz.-in. Max.
- Contact Rating: 26mA @ 5VDC
- Supply Voltage: 5VDC

Bushing Configurations (third character in Part Numbers)
- A=3/8 "D X ⅜ "L Threaded
- C=1/4 "D X ¼ "L Threaded
- S=3/8 "D X ⅜ "L Threaded (Ball Bearing)
- T=1/4 "D X ⅜ "L Threaded(Ball Bearing)

HONEYWELL CLAROSTAT 600 SERIES OPTICAL ROTARY ENCODERS

RoHS Compliant Available

Honeywell
Sensing and Control
SELECTION, SPEED, SERVICE.
All Found Here.

Features
- 1 ⅛" diameter
- Continuous Shaft Rotation in Either Direction
- 4-Lead Ribbon Cable with 0.050"(1.27) Spacing
- 0.025 x 0.012"(0.635 x 0.305) Terminals

Specifications
- Output Rate: 128 Pulses/Revolution
- Input Power: 5 Vdc @ 30 mA
- Channels: 2 Separate Output Channels in Quadrature, 90°±45°
- Voltage: High Level: 2.4V Min. w/10kΩ Load to Ground; Low Level: 0.4V Max.
- Operating Temperature: -40°C to +65°C
- Operating Speed: 300 RPM max.
- Rotational Life: 10 million cycles
- Shaft: ¼" diameter, metal
- Bushing, ⅜" diameter, metal

ELJ-FA ELJ-FB AND ELJ-FC SERIES SMD GENERAL-USE WIREWOUND FIXED CHIP INDUCTORS

RoHS Compliant Available

Panasonic

Features:
- Resin molded
- Capable of being re-flow or flow soldered
- Good for mounting
- Operating temperature : –20°C to +85°C

Applications:
- AV equipment
- Wireless communication equipment
- General electronic equipment

ELJ SERIES SMD HIGH FREQUENCY FIXED CHIP INDUCTORS

RoHS Compliant Available

Panasonic

Features:
- High-frequency capability due to non-magnetic core
- Capable of being re-flow or flow soldered
- Good for mounting
- Operating temperature : –40°C to +85°C (RE), –20°C to +85°C (ND)

Applications:
- RF circuitry for cellular phones and wireless communication equipment

CW100505 SERIES HIGH Q CERAMIC CHIP INDUCTORS

RoHS Compliant Available

BOURNS®

Features
- 0402 miniature size
- Ceramic core provides stable electrical characteristics
- High Q
- High self-resonant frequency
- Flat top surface for automated assembly

Applications
- RF modules
- Cellular phones
- GPS receivers
- Wireless PDAs, LANs
- CATV fi lters, tuners
- Cable modems, set-top boxes

PM3700 SERIES SURFACE MOUNT COMMON MODE INDUCTORS

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

SMD

PM3700 series inductors suppress conductive EMI emissions. Ideal for switching power supplies and battery chargers. Effective attenuation from 10kHz to 100MHz. Compact package. Encapsulated in a high-strength LCP cup.

PM SERIES SURFACE MOUNT CHIP INDUCTORS

SMD

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

PM1812 Series

PM1210 Series

PM1210 and **PM1812** series surface mount chip inductors, molded construction for high reliability and superior environmental protection. High resistance to solder heat and moisture. Operating temperature -55 to +105°C. Current to cause 20°C maximum temperature rise. Tape & reel packaged: **PM1210**: 500/reel; **PM1812**: 2000/reel.

PM1210 SERIES, ±10% TOLERANCE

IMC SERIES HIGH-FREQUENCY MOLDED INDUCTORS

RoHS Compliant Available

VISHAY.

IMC series inductors feature high self-resonant frequency values and high Q values at higher frequencies. Wirewound, molded construction for superior strength and moisture resistance. EIA sizes 0402 and 0603 has laser spiral and coated coil. **0805-01 series** has open construction. Inductance tolerance: ±20% for 3.9-8.2nH; ±10% for 6.8-1000nH; ±5% for 33-1000nH. Compatible with vapor phase and reflow soldering. Non-magnetic core. Inductance value (nH) and EIA size are indicated in mfg. part no.

ISC SERIES SHIELDED MOLDED INDUCTORS

RoHS Compliant Available

VISHAY.

ISC series surface mount, molded, shielded inductors provide superior strength and moisture prevention. The shielded construction also minimizes coupling to other components. Compatible with vapor phase, infrared and wave soldering methods. Operating temperature: -55°C to +125°C.

MLO HI-Q SMD INDUCTORS

RoHS Compliant Available

AVX A KYOCERA GROUP COMPANY

Features
- High Q
- High SRF
- High Frequency
- Low DC Resistance
- 0402 Case Size

Applications
- Mobile communications
- Satellite Applications
- GPS
- Collision Avoidance
- Wireless LAN's

SIMID SERIES SMD INDUCTORS

SMD

RoHS Compliant Available

EPCOS

Features
- High resonance frequency
- Close inductance tolerance
- Cubic coil with ceramic or ferrite core
- Epoxy-molded flat top for vacuum pickup
- Winding ends welded to terminals

Applications
- Antenna amplifiers
- Multimedia
- Wireless communication systems
- Car access systems
- Tire Pressure Monitoring System
- Global Positioning System

MCWL SERIES WIRE WOUND CHIP INDUCTORS

RoHS Compliant Available

multicomp SMD

Features:
- Ceramic base provide high SRF
- Ultra-compact inductors provide high Q factors
- Low profile, high current are available
- Miniature SMD chip inductor for fully automated assembly
- Outstanding endurance from Pull-up force, mechanical shock and pressure
- Tighter tolerance down to ±2%
- Smaller size of 0402 (1005)

Applications:
- RF Products
- Broad Band Applications
- IT Applications

SDC SERIES INDUCTORS

RoHS Compliant Available

multicomp

Features:
- Ferrite based SMD Inductor with lower core loss
- Inductance Range: 1.5µH to 15000µH
- High current output chokes, up to 10 Amps with max. 10% roll off
- Low profile

Applications:
- LCD driver
- DSC/DVC
- Notebook PC
- High density board design

NL SERIES WOUND CHIP INDUCTORS

RoHS Compliant Available

multicomp

Features:
- Resistant to mechanical shocks and pressures
- Accurate dimensions for automatically surface mounted
- Low resistance and high current, suitable for power line applications

Applications:
- Video cameras
- Automobile audio systems
- Computer products and peripherals
- LCD's

BR SERIES - WOUND CHIP AND SMD INDUCTORS

RoHS Compliant Available

TAIYO YUDEN

Features:
- Suitable for the use as a choke coil in smaller DC/DC converters
- Operating temperature: -40°C to +105°C

Applications:
- Cellular Phones
- DVC
- DSC
- LCD Displays

Compact Power Inductors are commonly found across a broad range of the most popular consumer electronics, including mobile phones, HDDs, DSCs, DVCs, portable audio players and notebook ODDs. As more and more features are being packaged into smaller and sleeker devices, the number of circuit blocks, DC-DC converters and high-performance inductors is growing with each successive generation. Accordingly, the need for compact, efficient and well designed inductors is growing too. Fortunately, Taiyo Yuden is meeting that need head on by continually developing and refining components that meet or surpass critical design and performance criteria for size, weight, run-time etc. enabling the feature-rich products we've come to expect.

NR SERIES - WOUND CHIP AND SMD INDUCTORS

RoHS Compliant Available

TAIYO YUDEN

Features:
- Small and Low profile inductor
- It corresponds to High current
- Simple and original magnetic shield structure
- Durable structure against dropping impact
- Operating temperature: -20°C to +120°C

Applications:
- Cellular Phones
- DVC
- DSC
- LCD Displays

Compact Power Inductors are commonly found across a broad range of the most popular consumer electronics, including mobile phones, HDDs, DSCs, DVCs, portable audio players and notebook ODDs. As more and more features are being packaged into smaller and sleeker devices, the number of circuit blocks, DC-DC converters and high-performance inductors is growing with each successive generation. Accordingly, the need for compact, efficient and well designed inductors is growing too. Fortunately, Taiyo Yuden is meeting that need head on by continually developing and refining components that meet or surpass critical design and performance criteria for size, weight, run-time etc. enabling the feature-rich products we've come to expect.

CVH252009 SERIES MULTILAYER POWER CHIP INDUCTORS

RoHS Compliant Available

BOURNS®

Features
- Monolithic construction offering high reliability
- Magnetically shielded construction providing low radiation
- Low DC resistance
- Low profi le, 1008 size (2.5 x 2 x 0.9 mm)

Applications
- Smart phones
- DVCs / DSCs
- Tablets
- HDDs / SSDs
- Mobile electronic devices

SRP4012 SERIES SMD SHIELDED POWER INDUCTORS

RoHS Compliant Available

BOURNS®

Features
- Shielded construction
- Flat wire
- Unit height of 1.2 mm
- Inductance range: 0.22 to 1.5µH
- Rated current up to 9A

Applications
- DC/DC converters
- Portable communications equipment
- Laptop computers
- Camcorders, HDTV, car audio systems
- Video game consoles

Specifications
- Test voltage: 0.25V
- Test frequency: 100KHz
- Operating temperature: -55°C to +125°C
- Core material: Iron
- Wire: Enameled copper

IHLP-1212 SERIES LOW PROFILE HIGH CURRENT INDUCTORS

RoHS Compliant Available

VISHAY.

Features:
- Shielded construction
- Lowest DCR/µH, in this package size
- Handles high transient current spikes without saturation
- Ultra low buzz noise, du to composite construction

Specifications:
- Frequency range up to 1.0 MHz
- Operating temperature range:
- - 55 °C to + 125 °C
- Inductance Tolerance: ± 20%

Applications:
- PDA/notebook/desktop/server applications
- High current POL converters
- Low Profile, high current power supplies
- Battery powered devices
- DC/DC converters in distributed power systems
- DC/DC converter for Field Programmable Gate Array (FPGA)
- Currently not recommended for automotive applications

MLO HIGH CURRENT SMD INDUCTORS

RoHS Compliant Available

AVX A KYOCERA GROUP COMPANY

Features
- High Q
- High SRF
- High Frequency
- High Current Handling
- Low DC Resistance
- 0402 Case Size

Applications
- Mobile communications
- Satellite Applications
- GPS
- Collision Avoidance
- Wireless LAN's

IHLP SERIES LOW PROFILE HIGH CURRENT INDUCTORS

SMD

RoHS Compliant Available

VISHAY.

IHLP series low-profile, high-current surface mount inductors feature lowest height and DCR/µH ratio in each package size. Shielded construction. Frequency range up to 5.0MHz. Handles high transient current spikes without saturation. Ultra-low buzz noise due to composite construction. 100% lead (Pb) free. Current rating based on 40°C temperature rise. Saturation current will cause L_0 to drop 20%. Operating temperature: -55°C to +125°C. **Tolerance: ±20%, Test frequency: 100 kHz**

IHLP-6767 SERIES LOW PROFILE HIGH CURRENT INDUCTORS

RoHS Compliant Available

VISHAY.

Features:
- Shielded construction
- Frequency range up to 2.0 MHz
- Lowest DCR/µH, in this package size
- Handles high transient current spikes without saturation
- Ultra low buzz noise, due to composite construction
- Compliant to RoHS Directive 2002/95/EC

Applications:
- PDA/notebook/desktop/server applications
- High current POL converters
- Low profile, high current power supplies
- Battery powered devices
- DC/DC converters in distributed power systems
- DC/DC converter for Field Programmable Gate Array (FPGA)

SRP7030F SERIES SMD SHIELDED POWER INDUCTORS

RoHS Compliant Available

BOURNS® SMD

Applications
- DC/DC converters
- Power supplies for:
- Portable communications equipment
  Video game consoles
  Laptop computers
  Camcorders, HDTV, car audio systems

Features
- Low 3mm Profile
- Sheilded construction

Specifications
- Tolerance: ± 20%
- Test Voltage: 0.25V
- Test Frequency: 100 kHz
- Operating Temperature: -55°C to +125°C

PM54 SERIES SMT POWER INDUCTORS

SMD

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

Terminal Dimensions

Dimensions – mm

PM54 series power inductors uses "under the unit" mounting for extremely high-density packaging. Top surface consistancy is ideal for use in pick-and-place equipment. Test frequency: 2.5MHz except **mfg. part nos. PM54-101K-RC, PM54-221K-RC**: 1kHz.

±20% TOLERANCE

SDR SERIES SMD POWER INDUCTORS

SMD · RoHS Compliant Available · BOURNS®

Applications:
- Input/output of DC/DC converters
- Power supplies for:
  Portable communications equipment
  Camcorders
  LCD TVs
  Car radios

Specifications:
- Operating and Storage Temperature: -40 °C to +125 °C
- Core Material- Ferrite DR
- Wire Material- Enameled copper

SDR0503/0604 SERIES SMD POWER INDUCTORS

SMD · RoHS Compliant Available · BOURNS®

Features
- Low Profile:
  SDR0503 Series—3.3mm Max.
  SDR0604 Series—4.8mm Max.
- Small Diameter:
  SDR0503 Series—5.3mm Max.
  SDR0604 Series—5.8mm Max.

Specifications
- Operating Temperature: -40°C to +105°C

Applications
- Input/Output of DC/DC Converters
- Power Supplies for Portable Communications Equipment, Camcorders, LCD TVs, Car Radios

SRF SERIES SHIELDED POWER INDUCTORS

SMD — RoHS Compliant Available — BOURNS®

Features:
- Multiple applications: parallel, series, dual-inductor and transformer
- Magnetically shielded, low radiation
- Inductance range: 0.33 to 4000 µH
- Rated current up to 17.9 A

Specifications:
- Test Voltage: 0.25 V
- Hi-pot: 500 Vrms, 3 mA, 3 sec.
- Reflow Soldering: 230°C; 50 sec. max.
- Operating Temperature: -40°C to +105°C (Temperature rise included)
- Storage Temperature: -40°C to +125°C
- Resistance to Solder Heat: +260°C for 10 sec.

Applications:
- SEPIC topology
- Power supplies for:
  Communication equipment
  Notebooks, Desktop computers, Servers
  LDCs, Flat panels
  Backlights
  Camcorders
  HDTVs
  Car audio systems

SRN SERIES SMD POWER INDUCTORS

RoHS Compliant Available — BOURNS®

Applications
- DC/DC converters
- Notebook computers
- Digital video cameras
- Televisions, LCD displays

Features
- Semi-shielded construction
- High inductance
- High rated current

WE-PD2SR SERIES SMD POWER INDUCTORS

RoHS Compliant Available

WÜRTH ELEKTRONIK

NEW

Features:
- Magnetic shielded version from the WE-PD2, which results in low leakage field
- Stable inductance current due the self-centering shielding ring construction
- Pin compatible with the PD2 size 7850 ready to solder and test
- Recommended solder profile: reflow
- Operating temperature: -40°C to +125°C
- Dimensions: 7.8mm x 7mm x 5mm

Applications:
- Switching regulators with low operation voltage like in portable devices
- Integrated DC/DC converters

TOLERANCE: ±30%

LB SERIES M TYPE WIRE-WOUND CHIP POWER INDUCTORS

RoHS Compliant Available

TAIYO YUDEN

Features:
- Small size wound chip inductor for signal line
- High Q and narrow tolerance
- Operating temperature: -40°C to +105°C

Applications:
- Analog signal lines
- DSC, DVC, HDD, LCD-TV
- Audio-visual equipment

PM3300 SERIES SURFACE MOUNT POWER INDUCTORS

SMD

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

PM3308-100M

PM3308, **PM3316** and **PM3340 series** surface mount power inductors have a high current capacity and high reliability. Low DCR. Ferrite bobbin core; low profile, compact size. High heat resistance, ideal for reflow soldering. Operating temperature: -55°C to +105°C. Test frequency: 100 KHz. Saturation DC current to cause 10% max. inductance drop. Rms current to cause max. temperature rise of 30°C in **PM3308**, 15°C in **PM3316** and 20°C in **PM3340**. Dimension H: **PM3308** = 3.0mm; **PM3316** = 5.2mm; **PM3340** = 11.5mm. **Tape and reel packaged (PM3308: 1000/reel; PM3316: 500/reel; PM3340: 225/reel).**

PM105 AND PM105SB SERIES SURFACE MOUNT POWER INDUCTORS

SMD — RoHS Compliant Available — J.W.Miller MAGNETICS A Bourns Company

PM105 and **PM105SB series** surface mount power inductors have a high current capacity. Ferrite bobbin core; low core loss for high frequency power application. Compact size. Large terminal surface for strong PC board bonding. **PM105SB** magnetically shielded for low radiation. Operating temperature: -30°C to +100°C. Current to cause 10% max. inductance drop or temperature rise of 40°C. **Sold in tape and reel packages of 500.**

PM5022 SERIES SURFACE MOUNT POWER INDUCTORS

SMD — RoHS Compliant Available — J.W.Miller MAGNETICS A Bourns Company

PM5022 series surface mount power inductors have a very high current capacity and high reliability. Low DCR. Ferrite bobbin core; compact size. High heat resistance, ideal for reflow soldering. Operating temperature: -55°C to +105°C. Test frequency: 100 KHz. Saturation DC current to cause 10% max inductance drop. RMS current to cause max. temperature rise of 40°C. Also available in Tape & Reel; *go online or call.*

DRA SERIES HIGH POWER DENSITY, HIGH EFFICIENCY, SHIELDED INDUCTORS

RoHS Compliant Available — COILTRONICS®

Features:
- 165°C maximum total temperature operation
- Five sizes of Automotive grade shielded drum core inductors
- Inductance range from 0.28µH to 1000µH
- Current range up to 56 Amps
- Mechanical secure mounting for high shock and vibration environments
- Good thermal dispersion with thermal conductive epoxy
- Customized dual winding versions available upon request for SEPIC or Flyback configurations

Applications:
- Automotive Electronics (under the hood, interior/exterior)
- Telematics
- DC-DC converters
- Buck, boost, forward, and resonant converters
- Noise filtering and filter chokes

HC9 SERIES HIGH CURRENT POWER INDUCTORS

RoHS Compliant Available · COILTRONICS

Features:
- 155°C maximum total operating temperature
- Surface mount inductors designed for higher speed switch mode applications requiring lower inductance, low voltage and high current
- Design utilizes high temperature powder iron material with a non-organic binder to eliminate thermal aging
- Inductance Range from 0.2µH to 47.0µH
- Current Range from 3.65 amps to 95.0 amps
- Frequency Range 1kHz to 500kHz

Applications:
- Next generation processors
- High current DC-DC converters
- VRM, multi-phase buck regulator
- PC, workstations, routers, servers

DR SERIES HIGH POWER DENSITY, HIGH EFFICIENCY, SHIELDED INDUCTORS

SMD · RoHS Compliant Available · COILTRONICS

DR124

DR Series

DR1030 and DR1050 Series

Features
- 125°C max. Total Temperature Operation
- Eight Sizes of Shielded Drum Core Inductors
- Inductance Range From 0.33µH to 1000µH
- Secure Mounting
- Solder Reflow Temperature: +260°C for 10 Sec. Max.

Also available in Tape & Reel; *go online or call*.

SRP SERIES SHIELDED POWER INDUCTORS

SMD · RoHS Compliant Available · BOURNS

Specifications:
- Test Frequency- 100 KHz
- Reflow Soldering: 230 °C; 50 sec max
- Temperature Rise: 40 °C at rated I_{rms}
- Resistance to Soldering Heat: 260 °C for 10 sec.
- Wire Material- Enameled copper
- Core Material- Iron
- Wire Material- Enameled copper
- Rated Current- Ind. drops 20 % at I_{sat}

Applications:
- Input/output of DC/DC converters
- Power supplies for:
  Portable communications equipment
  Camcorders
  LCD TVs
  Car radios

SRU SERIES - SHIELDED SMD POWER INDUCTORS

SMD RoHS Compliant Available BOURNS®

Applications
- Input/output of DC/DC converters
- Power supplies for portable communications equipment, camcorders
- LCD TVs, car radios

Specifications
- Reflow Soldering: 230°C, 10 sec. max.
- Operating Temperature: -40°C to +125°C

SRN3015 SERIES SEMI-SHIELDED POWER INDUCTORS

RoHS Compliant Available

BOURNS®

Features:
- Semi-shielded construction
- Miniature size
- Component height 1.5mm
- Inductance range: 1 to 100µH
- Rated current up to 2.35A

Applications
- DC/DC converters
- Notebook computers
- Digital video cameras
- HDDs
- Cell phones
- Television, LCD displays

Specifications:
- Operating temperature: -40°C to +125°C
- Core material: Ferrite
- Wire: Enameled copper
- Terminal finish: Sn
- Coating: Magnetic epoxy resin

2700 SERIES SMD POWER INDUCTORS

RoHS Compliant Available

muRata Ps Murata Power Solutions

Features:
- Up to 1.6A I_{DC}
- 4.7µH to 1mH
- Low R_{DC}
- Ultra-low profi le
- UL 94V-0 packaging materials
- J-STD-020D reflow

Specifications:
- Operating temperature: -40°C to 125°C
- Peak reflow solder temperature: 260°C
- Pin finish: Gold
- Moisture sensitivity level[4]: 1

Applications:
- Handheld devices
- DC-DC converters
- Notebook computers

3800 SERIES FLAT COIL SMD POWER INDUCTORS

RoHS Compliant Available

muRata Ps Murata Power Solutions

Features:
- High current, low DCR
- Surface mount
- Pick & place compatible
- J-STD-020D reflow
- Backward compatible with Sn/Pb soldering systems

Specifications:
- Operating temperature: -40°C to 130°C
- Peak reflow solder temperature: 245°C
- Pin finish: Matte tin
- Moisture sensitivity level: 1

Applications:
- Laptop computers
- Plasma screens

HC SERIES HIGH CURRENT, HIGH FREQUENCY, POWER INDUCTORS

RoHS Compliant Available

COILTRONICS

Applications:
- Point-of-load modules
- Multi-phase regulators
- Voltage Regulator Module (VRM)
- Desktop and server VRMs and EVRDs
- Data networking and storage systems
- Notebook regulators
- Graphics cards and battery power systems

Features:
- Halogen free
- 125°C maximum total temperature operation
- High current carrying capacity, low core losses
- Inductance range from 0.15µH to 10.0µH
- Current range from 3.2 to 110 Amps
- Frequency range up to 5MHz

1007 PACKAGE - 10.3 x 8.1 x 6.65mm (FERRITE CORE)

6000A SERIES SURFACE MOUNT POWER INDUCTORS

RoHS Compliant Available

muRata Ps Murata Power Solutions

Features:
- Up to 22A saturation current
- 5.8µH to 57.8µH
- High energy storage, low resistance
- UL 94V-0 packaging materials
- J-STD-020D.1 reflow

Applications:
- Power applications
- DC-DC converters
- Energy storage
- Input or output filtering

Specifications:
- Operating temperature : -40°C to 85°C
- Peak reflow solder temperature: 245°C
- Pin finish: Pure tin
- Moisture sensitivity level[3]: 1

WE-PD HV SERIES SMD POWER INDUCTORS

RoHS Compliant Available

WÜRTH ELEKTRONIK

NEW

Features:
- Magnetically shielded
- Designed for 400VDC applications
- Operating temperature: -40°C to +125°C
- Tolerance: ±20%

Applications:
- Non-isolated buck or Buck-Boost converter like Pi LinkSwitch-TN
- Constant current LED driver
- Utility metering
- Filter for power supply

DIMENSIONS: 7.3mm x 7.3mm x 4.5mm

SMD POWER INDUCTORS

SMD RoHS Compliant Available EPCOS

Features
- Temperature range up to 150 °C
- High rated current
- Low DC resistance
- Ferrite core
- Magnetically shielded
- Winding: enamel copper wire
- Winding welded to terminals

Applications
- Filtering of supply voltages
- Coupling, decoupling
- DC/DC converters
- Automotive electronics
- Industrial electronics

SIZE: 10.4 x 10.4 x 4.8 mm — RATED UP TO 150°C

Mfg. Part No.	Inductance µH	Inductance Tol.	I_{DC} (A)	R_{DC} (Ω)	Stock No.	Price Each 1-9	Price Each 10-99

BFS SERIES SMD POWER INDUCTORS

RoHS Compliant Available

multicomp

Applications:
- DC-DC converter used in notebook computers
- PDA and mobile handphones
- Stepup and stepdown converters
- Flash memory

Features:
- Low profile and shielded very effective in space conscious applications
- Low resistance and high energy storage

The SMD inductors are designed for the smallest possible size and high performance. They are with high energy storage and very low resistance making them the ideal inductors for DC-DC conversion.

SDRH SERIES SMD POWER INDUCTORS

SMD — RoHS Compliant Available — multicomp

Features:
- Magnetically shielded SMD inductor with high current rating
- High storage capacity
- Low self-losses
- Highest possible current loading for SMD inductor

Applications:
- Integrated DC/DC converter
- Notebook Computers

COMMON-MODE EMI SUPPRESSION TOROIDAL INDUCTORS

RoHS Compliant Available — TRIAD

Features
- Compact
- Highly dependable
- Eliminates noise and minimizes AC line transmitted interference
- Meets VDE, IEC, UL, and CSA requirements
- Constructed with UL rated 130C materials

Applications
- Power supplies
- Differential mode filtering
- High frequency circuits

HIGH CURRENT TOROID INDUCTORS

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

6706

5700 and **6700 series** high current toroid inductors feature low radiation, high current capacity and high inductance. **5700 series**- low cost. **6700 series** mounted on a VW-1 rated header with fixed pins for easy PC board insertion. Operating temperature: -55°C to +105°C. Tolerance: ±20%

2100HT/ 2200HT/ 2300HT SERIES HIGH TEMPERATURE, HIGH CURRENT TOROID INDUCTORS

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

Features
- High temperature rating
- Low magnetic radiation
- High current capacity
- Horizonta lor vertical mount

Applications
- DC/DC converters
- Output chokes
- EMI fi lters

Specifications
- Tolerance: ±15%
- Test frequency: 1kHz
- Operating temp.: -55°C to +200°C
- Current to cause 50°C max. temperature rise

PM2110 AND PM2120 SERIES SURFACE MOUNT HIGH CURRENT TOROID INDUCTORS

SMD

RoHS Compliant Available

J.W.Miller MAGNETICS
A Bourns Company

Pad Layout

PM2110 SERIES

PM2110 and **PM2120** series surface mount high current toroid inductors. DC-DC converter, EMI filter applications. Low radiation, low core loss, low cost. Ideal for reflow soldering. Operating temperature -55 to +105°C. Current to cause 30°C maximum temperature rise. Tolerance: ±20%, Test Frequency: 1kHz

1400 SERIES BOBBIN INDUCTORS

RoHS Compliant Available

muRata Ps
Murata Power Solutions

Features
- PC Board or Chassis Mountable
- Fully Tinned Leads
- Lead Length: 10mm
- Low DC Resistance
- Radial Format
- Low Temperature Dependance

Specifications
- Operating Temperature: -40°C to 85°C

Recommended Footprint Details

High-current bobbin core inductors designed for switching regulators along with filter and power line applications. Nonmagnetic screw provides mechanical stability. Core manufactured from high-saturation flux density material, winding is insulated by a heat-shrunk sleeve. Tolerance: ±10%.

8300 SERIES TOROIDAL SMD POWER INDUCTORS

RoHS Compliant Available

muRata Ps
Murata Power Solutions

Features:
- Up to 3A I_{DC}
- 0.42µH to 100µH
- Low R_{DC}
- Small footprint
- Ultra-low profi le
- UL 94V-0 packaging materials
- J-STD-020D reflow

Specifications:
- Operating temperature: -40°C to +85°C
- Peak reflow solder temperature: 260°C
- Pin finish: Tin
- Moisture sensitivity level[4]: 1

Applications:
- Handheld devices
- DC-DC converters
- Notebook computers

78253 SERIES MAX253 COMPATIBLE CONVERTER TRANSFORMERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

Features
- Maxim Compatible
- 5V Version
- Isolation to 4kV
- Frequency Range to 500kHz
- Toroidal Construction
- Industry Standard Pinout
- UL 94V-0 Package Material
- Fully Encapsulated
- Low Profile
- Surface Mount Available

78253 series converter transformers are specifically designed for use with the MAX253 chip set to provide isolated power supplies. The 5V version can supply 1W. A center tapped secondary winding allows for full bridge, half bridge or voltage doubling.

AXIAL LEADED POWER INDUCTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- Wide inductance range
- Insulated packaging
- Four sizes
- Flame retardant
- Wide temperature range
- Established reliability
- Fully protected from the environment

Tyco quality and reliability are guaranteed in this range of insulated and shielded RF inductors. The insulated range has a self-extinguishing polyolefin sleeve. Their small size make them ideal for use when space is at a premium. And they are fully protected from environmental factors.

MFG. PART NO. IM-2, IM-4, IMS-5 MIL-C-15305 MOLDED INDUCTORS

RoHS Compliant Available

VISHAY.

Sturdy epoxy-molded inductors. Tolerance: ±10%. Operating temperature: —55°C to +105°C. Flame-retardant coating. **mfg. part no. IMS-5** offers electromagnetic shielding.

IHD SERIES HIGH CURRENT FILTER INDUCTORS

RoHS Compliant Available

VISHAY.

IHD series high current filter inductors feature printed mounting (axial leads). Protected by polyolefin tubing. High saturation bobbin allows high inductance with low DC resistance. Pre-tinned leads. High resistivity core offers very high parallel resistance, resulting in maximum coil performance. 20 sleeveless models available at reduced cost. Operating current rating based on +40°C temperature rise. Operating temperature: -55°C to +85°C at full rated current. **Test Frequency: 1kHz**

8100 SERIES COMMON MODE INDUCTORS WITH HEADERS

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

8101

8104

8100 series common mode inductors (with header) are single-layer wound. Excellent EMI suppression capability over wide frequency spectrum. High current capacity. Dielectric strength: 1500V_{RMS}. Coil mount on VW-1 rated plastic header. Fixed pin spacing allows easy PC board insertion. Operating temperature: -55°C to +105°C. Current to cause maximum temperature rise of 35°C. Test Frequency: 1KHz

INDUCTORS

RoHS Compliant Available

Murata Power Solutions

Features
- Low DC resistance
- Miniature size
- PCB mounting

The **1500** and **1700 Series** are general purpose inductors suitable for low to medium current applications. The **1700 Series** is ideal for high density applications where a chip inductor will not cope with the power requirement. Operating temperature: -0°C to 70°C. The **1500 Series** is ideal for applications such as power supply and other general purpose filtering designs. The central hole allows mechanical fixing with a nonmagnetic screw. Operating temperature: -40°C to 85°C. The **1800 Series** of inductors are particularly suited to use with a wide variety of switching regulators. Offering high current handling with a low mounting height, the devices are ideal where space is at a premium. Operating temperature: -0°C to 70°C. The **2800 series** is a range of bobbin-wound, surface-mount inductors designed for use in switching power supply, and power line filter circuits. They are suitable for any application requiring a high saturation current in a miniature surface-mount footprint. Operating temperature: -40°C to 125°C.

5000 AND 5100 SERIES COMMON MODE CHOKES

RoHS Compliant Available

muRata Ps Murata Power Solutions

Features
- Surface mount
- Compact size
- UL94V-0 pacakage materials

The **5000 series** is a range of surface-mount common mode chokes designed to attenuate up to 100MHz common mode noise where line filtering is required, such as low current switching power supplies and telecom applications. The **5100 series** is a range of through-hole common mode chokes designed to attenuate up to 100MHz common mode noise where line filtering is required, such as high current switching power supplies and telecom applications.

RL622 SERIES RADIAL TERMINAL RF CHOKES

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

Features
- High current capacity
- Ferrite bobbin core
- Low core loss
- High reliability and efficiency
- Winding covered with shrink tubing

Applications
- Switch mode power supplies
- DC/DC converters
- Output chokes
- EMI fi lters

Specifications
- Operating temperature: -55°C to +105°C

1100 SERIES HIGH-CURRENT RF CHOKES

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

1100 series RF chokes have very high current capacity, low resistance. Epoxy-coated ferrite bobbin core, VW-1 rated shrink tubing to cover winding. Self-leaded. Fixed lead spacing. Center hole for mechanical mounting. Dielectric withstanding voltage: 2500V_{RMS} terminal to shrink tube cover; 1000V_{RMS} terminal to core. Rated current to cause 50°C max. temperature rise and 5% max. inductance drop. Operating temperature: -55°C to +105°C. Test frequency: 1kHz.

PCB MOUNTED FILTERS/CHOKES

RoHS Compliant Available

multicomp

Specifications
- Voltage rating: 50V
- Current rating: 500mA
- Operating temperature:
- Differential mode chokes: 25°C to +85°C
- Common mode chokes: 25°C to +70°C

Features a range of compact data line filters employing a high performance toroidal core. These common mode and differential mode chokes have a plastic carrier for ease of PCB mounting.

5200 SERIES HASH CHOKES

RoHS Compliant Available

J.W.Miller MAGNETICS A Bourns Company

Features
- Low-Cost, Low-DCR
- High-Current Capacity
- Varnish-Coated
- Operating Temperature: -55°C to +105°C
- Ideal for Use as EMI, Output Choke, Smoothing Coil
- Current to Cause 10% Max. Inductance Drop or 35°C Max. Temperature Rise
- Tolerance: ±20%

RN SERIES COMMON MODE CHOKES

RoHS Compliant Available

SCHAFFNER

PC mount common mode chokes for low level EMI problems or as part of a larger filter with capacitors. Highest attenuation at resonant frequency (F res). **RN112** is a horizontal mount package, 0.67 x 0.67 x 0.5" (17 x 17 x 13) high. **RN122** is a horizontal mount, 1.1 x 1.1 x 0.65" (28 x 28 x 16.5mm). **RN222** is a vertical mount, 0.71 x 1.22" (18 x 31) footprint and 1.2" (29.3) height. UL recognized and VDE approved.

SURFACE MOUNT EMI SUPPRESSION BEADS

RoHS Compliant Available

Fair-Rite Products Corp. Your Signal Solution

SMD

These surface mountable beads are supplied with a high copper conductor which lowers DC resistance and increases current carrying capacity, compared to plated beads. Plating is RoHS compliant 100% tin. SM beads are designed for differential and common-mode applications, and are offered in a range of materials 73, 43 / 44 and 52 / 61(3rd and 4th digit) which cover frequencies from 500kHz to 1GHz.

WOUND EMI SHIELD BEADS

RoHS Compliant Available

Fair-Rite Products Corp. Your Signal Solution

Impedance is increased by adding turns; max. impedance reached at lower frequency due to additional capacitive effects. Med. permeability "Type 44" material, suppress signals between 25–200MHz. Six-holes, wound with oxygen-free, high-conductivity tinned copper wire, 24 AWG (0.53mm). Wire length: 1.500" (38.10).

Mfg. Part No.	Z Min. (Ω) @ 50MHz	Z Min. (Ω) @ 100MHz	Turns	Pkg. of	Stock No.	Price Each 1-9

EMI SHIELD BEADS ON LEADS

RoHS Compliant Available

Fair-Rite Products Corp. Your Signal Solution

Shield beads are assembled on high-conductivity 22AWG tinned copper wire with 100% tin coating to aid automated circuit assembly. For all, O.D. = 0.138" (3.5); wire length = 2.44" (62.0).

EMI SUPPRESSION CORES WITH CASES

RoHS Compliant Available

Fair-Rite Products Corp. Your Signal Solution

Attenuate EMI from ribbon and round cable with cores that accommodate a range of sizes and conductors. Flat cases have serrated teeth to grip and center cable. Feature combination case and two ferrite parts. "Mfr.part no. 43" or "Mfr.part no. 44" materials, polypropylene. Flammability: UL 94-V0. **Suffix B** in mfr.part no. number indicates **package of 2.**

Fair-Rite Products Corp. Your Signal Solution

Round cable Snap-Its can accommodate round cable with diameters from 0.160″ to 0.750″. Can be used to suppress frequencies up to 500MHz. These cable cores will provide common-mode filtering for multi-strand cable and differential mode filtering for single conductors.

UNIVERSAL WIDEBAND CABLE SNAP FERRITES FOR ROUND CABLES

RoHS Compliant Available

FerriShield® Ferrite Suppressors

Ferrite assembly in fully enclosed nylon case. Snap closed around wire by clasping shut to position assembly. **Round Cable Snap** may also be mounted with a flat-head screw through the .120" (3,0mm) diameter hole in the bottom by temporarily removing lower ferrite half. **Internal Locking System** ensures that snap cannot be reopened after snapping closed into position, so that suppressor cannot be removed.

ZCAT SERIES CLAMP FILTERS

RoHS Compliant Available

TDK

Features:

- Can easily be attached without cutting the cable.
- Possesses better mechanical strength and operational temperature range (–40 to + 125°C) than existing products.
- The plastic case has a self-sustaining mechanism that prevents slipping on the cable after being clamped.
- Possesses excellent high-frequency noise absorption effect.
- Works against common mode noise, allowing for noise suppression without affecting signal quality.
- Effective for EMS (Electromagnetic Susceptibility), immunity against surges/noise.

FERRITE CABLE CORES/SLEEVES • SHIELDING FABRICS/GASKETS

EMI SLEEVES

RoHS Compliant Available

multicomp

Applications
- Computers
- Peripherals
- Digital Audio Systems

Ferrite sleeves provide attenuation of EMI on power and data cables, without affecting data transmitted through the cable. *Note: To enable the cable to pass smoothly through the sleeve an allowance should be made for tolerances in the OD of the cable and the ID of the sleeve.*

Sold in Multiples of 5

HINGED CLAMP CORES

RoHS Compliant Available

multicomp

Specifications
- Frequency range: 10MHz to 300MHz
- Case material: Black Nylon 66 to UL94V-0
- Insulation resistance: 10MΩ (min) between case and cores

A range of easy to fit data line filters, providing a simple solution to the problems of radiated noise emissions generated by electronic equipment. The filter simply clips around the cable to be shielded, and locks closed with no need to disconnect the cable, or remove connectors. No grounding is required, unlike with cable shields.

SPC12271

Mfg. part no. SPC12271 for quick and easy EMI suppression evaluation. The **SPC12271** contains split cores for round and flat cable as well as solid cores for flat cable. The split cores for round cables are held in a plastic case that snaps shut over the cable for a retro-fit design. The split cores for flat cable are held together with a spring clip for retro-fit design. Kit contains 32 sizes.

EMI SUPPRESSION EVALUATION KITS

RoHS Compliant Available

Fair-Rite Products Corp. Your Signal Solution

Expanded Cable and Connector EMI Suppressor Kit. Specifically designed to attenuate EMI in all types of cable-connected systems. Features 82 components, including a variety of shield beads, one- and two-piece cable suppressor cores and multi-hole suppressor plates for connectors. Made of "Type 43" material, which provides high impedance over a wide frequency range. Includes nylon cases and steel clips for assembly of split cable suppressor cores.

Chip Beads Kit. Surface mount beads in 4 EIA standard package sizes. Assorted current chip beads are suitable for wave and reflow solder processes. Ideal for suppressing EMI in computers, cellular phones, digital communications, pagers, TV and VCRs. 100% controlled impedance and DCR.

EXC SERIES TWO MODE SMD NOISE FILTER

SMD

Panasonic

Features:
- Burst/radiation noise filtering for audio circuits
- Optimally magnetic-coupled ferrite beads allow for filtering of both common and normal mode noises
- Strong multi-layer structure provides high-resistance to reflow soldering heat and high mounting reliability
- Magnetic shield type
- High impedance: 600ohm
- Low resistance value: 0.9ohm max.

Applications:
- Receiver lines, speaker lines, microphone lines and headset of mobile phones
- Audio signal lines of portable audio equipment, PCs, PDAs

ACM SERIES SMD AUTOMOTIVE ECU COMMON MODE FILTERS

RoHS Compliant Available

TDK

Features:
- Miniaturized while keeping characteristics
- Square type closed magnetic cores
- Low profile design suitable for a surface mount
- High impedance characteristic
- Operating temperature: -40°C to +125°C

Applications:
- Reduce common mode noise
- DC power lines of electronic
- Control equipment
- Multi-media equipment
- Electronic equipment power supply lines

ACF SERIES 3-TERMINAL SMD FILTERS

RoHS Compliant Available

TDK

Features:
- The ACF series consists of products with superior attenuation characteristics, in which the T-type filter circuit is magnetically shielded with ferrite.
- The series offers even greater attenuation characteristics when used in a stable circuit on the ground.
- The ACF series is ideal for high-density circuit design, since the series is vertically mounted and does not require much mounting space.
- Available for reflow soldering.

SMD SAW FILTERS FOR LOW-LOSS MOBILE COMMUNICATION

RoHS Compliant Available

EPCOS SMD

Specifications
- Operating temperature range: -40°C to +85°C
- Voltage rating: 3VDC
- Power rating: 25 watts max.
- Impedance: 50Ω

Features
- Low-loss RF filter for GPS
- Low amplitude ripple
- Ceramic package
- Gold-plated Nickel Terminals

FN405 SERIES PC MOUNT FILTERS

RoHS Compliant Available

SCHAFFNER

FN405 Series

Horizontal PC mount filters for smaller systems. 250VAC rated with maximum leakage current of 0.5mA @ 220VAC/50Hz. General purpose filter for situations where space is critical. **FN405 series** attenuates common mode and differential mode noise in the 150kHz to 30MHz range.

Mfg. Part No.	I (A)	L (mH)	Cx (µF)	Cy (pF)	Stock No.	Price Each 1-24	Price Each 25-49

CORCOM EDP AND EOP SERIES PC BOARD MOUNT RFI FILTERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features
- Space-saving compact design
- Low leakage current for European safety requirements
- Maximum leakage current, each line to ground @ 120VAC 60Hz: 0.22mA; @ 250VAC 50Hz: 0.38mA
- Current rating: 16A
- Voltage rating: 250VAC max.
- Operating frequency: 50/60 Hz

EDP series PC board mountable RFI filters provide enhanced differential mode performance for applications requiring more line-to-line protection. **EOP series** general-purpose RFI power line filters are effective in removing both common and differential mode noise for susceptibility applications. Both series are UL recognized, CSA certified, VDE approved.

Mfg. Part No.	Current (A)	Stock No.	Price Each 1-24

2.4GHZ / 5GHZ WIFI STAND ALONE ANTENNAS

RoHS Compliant Available

molex

- Ground-plane-independent design significantly reduces costs and engineering resources needed to tune and optimize ground-plane-dependent antennas
- High-radiation efficiency 34.9 x 9mm version antenna offers Total Efficiency values of 75% minimum in the 2.4GHz band and 60% minimum in the 5GHz band
- Higher radiation efficiency 35.9 x 15.9mm version antenna offers Total Efficiency values of 80% minimum in the 2.4 GHz band and 70% minimum in the 5GHz band
- Poly-flexible, double-sided adhesive tape on antenna enables easy peel-and-stick mounting anywhere within the device casing
- Robust coaxial cable to flexi-antenna with Pull Force of over 18.0N ensures maximum reliability of antenna
- Choice of several miniature coaxial cable length options provides for maximum flexibility for antenna placement in the wireless device

36.768 KHz CRYSTALS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Low frequency in small size SMD
- Low height ideal for high density circuit boards
- Ceramic package offers excellent environmental & heat resistance
- Extended temperature -40°C to +85°C for industrial applications

Specifications
- Frequency tolerance: ±20 ppm
- Output load: 12.5 pF max.
- Operating temperature: -40°C to +85°C
- Turn-over Temperature: +25°C to ±5°C

Applications
- Clock source for communication or A/V equipment
- Real time clock
- Measuring instruments

32.768 KHz REFLOWABLE SMD CRYSTALS

RoHS Compliant Available

CITIZEN

CMJ206T CMR200T

Used as a clock source for communications equipment, AV equipment, OA equipment, measuring instruments and various types of clocks.

QUARTZ GLASS CRYSTAL - 7A SERIES

RoHS Compliant Available

TXC

Features:
- 2 pads 5 x 3.2 mm SMD glass sealed crystal units
- High reliable environmental performance
- Tight tolerance and stability parts are available
- Designed for automatic mounting and reflow soldering
- Reasonable cost and good delivery performance
- The best choice of portable PC, PDA, DSC, and USB interface card
- Contains Pb in sealing glass exempted by RoHS directive

QUARTZ SEAM CRYSTAL - 7B SERIES

RoHS Compliant Available

TXC

Features:
- Ultra small SMD type crystal units
- High precision characteristics covering up to wide frequency range
- Higher frequency stability and reliability
- Excellent for reducing EMI effect

ST3215SB SERIES SMD TUNING FORK CRYSTALS

RoHS Compliant Available

AVX A KYOCERA GROUP COMPANY

Specifications:
- Operating temperature: -40°C to +85°C
- Frequency stability: ±20 x 10^{-6}
- Frequency temp. stability: ±200 x 10^{-6}
- Dimensions: 3.2 x 1.5 x 0.8mm

Features:
- Small, low profile
- Ceramic package
- ideal for consumer / mobile equipment

AMB8 SERIES CERAMIC SMD ULTRA MINIATURE CRYSTAL

RoHS Compliant Available

ABRACON CORPORATION

Features
- Low profile suitable for thin equipment
- Ceramic package and metal lid assures high reliability
- Tight tolerance and stability

Applications
- High density applications
- Modems, communication and test equipment
- PMCIA, wireless applications

CRYSTALS – CERAMIC SMD

32.768 KHz CERAMIC SMD CRYSTALS

RoHS Compliant Available

CITIZEN

CM415 CM519

Features
- Ultra-miniature size: Ideal for high-density circuit boards
- Environmental and heat resistant

Used as a clock source for communications equipment, AV equipment, OA equipment, cameras, cellular phones, pagers and measuring instruments.

Mfg. Part No.	ESR (kΩ)	Load Cap. (pF)	Freq. Tol.	Tape Cut Stock No.	Tape Cut Price Each 1-9	Tape & Reel Reel Qty. 3000 Stock No.	Tape & Reel Price Each 1-2999

AA SERIES SMD GLASS SEALING CRYSTALS

RoHS Compliant Available

TXC

Features:
- Compact glass sealed SMD crystal units
- Wide operating temperature range
- Superior and reliable performance in harsh environment
- Contain Pb in sealing glass exempted by RoHS directive

Specifications:
- Dimensions: 5.0 x 3.2 x 1.2mm
- Frequency range: 8 to 48MHz
- Overtone: Fundamental
- Operating temperature: -40°C to +125°C

AB SERIES SMD SEAM SEALING CRYSTALS

RoHS Compliant Available

TXC

Features:
- Reliable seam sealed ceramic package
- Wide operating temperature range
- Superior and relaible performance in harsh environments
- Applications: TPMS, ECM, ABS and sensor modules

Specifications:
- Dimensions: 5.0 x 3.2 x 0.9mm
- Frequency range: 9.5 to 40MHz
- Overtone: Fundamental
- Operating temperature: -40°C to +125°C

CM309S SERIES MHz RANGE PLASTIC SMD CRYSTALS

RoHS Compliant Available

CITIZEN

Features
- High efficiency mounting ideal for high density circuit boards
- Heat-resisting packaged cylinder-type AT-cut crystal
- Reflowable

For use in communications equipment, AV equipment, OA equipment and measuring instruments. Shunt capacitance: 7 pF. Frequency Tolerance ±30 ppm

ABM7 SERIES MICROPROCESSOR CRYSTALS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Low in height (1.3mm max)
- Ceramic package assures high reliability
- Small size SMD, suitable for high density applications
- Frequency Tolerance ±50 ppm

Applications
- Computers, modems, communication equipment
- Thin equipment

CRYSTALS – MICROPROCESSOR SMD

ABLS2 SERIES LOW PROFILE SURFACE MOUNT MICROPROCESSOR CRYSTALS

RoHS Compliant Available

ABRACON CORPORATION

Features
- High reliability
- Tight stability and extended temperature
- Reflow capable

Specifications
- Operating temperature: 0°C to +70°C
- Frequency stability: ±50 ppm
- Load capacitance: 18 pF
- Shunt capacitance: 7 pF

Applications
- Wireless applications
- Computers, modems, communications
- Automotive and industrial
- Hi-precision TCXO and clock applications

ABLS3 SERIES HC/49US (AT49) LOW PROFILE SURFACE MOUNT MICROPROCESSOR CRYSTAL

RoHS Compliant Available

ABRACON CORPORATION

Features
- Low in height
- Suitable for thin equipment
- Glass sealed package
- High reliability and high temperature operation
- Dimensions: 11.5 x 4.8 x 2.5 mm

Applications
- Computers, modems, microprocessors
- Automotive and industrial
- Wireless applications

ABM3 SERIES ULTRA MINIATURE CERAMIC SURFACE MOUNT MICROPROCESSOR CRYSTALS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Low in height
- High precision crystal
- Compact designs suitable for high density applications
- SMD; suitable for solder reflow
- Superior heat-resistant glass sealing
- Load capacitance: 18 pF

Applications
- Computers, modems, communication, and test equipment
- Thin equipment

ABM8 ULTRA MINIATURE CERAMIC SURFACE MOUNT MICROPROCESSOR CRYSTALS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Low in height; suitable for thin equipment
- Ceramic package and metal lid assures high reliability
- Tight tolerance and stability available
- High precision crystal, fundamental mode
- Frequency Tolerance ±50 ppm

Applications
- High density applications
- Modems, communication and test equipment
- PMCIA, wireless applications

HC49US SERIES MHz RANGE CRYSTALS

RoHS Compliant Available

CITIZEN

Features
- High performance
- Miniature
- Excellent vibration, shock and environmental resistance

For use in AV equipment, OA equipment, communications equipment and measuring instruments. Shunt capacitance: 7 pF, Frequency Tolerance : ± 30ppm.

CFS SERIES 32.768 KHz CYLINDRICAL CRYSTALS

RoHS Compliant Available

CITIZEN

Features
- Excellent shock resistance
- Low power consumption
- Superior characteristics indigenous to tuning fork-type quartz crystal units

Used as a clock source for communication equipment, AV equipment, OA equipment, measuring instruments and various types of clocks.

KHz CYLINDRICAL CRYSTALS

QUARTZ CRYSTAL - 9B SERIES

RoHS Compliant Available

TXC

Features
- Resistance welded type crystal units
- A great number of standard frequencies
- Higher frequency pullibility and lower equivalent series resistance

Applications
- TV
- STB
- LCDM
- Cable Modem

AC SERIES SMD CMOS OUTPUT CLOCK CRYSTAL OSCILLATORS

RoHS Compliant Available

TXC

Features:
- Ultra small SMD sealed clock crystal oscillator units
- High precision characteristics covering up to high frequency range
- Designed for automatic mounting and reflow soldering
- Supply voltage range: 1.8V to 3.3V
- High stability low jitter low power consumption

Specifications:
- Dimensions: 5 x 3.2 x 1.2 mm
- Output type: CMOS
- Oscillation mode: Fundamental / 3rd overtone
- Operating temperature: -40°C to +85°C

Mfg. Part No.	Frequency (MHz)	Frequency Stability	Supply Voltage (V)	Load Cap. (pF)	Tape Cut Stock No.	Tape Cut Price Each 1-9

ACZ SERIES SMD CMOS OUTPUT CLOCK CRYSTAL OSCILLATORS

RoHS Compliant Available

TXC

Features:
- Ultra small SMD seam sealed clock crystal oscillator units
- High precision characteristic
- Designed for automatic mounting and reflow soldering
- Supply voltage range: 1.8V to 3.3V
- High stability low jitter low power consumption

Specifications:
- Dimensions: 5 x 3.2 x 1.2mm
- Output type: CMOS
- Oscillation mode: Fundamental / 3rd Overtone
- Operating temperature: -40°C to +85°C

Mfg. Part No.	Frequency (MHz)	Frequency Stability	Supply Voltage (V)	Load Cap. (pF)	Tape Cut Stock No.	Tape Cut Price Each 1-9

TD SERIES SMD CMOS OUTPUT OSCILLATORS

RoHS Compliant Available

TXC

Features:
- Molded in plastic package
- Silicon-based MEMS oscillator
- Frequency range: 1 to 150MHz
- High stability, low power consumption

Specifications:
- Operating temperature: -40°C to +85°C
- Load capacitance: 15 pF
- Frequency stability: ±25ppm
- Supply voltage 3.3V
- Case size: 2.5 x 2.0 x 0.75 mm

AOCJY SERIES OVEN CONTROLLED CRYSTAL OSCILLATORS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Frequency Range SMD: 1.000 to 160.00MHz
- Frequency Range Thru-Hole: 1.000 to 100.00MHz
- Operating Temperature: -40°C to +85°C
- SC-Cut or AT-Cut, High "Q" resonator based design
- Either Sinewave or CMOS RF output
- Tight stability option

Applications
- Cellular Infrastructure
- Radar Systems
- Test & Measurement Equipment
- GPS Tracking with precision hold-over accuracy
- WiMax / WLAN

ASEM SERIES PLASTIC PACKAGE CLOCK OSCILLATOR

RoHS Compliant Available

ABRACON CORPORATION

Features
- Ultra Miniature Pure Silicon™ Clock Oscillator
- MEMS Technology by Discera
- Low Power Consumption <10mA
- Exceptional Stability Over Temp. at 0 - 70°C
- Available in 30kG Shock Resistance Configuration
- Low Cost-Compact QFN Plastic Packaging
- Compact Package design
- Extended Temperature Options Also Available
- **Package Size: 3.2 x 2.5 x 0.85mm**

Applications
- CCD Clock for VTR Camera
- Equipment Connected to PCs
- Low Profile Equipment
- Computers and Peripherals
- Lower Cost Crystal Oscillator Replacement
- Portable Electronics (MP3 Players, Games)
- Consumer Electronics such as TV's, DVR's, etc.
- Vibrant, Shock-Prone & Humid Environments for Industrial Equipment
- Demanding Military & Automotive Electronics

Specifications
- Frequency Range: 1.000 MHz - 150 MHz
- Frequency stability: ±25 ppm, ±30 ppm, ±50 ppm, or ±100 ppm
- Supply voltage: 3 VDC ±0.3V, 1.8-3.3 VDC options available
- Supply Current: 6mA Max. no load, 9mA max. full load
- Rise and fall times: 5ns max.
- Output load: 15 pF max., 10kohms min.
- Operating temperature: 0°C to +70°C with extended options available

ASV SERIES CRYSTAL CLOCK OSCILLATORS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Leadless chip carrier, low profile
- Seam welding
- Tri-state Enable/Disable function
- HCMOS and TTL compatible

Applications
- Provide clock signals for microprocessors, PC mainboards, graphic cards
- High output drive capability applications

Specifications
- Operating temperature: -20°C to +70°C
- Frequency stability: ±20 ppm
- Supply voltage: 3.3 Vdc ±10%
- Duty cycle: 40/60 % max. @ ½ V_{dd}
- Rise and fall times: 10ns max. for F < 35 MHz; 5 ns max. for F < 100 MHz; 2.5 ns max. for F ≤ 150 MHz
- Output load: 5TTL or 15 pF

CLOCK OSCILLATORS

RoHS Compliant Available

AVX A KYOCERA GROUP COMPANY

Specifications
- Miniature SMD Ceramic Package Type
- Frequency Range: 12 MHz to 50 MHz
- Frequency Precision: ±100 ppm
- Tristate Output Inhibit
- Supply Voltage: 5 V (±0.5 V)
- Operating Temperature: -10°C to +70°C

CL=50pF (f<50MHz), CL=15pF (f>50MHz) (Inclusive of test JIG and probe capacitance)

CSX-750F SERIES SMD CERAMIC CRYSTAL CLOCK OSCILLATORS

RoHS Compliant Available

CITIZEN

Features
- Ultra miniature
- Low profile
- Low power
- Output enable function
- Reflowable
- Frequency Tolerance: ±100 ppm

For use in communications equipment, AV equipment, OA equipment and measuring instruments.

MEMS LVPECL OSCILLATOR 4MA SERIES

NEW

RoHS Compliant Available

FOX

Features
- MEMS Technology
- 3.3V Supply Voltage
- -40 to +85°C Operating Temperature
- 7x5mm Plastic Package
- Low Phase Jitter (0.6pS RMS Typical - 12kHz to 20MHz)
- LVPECL Output

HCMOS OSCILLATORS

RoHS Compliant Available

FOX

Features:
- XTREMELY Low Jitter
- XPRESS Delivery
- Frequency Resolution to six decimal places
- Stabilities to ± 20 PPM
- Tri-State Enable / Disable Feature
- Industry Standard Package, Footprint & Pin-Out
- Gold over Nickel Termination Finish
- Serial ID with Comprehensive Traceability

Applications:
- ANY application requiring an oscillator
- SONET
- Ethernet
- Storage Area Network
- Broadband Access
- Microprocessors / DSP / FPGA
- Industrial Controllers
- Test and Measurement Equipment
- Fiber Channel

ASEMPxxx SERIES ULTRA MINIATURE CLOCK OSCILLATORS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Ultra Miniature Pure SiliconTM Clock Oscillator
- High Performance MEMS Technology by Discera
- Low Power Consumption for high speed communication
- Exceptional Stability Over Temp. at -40 to +85°C, ±15ppm
- Extended Automotive Grade Temp. stability at -55 to +125°C, ±25ppm
- Available in 50kG Shock Resistance Configuration upon request
- MIL-STD-883 shock and vibration compliant
- Durable QFN Plastic Compact Packaging
- Standby or Disable Tri-state function
- Low jitter (Period jitter RMS and Phase jitter RMS)
- High power supply noise reduction, -50dBc

Applications
- Storage Area Networks (SATA, SAS, Fiber Channel)
- Passive Optical Networks (EPON, 10G-EPON, GPON, 10G-PON)
- Ethernet (1G, 10GBASE-T,/KR/LR/SR, FCoE
- HD/SD/SDI Video & Surveillance
- PCI Express
- Display port

CLOCK CRYSTAL OSCILLATORS - 7C SERIES

RoHS Compliant Available

TXC

Features:
- Ultra small SMD seam sealed clock crystal oscillator units
- High precision characteristic covering up to wide frequency range
- Designed for automatic mounting and reflow soldering
- Optionable stand-by function for output: Tri-state output
- High stability, low jitter, low power consumption
- Main application: wireless communication set, PDA and DSC

Specifications:
- Supply Voltage Range: 2.97V to 3.63V (3.3V Typ.)
- Tolerance: ±10%
- Output Type: CMOS
- Output Load: 30pF
- Oscillation Mode: Fundamental / 3rd Overtone
- Frequency Stability: ±50ppm (-10°C to +70°C); ±100ppm (-10°C to +70°C)
- Dimensions: 5.0mm x 3.2mm

FREQUENCY STABILITY: ±50ppm (-10°C to +70°C)

CLOCK CRYSTAL OSCILLATORS - 7X SERIES

NEW

RoHS Compliant Available

TXC

Features:
- Ultra small SMD seam sealed clock crystal oscillator units
- For applications in WLAN, Bluetooth, DSC, DSL and other IT product
- Tri-state function available

Specifications:
- Supply Voltage Range: 2.97V to 3.63V (3.3V Typ.)
- Tolerance: ±10%
- Output Type: CMOS
- Output Load: 15pF
- Oscillation Mode: Fundamental / 3rd Overtone
- Frequency Stability: ±50ppm (-10°C to +70°C)
- Dimensions: 3.2mm x 2.5mm

CLOCK CRYSTAL OSCILLATORS - 7W SERIES

RoHS Compliant Available

TXC

Features:
- Small SMD seam sealed clock crystal oscillator units
- High precision characteristic covering up to wide frequency range
- Designed for automatic mounting and reflow soldering
- Optionable stand-by function for output: Tri-state output
- High stability, low jitter, low power consumption
- Main application: wireless communication, PC and LCDM

Specifications:
- Supply Voltage Range: 2.97V to 3.63V (3.3V Typ.)
- Tolerance: ±10%
- Output Type: CMOS
- Output Load: 30pF
- Oscillation Mode: Fundamental / 3rd Overtone
- Dimensions: 7mm x 5mm

FREQUENCY STABILITY: ±50ppm (-10°C to +70°C)

ACHL SERIES CRYSTAL CLOCK OSCILLATORS

RoHS Compliant Available

ABRACON CORPORATION

Features
- HCMOS and TTL compatible
- Tight symmetry option
- Low voltage

Applications
- Clock signal sources for digital chips and microprocessors
- Low power applications

Specifications
- Operating temperature: -20°C to +70°C
- Frequency stability: ±30 ppm
- Supply voltage: 3.3 Vdc ±10%
- Duty cycle: 40 / 60% max.
- Rise and fall times: 10 ns max.
- Output load: 5TTL or 15 pF

MEMSPEED PRO II PROGRAMMER FOR PURESILICON™ OSCILLATORS

RoHS Compliant Available

ABRACON CORPORATION

Features
- Small dongle interfaces thru USB to PC
- Automatic software upgrades via Internet
- Field programmable dongle for several series
- ASxMB series – 2nd generation MEMS CMOS output
- ASxMPC series – Low Jitter MEMS CMOS output
- ASxMPLP series – Low Jitter MEMS LVPECL output
- ASxMPLV series – Low Jitter MEMS LVDS output
- ASxMPHC series – Low Jitter MEMS HCSL output

Specifications
- Programmer supply voltage: 1.8 to 3.6V
- Programming time: 2 seconds
- Operating system supported: MS Windows (XP, Vista, and Windows 7) 32 or 64 bit compatible
- Programmer size: 2.50" x 1.25" x 0.50"
- Programmer weight: 0.2 lb

The MEMSpeed Pro II programmer allows users to instantly program Abracon MEMS oscillators to a custom frequency in seconds through a Microsoft Windows GUI program on a PC. Abracon MEMSpeed Pro II supports CMOS, LVPECL, LVDS, and HCSL output MEMS oscillators in variety of package sizes. The oscillators can be programmed over their respective frequency range in increments of 100Hz (up to four decimal point resolution). The MEMSpeed Pro II kit includes a programming dongle, USB cable, antistatic tweezers and USBa Windows based PC installation program. The MEMSpeed Pro II is used with device dependent socket adapter cards and the appropriate package devices.

PROGRAMMABLE CRYSTAL CLOCK OSCILLATOR

RoHS Compliant Available

CITIZEN

Features:
- Precision PLL technology enables up to 125 MHz high frequency output
- Quick delivery of specific frequency
- Ultra-miniature low profile SMT package
- Ceramic leadless chip carrier with seam-welded metal lid
- Output enable function
- Reflow soldering

Applications:
- Communication equipment
- AV equipment
- OA equipment
- Measuring equipment

Specifications:
- Frequency tolerance: ±100 ppm
- Operating temperature: -20°C - 70°C
- Load capacitance: 15 pF
- Rise and Fall Time: tr, tf: 4 ns

ZA SERIES PANEL ALARMS WITH TERMINAL BLOCKS

RoHS Compliant Available

MALLORY
Sonalert® Products

Features
- Fits Standard 22mm Panel Hole
- Continuous & Pulsing Tones
- Voltages from 6 Vdc to 120 Vac
- Sound Levels up to 95 dB @ 2 ft.
- Terminal Block Termination: Finger Proof Safe Handling Prevents Shock & Shorting Saves Assembly Time & Labor

DC ONLY

Connect. Manage. Automate.

PANDUIT®

Comprehensive Bundling Solutions

- Innovative cable tie designs to meet our customers' application challenge
- Used in a variety of applications and environments, providing the optimal wire management solution
- Large selection of ergonomic cable tie installation tools – all with consistent, and reliable performance

INTERCONNECT

BOARD-TO-BOARD

Card Edge/Backplane, DIN 41612, Stacking, Headers & Receptacles, FFC/FPC

CABLE-TO-BOARD

IDC, Pin & Socket, Modular Jack, Circular DIN, SATA/SAS, USB, SFP, XFP

INDUSTRIAL CONNECTORS

Circular, Rectangular/Rack & Panel, Plug & Socket, Electrical

D-SUB CONNECTORS

Filtered, Combination Layout, Adapters, Standard, High-Density, Contacts, Backshells, D-Sub Hardware

RF-COAX

1.0/2.3, Adapters, AMC, BNC, TNC, C, F, HN, N Jack, MCX, MHV, MMCX, QMA, QN, SHV, SMA, SMB, SMC, SMK, SMP, TRIAX, UHF

AUDIO-VIDEO

RCA, XLR, DIN, Phono Plugs, Phono Jacks, Speaker, Stereo Phono, Banana Plugs and Jacks

SOCKETS

DIP, SIP, PLCC, PGA, SIMM, DIMM, SOIC, Transistor, Spring Sockets, Memory Card

TERMINAL BLOCKS

Barrier Blocks, Euro Style Blocks, DIN Rail Blocks, Pluggable Blocks

SOLDERLESS TERMINALS

Ring, Fork/Spade, Disconnects, Butt Splices, Compression/ Mechanical Lugs

FIBER OPTICS

Transmitters, Receivers, Transceivers, Adapters, Attenuators, Singlemode, Multimode

MIL-SPEC CONNECTORS & CONTACTS

Card Edge, Circular, D-Sub, RF Coax, IC Sockets

WIRE & CABLE ASSEMBLIES

Category 5, RF/Coaxial, FFC/FPC (Flat Flex), Circular/Industrial, Fiber Optic, Computer Cable, Network Cable, Power Cords, Audio/Video, Printer, USB, Category 6, SATA/SAS

Cable Management

Cable ties and clips, wiring duct, cable management tools, heat shrink, fasteners, jumper wire assortments, sleeving, mounts, wire markers and labels.

SOCKETS – DIP/SIP

AMP DIPLOMATE® DUAL LEAF (DL) SIP SOCKETS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Low Profile: 0.210″ (5.33) Above PC Board
- Contact Spacing: 0.100″ (2.54)
- Voltage: 250VAC
- Meet EIA RS-415, MIL-S-83734 Specifications
- UL Recognized, CSA Certified

SIP sockets have dual wiping contacts with retention tails. Large target area with tapered lead-in ramps for easy insertion. Accept 0.008″-0.015″ (0.203-0.381) thick x 0.030″ (0.762) maximum wide rectangular leads. Glass-filled thermoplastic housing, rated UL94V-0, with closed bottom design and standoffs. Stackable end-to-end, side-to-side.

Authorized Distributor

- Contact Spacing: 0.100″ (2.54)
- Rating: 250VAC
- Dielectric Withstanding Voltage: 1000V_{RMS} Minimum
- Insulation Resistance: 5000MΩ Minimum
- Contact Resistance: 20mΩ Maximum
- Meets EIA RS-415, MIL-S-83734 Specifications
- UL Recognized, CSA Certified

Closed Frame

LADDER FRAME — PHOSPHOR BRONZE/TIN PLATING

Thru-hole mount DIP sockets with closed frame construction. Feature dual wiping contacts with straight solder tail in tin or 30μ″ gold plating over phosphor bronze or copper alloy. Glass-filled thermoplastic housing with lead-in ramps for easy insertion and standoffs for easy board cleaning. Internal anti-over-stress walls prevent contact damage. Closed bottom design inhibits solder wicking and flux contamination and meets EIA 486, Class I. Stackable end-to-end or side-to-side (brickwalling) for high board density packaging. Visual polarization. Designed for automatic machine insertion. Accept 0.008-0.014″ (0.203-0.355) thick IC leads.

AMP 800 SERIES ECONOMY OPEN INSULATOR DIP SOCKETS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Row-to-Row Spacing: 0.300″ (7.62mm)
- Vertical Mount
- Stamped and Forged Beryllium Copper Contact
- Four-Fingered Mating Contact Type
- Rated: UL 94V-0
- Temperature Range: 125°C
- Insulation Resistance: 5,000 MΩ
- Contact Resistance: 10 mΩ

Gold-plated contacts and tin-lead plated sleeve. UL recognized.

AMP 600 SERIES PLUG ADAPTER ASSEMBLIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Machined-Pin Molded Adapter
- Gold-Plated 0.018″ (0.457) Diameter Pins
- Machined Printed Circuit and Mounting Terminals
- Thermoplastic Polyester Insulator, Rated UL 94V-0

Used to assemble hybrid and special network circuits, and to interpose discrete components. Type number indicates pin style: **A** = round; **C, D** = slotted.

0.300″ (7.62) ROW SPACING

SINGLE-ROW SOLDER-TAIL STRIP SOCKETS

RoHS Compliant Available

MILL-MAX®

Single-row strip sockets have 0.020″ diameter solder-tail pin receptacles spaced at 0.100″. Four-finger inner clip and precision-machined brass receptacle shells. The body is rated UL94V-0. Current rating: 3 amps. **310 Series** feature 0.125″ tail length; **311 Series** feature 0.170' tail length.

SOCKETS – DIP/SIP

LONG SOLDER TAIL DIP SOCKETS FOR MULTILAYER PCB'S - OPEN FRAME

RoHS Compliant Available

MILL-MAX®

- Open frame DIP socket
- Current rating: 3A
- Above PC board height .165″
- High reliable 4 finger contact

DIP sockets with increased solder tail length of 0.170″, allowing application on multilayer PCBs up to 0.139″ thickness.

200 µ″ TIN SHELL PLATING - 30µ″ GOLD INNER CONTACT PLATING

DIP SOCKETS WITH INTEGRAL DECOUPLING CAPACITORS

RoHS Compliant Available

MILL-MAX®

Low-profile DIP sockets feature an integral decoupling capacitor; 0.1µF 20%-50V multi-layer ceramic epoxy encapsulated. Hi-rel. 4-finger clip. Contacts plated with 30µ″ gold, 200µ″ tin plating on sleeve. Temperature range: –25°C to +85°C. For product dimensions please visit us online.

LOW-PROFILE DIP SOCKETS

RoHS Compliant Available

multicomp

Low-profile DIP sockets feature high reliability contacts with a two-point contacting structure. Phosphor bronze contacts have a tin alloy plating rated at 1A, 250VAC. Contact resistance: 20MΩ maximum. Dielectric withstanding voltage: 500VAC rms for 1 minute. Housing standoffs accommodate board cleaning. Sockets can be stacked on 0.100″ (2.54) centers end-to-end. Visible polarization. Glass-filled polyester housing, rated UL94V-0. Operating temperature: –55°C to +125°C. **Sold in multiples of 5.**

DIP SOCKETS

RoHS Compliant Available

multicomp

SP series standard-profile DIP sockets are available with solder or wire-wrap termination. Closed entry insulator design virtually eliminates contact damage. Sockets have mounting holes for fastening to circuit boards. Twin beam edge wipe contacts provide optimum performance, extended life. Contact material: phosphor bronze. Solder pin dimensions: 0.008″ x 0.025″ x 0.125″ long; solderless pin dimensions: 0.025″ square x 0.630″ long. Operating temperature range: –65°C to +125°C.

RoHS Compliant Available

multicomp

- Glass-Filled Polyester Insulating Body Conforms to UL94V-0

Outer sleeves: brass-over-nickel-over-copper-copper flash, per MIL-G-45204B. Sockets available in tubes for use with automatic insertion equipment. Withstand voltage: 1500V RMS. Working voltage: 10mV to 60V. Operating temperature: –55°C to +125°C. Soldering temperature: 260°C maximum for 5 seconds. Resistance against Freon, Frigen, Akrolone, Alpha-detergent (short treatment only). Able to withstand 1000-cycle insertion.

DIP SOCKETS WITH INTEGRAL DECOUPLING CAPACITOR

RoHS Compliant Available

multicomp

DIP sockets eliminate noise at the source before it can reach the chip—an advantage in high-speed logic and memory applications. Center-to-center pin spacing: 0.100″ (2.54). Integral glass-encapsulated ceramic capacitor: 0.1uF 50VDC. Capacitor leads are connected directly to the ground and voltage pin of socket to an interference fit. Insulator body material: glass-filled polyester, rated UL94V-0.

LGA 1156 SOCKETS AND HARDWARE

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features

- Contacts: Gold plated copper alloy
- Base housing: High temp thermoplastic UL94V-0
- Cap: Thermoplastic UL94V-0
- ILM load plate and lever: Stainless steel
- ILM frame, ILM screw and shoulder screw: Steel
- ILM Insulator: Polypropylene
- Backplate assembly: Steel, zinc or nickel plated
- Backplate Insulator: Polypropylene
- 1156 contacts with a 0.914mm x 0.914mm grid
- Available with 15 Gold or Gold fl ash contact plating
- Socket housing facilitates efficient soldering to the PCB board
- Socket is supplied with a cap to facilitate vacuum pick and place
- Backplates are available in zinc or nickel plating

Tyco Electronics' surface mount LGA socket was designed for use with Intel's® Core™ i7 LGA 1156 processor. The contacts have solder balls for surface mount onto the PCB, while the top side provides a cantilever beam interface to the package. The integrated lever mechanism (ILM) generates the Z-axis compression load. A robust bolster plate eliminates PCB bowing during compression. The sockets have been validated to Intel Design Guides.

LGA 2011 SOCKETS AND HARDWARE

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features
- Contacts: Gold plated copper alloy
- Base housing: High temp thermoplastic UL94V-0
- Dust cover: Thermoplastic UL94V-0
- ILM load plate and lever: Stainless steel
- Backplate assembly: Steel
- Insulator: Adhesive coated polypropylene
- Socket housing facilitates efficient soldering to the PCB board.
- Socket is supplied with a cap to facilitate vacuum pick and place.

Tyco Electronics' surface mount LGA socket was designed for use with Intel's® Core™ i7 LGA and Xeon 5 LGA 2011 CPU processors. The contacts have solder balls for surface mount onto the PCB. A hex ball array provides for a stronger housing and allows for a smaller area for all 2011 balls. The integrated lever mechanism (ILM) generates the Z-axis compression load. A robust bolster plate helps eliminate PCB bowing during compression. Integrated lever mechanism (ILM) and backplate must be ordered separately.

S20 SERIES MICROSIM CONNECTORS

This connector is designed to meet interconnection requirements of plug in micro SIM cards. The S20 series is equipped with 6 contacts, hinge and cover. Compact design: only 2.5 mm above board profile Reliable and durable locking/latching mechanism. Correct orientation of the SIM card guaranteed by integral polarizing feature. Self cleaning of the contact provided by the motion of the connector cover before locking. Visible SMT contact tails and "open window" cover allow easy electrical testing of the soldered connector. Designed for SMT automatic assembly processes. Supplied in tape and reel packaging.

PC BOARD SOCKETS

RoHS Compliant Available

HARWIN

- Compatible with Ø0.50mm, Ø0.80mm, and Ø1.00mm mating pins
- Suitable for a variety of mating pin lengths.
- Gold contacts inside tin shell
- Four finger gold plated beryllium contact
- Proven history in high end industrial and Mil/Aero applications
- Operating temperature: -55°C to +125°C
- Solderability: 235°C for 5 seconds
- Soldering heat resistance: 260°C for10 seconds
- Durability 0.5mm: 500 operations
- Durability 0.8 and 1.0mm: 1000 operations

SPRING LOADED CONTACTS

RoHS Compliant Available

MILL-MAX®

Applications include base unit (battery/charger) interface for:

- Mobile phones
- Mobile radios
- Bar code readers
- Medical instruments
- Test instruments

Individual precision machined pins feature long 1-million-cycle life, 2A current capacity. Contact diameter: .042″. Gold-plated components. Spring loaded modular strip contacts available online or call .

LARGE SCALE, HIGH CURRENT SPRING LOADED CONTACTS

RoHS Compliant Available

MILL-MAX®

Fig. 1 Fig. 2 Fig. 3

- Sleeve & Plunger: 20u″ Gold plated copper alloy
- Spring: 10u″ gold plated stainless steel 302
- Current rating: Continuous 9A @ 10° C temperature rise
- Gold plating provides the highest interconnect reliability, corrosion protection and wear resistance.

Mill-Max 0854, 0855 and 0856 large scale, high current spring pins feature thick wall construction and solid plungers for increased durability. In contrast to miniature spring pins, which are typically used on .100″ (2.54 mm) centers, these new offerings are for applications where greater spacing is required due to electrical and mechanical specifications. Inside each spring pin is a gold-plated, stainless steel spring rated for 1,000,000 cycles. These large scale spring pins have a .045″ (1.143 mm) working travel (.090″ [2.286 mm] maximum travel) and exhibit higher spring forces than smaller miniature spring pin connectors.

Mfg. Part No.	Fig.	Termination	Height (in)	Travel (in)	Stock No.	Price Each 1-24
0851-0-15-20-82-14-11-0	...	Solder Mount	0.378	0.090	63R0183	1.34

(198145)

ULTRA-LOW & LOW PROFILE SPRING LOADED CONTACTS

RoHS Compliant Available

MILL-MAX®

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5

- Sleeve & Plunger: 20u″ Gold plated copper alloy
- Spring: 10u″ gold plated beryllium copper or stainless steel 302
- Current Rating: 2A continuous, 3A peak
- Gold plating provides the highest interconnect reliability, corrosion protection and wear resistance.

Mill-Max ultra-low and low profile spring pins are a solution for applications where above board height is limited. As packaging requirements for electronics continue to shrink in size, traditional interconnects don't always fit the bill. For board-to-board or device-to-board connections, low profile spring pins are a practical solution. These new low profile options utilize the same technology & internal spring components as standard spring contacts. All three pins are rated for one million cycles and have a current rating of 2 amps continuous use (3 amps maximum.)

39xx-0 SERIES CRIMP PINS

NEW

RoHS Compliant Available

MILL-MAX®

- Pin Material: Brass Alloy
- Pin Finish: Gold Over Nickel

These new pins are commercial-off-the-shelf (COTS) equivalents to the popular Mil-Spec M39029 crimp pins. If your application does not require Mil-Spec components but demands the same reliability and form factor, then these pins will fit the bill perfectly.

SOCKET PIN TERMINALS WITH DISPOSABLE CARRIER ASSEMBLIES

RoHS Compliant Available

multicomp

PTCA series pin terminal carrier assembly sockets are based on the very high specific pressure (VHSP) contact system. Heat-treated, four-finger contacts are gold-plated beryllium copper. Drilling low-profile board enables the contacts to be inserted down the shoulder and leaves 0.030″ (0.762) maximum profile above board. Closed bottom pin protects from wicking and flux contamination. Meets severe environmental requirements of high shock and vibration. Permits maximum air circulation under ICs and eliminates head entrapment under the insulator. Air-cooled. Throw-away metal carrier eases installation.

8060 (Typical) 8058-1G32 8080-1G

8060 series has pin circle diameter of 0.100″ (2.54); **8058 series** 0.200″ (5.08) diameter. Teflon® insulator. Two-piece machine socket terminal: gold plated brass outer sleeve and gold plated beryllium copper contacts. **8080-1G series** TO-3 power transistor sockets come with one or two solder lugs. Beryllium copper contacts with electro-tin plating and black phenolic insulator (Ph/ET), or silver plating with green diallyl phthalate insulator (Dp/SL), or 30μ″ gold plating and black phenolic insulator (Ph/GL). All have 0.255″ diameter, except **8058-1G23**, **8058-1G49** and **8058-1G32** which have 0.406″ diameter.

MEMORY CARD CONNECTORS

N7G24 SERIES FLASH MEMORY HEADERS FOR CFAST CARD

RoHS Compliant Available

3M

- Mate with both CFast™ Type I and Type II cards
- Meets CFA CFast™ specification Rev 1.0
- Extended guide rails enable accurate and easy card insertion
- Single row surface mount solder tails facilitate auto placement and IR soldering
- 2mm standoff available for component clearance underneath header
- Extended guide rails with grounding clips
- Tested to 10,000 mating cycles
- Right or left hand dual-push ejectors or latching retainer available

Header, Latching Retainer, Right Ejector

N7G24 series 3M™ header for the new CFast™ high-performance serial flash memory cards is a 7+17-pin connector consisting of a SATA-compatible 7-pin signal connector and a 17-pin power and control connector. Features extended guide rails to reduce the possibility of misalignment during card installations, and grounding clips that provide additional retention force to the card, helping reduce the possibility of uncontrolled card removal from the connector when ejected. The single-row, surface mount co-planar tails allow for higher yields and simplified inspection. The header is offered in a low profile configuration, or with 2mm standoffs that allow the designer to populate the board underneath an inserted card. Choice of two styles of dual-push ejector as well as a latching retainer that clips onto the header and provides a wire latch for robust retention, ideal for critical applications or applications subject to vibration and shock.

HEADER — 1.27MM PITCH

N7G24 series 3M™ header housing is constructed of high-temperature thermoplastic, beige, flammability rated UL 94V-0. Copper alloy contacts are gold plated on mating end, matte tin on solder tail with a nickel underplated all over. Current rating: 1.5 A per pin. Recommended PCB thickness: 0.066″ (1.65mm). Total arm length: 1.545″ (39.23mm); overall width: 1.91″ (48.5mm). Operating temperature rating: -40°C to 85°C.

NANO SIM CONNECTOR				
Nano SIM cards have the same contact arrangement as traditional Mini SIM cards, however the reduced card size of 8.8mm x 12.3mm shows over 3 times space savings in card footprint.				
SIM8050-6-0-14-01-A	Push Pull 6 position - 1.45mm Profile	94W2768	1.60	1.52
PUSH PULL SIM CONNECTOR				
Card guide and stops in housing (inside the slot) prevents card mis-insertion. Reliable low-friction contacts with 50 mOhm contact resistance. High quality 15u" gold plated contacts guarantees minimum 5,000 mating / unmating cycles. Absorption area for automatic pick and place SMT mounting				
SIM2055-6-0-18-00-A	6 position - 1.80mm Profile - Card Stop - 16.30mm Length - Mid Wing Block	69R4871	0.76	0.68
SIM2070-6-1-30-00-A	6 Position - 3.44mm Profile - With Card Detect Switch	93T1229	1.25	1.02
PUSH PUSH SIM CONNECTOR				
Push Push SIM card connectors have a mechanism for easy card insertion & extraction. Built in card detection switch for hot swap and plug & play applications. Anti-fly out brake feature to prevent card fall out during ejection. Shielded metallic case minimizes EMI / EMC pick up. High quality 15u" gold plated contacts guarantees a minimum 5,000 mating / unmating cycles.				
SIM4050-6-1-22-00-A	6 position - 2.20mm Profile - With Swith	69R4874	2.84	2.45
SIM4055-6-1-22-01-A	6 position - 2.20mm Profile - With Swith - With Boss	69R4875	2.84	2.45
HINGED SIM CONNECTOR				
Hinged SIM connectors offer robust hinged slide lock mechanisms to hold the SIM card securely in place. A guided housing for card alignment, preventing card mis-insertion.				
SIM5051-6-0-18-00-A	6 position - 1.85mm Profile	94T2308	0.81	0.78
SIM5055-6-1-25-00-A	6 position - 2.50mm Profile - With Card Detect Switch - Card held in lid	93T1230	1.25	1.22
SIM5060-6-0-26-00-A	6 position - 2.60mm profile - Card held in lid	93T1231	1.01	0.98
SIM5060-8-0-26-01-A	8 position - 2.60mm profile - Card held in lid	93T1232	1.01	0.98
DUAL SIM CONNECTOR				
Dual SIM slots allow plugging of two SIM cards into one connector, saving you PCB space and cutting the cost of PCB placement. This enables applications using two GSM accounts in one device. For example, in the vehicle tracking market the connector allows the option of switching between mobile networks when crossing country borders or when a alternative network offers a price or signal quality advantage. In personal handheld applications the connector permits use of 'work' and 'personal' accounts.				
SIM6050-8-0-30-00-A	Dual - SMT - 2 x 8 pin - 3.00mm Profile - Without Switch - Without Post	99R5290	1.48	1.25

SPD08 SERIES 0.80mm PITCH HIGH-SPEED CARD-EDGE CONNECTORS

RoHS Compliant Available

3M

- Supports flexible stacking height (16-40 mm) mezzanine applications using a riser card
- High-density (0.8 mm pitch), two-row design conserves board space and simplifies trace routing
- Robust contact design is tolerant of misalignment, provides a reliable connection and supports blind mate applications
- Controlled impedance, crosstalk limiting contact design supports speeds up to 15 Gbps
- Embedded ground plane within riser card limits row to row crosstalk and enhances signal integrity
- Supports up to 25 Gbps wire to board applications using 3M™ Twin Axial Cable terminated to the card-edge
- Flexible design supports 20-200 contact positions
- Available with optional latches for robust mechanical stability
- 0.5A current rating per contact
- Supports XAUI, PCI express (Gen 1/2/3), SATA and other application speeds

SPD08 Series high-speed card-edge connectors supports high-speed board-to-board and wire-to-board connections. It has a robust and flexible contact design for reliable connections, and features a flexible stacking height and compact design to conserve board space and provide optimal value to customers. The connector's flexible design handles from 20 up to 200 contact positions and can support up to 15 Gbps board-to-board applications. Additionally, when used in conjunction with the 3M™ Twin Axial Cable, the 3M SPD08 connector supports up to 25 Gbps wire-to-board applications with a reliable, simultaneous ribbon termination.

CARDCON™ 0.100″ (2.54) and 0.156″ (3.96) DENSITY COMMERCIAL SOLDER CARD EDGE CONNECTORS

CINCH

- Bifurcated semi-bellows type contacts constructed of spring brass-plated with gold over nickel for added reliability.
- Ideal for applications involving vibrations or board irregularities.
- Available less mounting ears or with 0.128″ (3.25) mounting holes.
- UL94V-0 rated glass-filled polyester insulation material, black.
- Operating temperature: –65°C to +105°C.
- Meets applicable performance criteria of MIL-C-21097.
- UL recognized - file E170218 (UL1977) E130965 (UL1863).

Additional 0.100″ (2.54) features:
- DIP solder tails on 0.200″ (5.08) row centers double readout
- Withstanding voltage: 650 VAC rms. Current rating: 3 A
- Accepts 0.062″ (1.59) thick PC boards
- Contact resistance: 10 milliohms maximum. Insulation resistance: 5000 megohms minimum
- Standard contact plating: 10μ″ selective gold over nickel, 50μ″ nickel in contact area, tin on tails

Additional 0.156″ (3.96) features:
- DIP solder tails single readout and double readout on 0.140″ (3.56) row centers or 0.200″ (5.08) row centers
- Solder eyelet, single readout and double readout on 0.200″ (5.08) row centers
- Withstanding voltage: 1800 VAC rms. Current rating: 5 A
- Accepts single or double sided 0.062″ (1.59) thick PC boards
- Contact resistance: 6 milliohms maximum. Insulation resistance: 5000 megohms minimum
- Contact plating: 10μ″ selective gold over 30μ″ nickel in contact area, tin on tails

PCI EXPRESS CONNECTORS

RoHS Compliant Available

FCI

- 1, 4, & 16 serial PCI Express links to suit different bandwidth requirements
- Supports 2.36mm thick motherboards
- Through-mount soldertails are offset to form four rows on 2.0mm pitch
- Moulded polarisation key prevents mis-alignment when mating
- A retention clip may be mounted on the add-in card and latched over the ridge of the connector

These 1.0mm pitch, vertical card edge connectors are used to implement the PCI Express™ strategy in ATX or ATX-based desktop PCs and server systems. The connector family offers 1, 4 & 16 high-speed serial PCI Express Lanes. Each serial lane supports 2.5 Gbps data rate (per direction).

MEZALOK HIGH RELIABILITY MEZZANINE CONNECTORS FOR VITA 61 STANDARD

TE connectivity

Authorized Distributor

- Housings: LCP plastic, white in color
- Contacts: Gold plated copper alloy, Sn/Pb solder balls
- Operating temperature: -60°C to +125°C
- Mating cycles: 500
- Mating force: 0.30 lb. max. times number of contacts
- Shock and vibration per VITA 47 requirements

Rugged surface mount mezzanine connector incorporating "super-redundant" Mini-Box contact system for an ultra reliable separable interface. Designed for 10mm and 12mm stack heights in both 60 and 114 positions. 114 position is designed to support VITA 61 XMC architecture as rugged alternative to VITA 42 XMC. 60 position designed for custom architecture stacking applications. VITA 42 and VITA 61 are not intermateable, but are footprint and XMC architecture compatible. LCP plastic housings offer superior thermal stability and are low-outgassing. Compliant BGA board attach supports standard surface mount processing and excellent thermal stability.

AMP 0.5mm FINE MATE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Voltage Rating: 50 VAC
- Current Rating: 0.5 A
- Operating Temperature: -30°C to +105°C
- Housing: 6T nylon, high heat resistant resin
- Contacts: Tin plated phosphor bronze
- Ultra fine, 0.5 (0.020) pitch SMT connectors for boardto- board interconnections
- Low profile parallel board stacking heights as low as 1.5 (0.059)
- Horizontal versions available for right angle board-to-board applications
- Surface areas provided to accommodate vacuum nozzles
- Available packaged in tape and reel for automatic placement per EIAJ standards
- Offered with tin or gold plating on mating surfaces
- Solder pegs are included for anti-peeling

0.5mm Fine Mate connectors are economical, surface-mount, fine pitch board-to-board connectors that have been developed to meet the latest needs of the electronic industry for high density packaging. These connectors offer a 0.5 (0.020) contact pitch and parallel board stacking heights ranging from 4.5 (0.177) to 6.0 (0.236). They are ideally suited for applications requiring miniaturization, such as cellular phones, pagers, notebook computers, camcorders and other consumer electronics. These connectors are designed for economical, automatic placement onto SMT printed circuit boards. The plug and cap designs include surface areas to accommodate "pick and place" vacuum nozzles without secondary covers. All products are "tape and reel" packaged, conforming to EIAJ standards.

AMP 0.50mm FREE HEIGHT (FH) BOARD-TO-BOARD STACKING CONNECTORS FOR COM EXPRESS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Current Rating: 0.5A
- Voltage Rating: 50 VAC
- Dielectric Withstanding Voltage: 200 VAC
- Durability: 30 cycles
- Operating Temperature: -40°C to +85°C

0.5mm Free Height is a two-piece connector system designed for parallel board-to-board stacking applications. The contact system is identical to our popular 0.6mm FH product. The 0.5mm FH product has been chosen by the PICMG COM Express working group as the interface between embedded modules and carrier cards. Stack Height(mm) = Receptacle Height + Plug Height - 4mm

AMP 1.00mm FH (IEEE 1386) PC BOARD TO BOARD STACKING CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Current Rating: 1.0A per contact
- Contact Resistance: 30 milliohms max.
- Durability: tested to 100 mating cycles min.

High density packaging on 1.0 [.039] centerline spacing, available in standard 64-position and optional 84-position sizes, board stacking heights available from 8mm [.315"] to 15mm [.591"]. Tape and reel packaged per EIA standards, increased plastic clearance eliminates stress to solder joints during mating, improved locating posts ensure accurate hand or robotic placement. Contact material-phosphor bronze,housing material-thermoplastic, dual rows. Meets EIA-700 AAAB specifications for IEEE 1386 applications.

0.5 mm PITCH BOARD-TO-BOARD CONNECTORS

RoHS Compliant Available

AVX INTERCONNECT
A KYOCERA GROUP COMPANY

- Contact Material: Copper alloy
- Insulator Material: Heat resistance plastic
- Operating Temperature Range: -25 to +85°C

Series 5046/5047/5087 are the Super Microleaf connector series, board to board, fine pitch and low-profile connector system that meets the need for high-density circuits in the market, and it is designed especially for portable equipment. The stack height between boards can range from 2.0mm to 7.0mm. ELCO's original design concept of receptacle contact achieves fine click feeling at mating and extremely high reliability in the connection of these super micro sized connectors. Designed for automatic mounting machine, packaged in tape and reel.

MEZZOSTAK™ 0.5MM MEZZANINE CONNECTORS

RoHS Compliant Available

FCI

Specifications
- Current Rating: 0.5 amps per line (de-rated)
- Operating Temperature -40 degrees to 125 degrees C
- Durability: 50 mating cycles
- SMT lead co-planarity: 0.08mm max
- Contact Wipe length: 1.0mm min
- Materials: LCP plastic housings and gold plated copper-alloy terminals

Features
- "Mates-to-itself" design reduces part numbers and complexity
- Guidance features ease mating action and PCB assembly
- Robust construction, high un-mating force increase connection security
- Economical high speed performance supported by reports and S-Parameter models
- Footprint compatible with major competitors

Use same part number for both sides of connection.

CONAN® 1.0mm PITCH MEZZANINE SMT CONNECTORS

RoHS Compliant Available

FCI

Rugged connector system well suited for the shock and vibration of portable electronics. Blade-on-beam contacts prevent stubbing when mating and allow peeling for un-mating. Audible "click" signals sure mating engagement. Polarization posts align connector to PCB. Insulators withstand infrared and vapor-phase reflow soldering temperatures. Gold flash over palladium nickel finish in the contact areas provides reliable electrical performance. 0.004" (0.1) lead coplanarity produces high-quality solder joints. Surface mount retainers increase mechanical strength after soldering. Polarized housings prevent mismating. Molded lead-in assists blind mating during final assembly. UL recognized, CSA certified.

BERGSTAK® HIGH-DENSITY, 0.8mm PITCH MEZZANINE SMT CONNECTORS

RoHS Compliant Available

FCI

FCI's compact BergStak® 0.8mm pitch connector series offers an extensive range of stack heights and circuit sizes to support a wide range of mezzanine, boardstacking applications. The available stack heights range from 5mm to 16mm in increments of 1mm. Options for wider board spacing can provide clearance for taller board-mounted components or increased air flow for cooling. Connector polarization at the mating interface and ample-lead-in angles produce easy, repeatable mating. All connectors in the BergStak® 0.8 product family feature a robust blade-on-beam contact design at the mating interface and surface-mount termination at the PCB interface. * PCB Stack height = Receptacle height + Plug Height - 3.4mm

PC BOARD STACKING CONNECTORS

AMPMODU PC/104 CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Press fit design eliminates hand soldering
- Unitized PC/104 connector assembly eliminates two piece (64-pin and 40-pin) configuration
- Integral board spacers with captive hardware
- Flat-rock insertable

PC/104 and **PC/104 Plus** series connectors eliminates need for two pieces and wih optional standoffs, minimizes system assembly time. Nominal resistance: 10 milliohms. Dielectric withstanding voltage: 500VAC for 1 min. at sea level. Temperature: -55°C to 105°C. Housing material: Black thermoplastic, UL 94V-0.

CONNECTORS FOR PC/104 EMBEDDED SYSTEMS APPLICATIONS

RoHS Compliant Available

3M

- Standard PC/104 Pin-and-socket connectors
- Rugged and reliable 64- and 40-contact male/female headers
- Simple contact design to accommodate many standoff heights.
- Available in solder tail

Through Hole 3.2mm Tail — Through Hole 12mm Tail

New 3M™ connectors for embedded standards (ATCA and Micro TCA) complement our 2mm Hard Metric, Compact PCI and UHM backplane connector product families, giving us a full portfolio of options for your high-speed, high-performance requirements. This addition includes MicroTCA signal and power connectors, ATCA power connectors, CompactPCI® power connectors, Hard Metric Power connectors, PC/104 connectors, and PC/104 Plus connectors.

0.40mm (0.016″) SLIMSTACK™ SMT BOARD-TO-BOARD CONNECTORS

RoHS Compliant Available

molex

SlimStack™ 0.40mm (.016″) connector family includes stack heights as low as 0.70mm (.026″) and widths as narrow as 2.50mm (.098″). Many SlimStack 0.40mm versions are intermateable and footprint compatible, which enables various stack heights without having to change the PCB pattern. The unique features of these connectors include nickel-barrier plating to prevent solder-flux intrusion, friction locks for secure mating, a two-point contact design version for additional contact reliability, and a high mating-retention version to withstand shock and vibration applications. SlimStack 0.40mm full range of connectors include stack heights from 0.70mm (.028″) to 4.00mm (.157″) and range in size from 12 to 120 circuits.

AMP EUROCARD TYPE C RIGHT-ANGLE PIN AND VERTICAL RECEPTACLE ASSEMBLIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 0.100″ x 0.100″ (2.54 x 2.54) Pin and Receptacle Connector Assemblies
- Meet DIN 41612 (Level II) and IEC 603-2 Requirements
- Type C Vertical Assemblies Feature Solderless, Press-Fit Action Pin®
- Voltage Rating: 250VAC
- Dielectric Rating: 1000VAC
- Temperature Rating: -55°C to +125°C
- UL Recognized, CSA Certified

Type C right-angle pin assemblies feature brass solder posts with or without brass boardlocks. Easily installed with seating tools, *ordered separately*. Flame retardant, grey polyester polarized housings, rated UL94V-0. Intermateable with **type R** assemblies, *ordered separately on page 740.*

DIN 41612 BOARD MOUNT CONNECTORS

RoHS Compliant Available

FCI

Applications:
- Consumer electronics
- Office equipment
- Industrial electronics
- Data
- Private switching
- Telecommunication
- Public switching
- Datacom

FCI's DIN selection proven standard connectors, such as signal solder to board, press-fit and power connectors. Insulator material is polyester thermoplastic UL 94 V0. Contacts are copper alloy with gold over nickel on contact area and matte tin over nickel on termination area. Temperature range : -55° C to +125° C.

DIN 41612 CONNECTORS

DIN 41612 CONNECTORS UP TO 6 AMPS

RoHS Compliant Available

Male - Right-Angle PCB

Female - Solder

Female - Press-In

- IEC 60 603-2 (and complementary types)
- Maximum 48 contacts
- Board mount angled and straight
- Cable mount crimp and solder lug
- 0.2" (5.08mm) contact spacing
- Moldings: thermoplastic resin, glass fiber filled, UL 94 V-0

- Contacts: copper alloy
- Temperature range -55 C to +125 C
- Performance level 2 = 400 mating cycles
- Current rating 6A
- *Order housings, contacts, and accessories separately*

HI-CON™ EUROCARD DIN CONNECTORS

RoHS Compliant Available

PANCON CONNECTORS

Male and female 2- and 3-row connectors permit high-density PC board packaging. Intermateable to DIN 41612, VG95324, BS9525, and IEC 603-2 specifications. Compatible with VMEbus, STEbus, MULTIbus II, CIMbus, and NUbus applications. Glass-filled polyester housings, rated UL94V-0. Current rating: 3-amp max. on board-mounted connectors; 1.5-amp max. on IDC connectors. Operating temperature: –55°C to +125°C. Meet DIN Level III performance unless otherwise indicated. Other performance versions are also available; *go online or call.*

MULTIGIG RT 2-R RUGGEDIZED CONNECTORS FOR VPX APPLICATIONS

TE connectivity

Authorized Distributor

Features

- Quad-redundant contact provides additional level of reliability under extreme vibration
- Compliant to VITA 46 for Open VPX applications
- Impedance-matched construction and low noise footprint supports high speed protocols: Serial RapidIO, PCIe, Ethernet, Fiber Channel, InfiniBand
- Modular, lightweight connector system allowing easy implementation and custom slot configurations
- Robust "pinless" interface resists damage
- Ruggedized guide hardware increases stability of daughtercard to backplane interface
- Supports 20.3mm (0.8″) card slot pitches
- VITA 46 compliance enables upgrade in existing VPX application

Applications

- Ground Defense
- Missile Defense
- Electronic Systems / C4ISR
- Space
- Commercial and Military Aerospace

MULTIGIG RT 2-R is a ruggedized, lightweight, high-speed board-to-board interconnect system, compliant to VITA 46 VPX standards. This connector system features the modularity and flexibility of the MULTIGIG RT 2 connector, with a new quad-redundant backplane contact structure and ruggedized guide hardware designed for high-vibration levels. Black high-temperature thermoplastic housings. High-performance copper alloy contacts are gold-plated over nickel in mating area, tin-lead on pin tails. Mating force: 0.75N (2.7ozf) max. per contact. Operating temperature range: -55° to +105°C. Rugged aluminum or passivated stainless steel hardware; *ordered separately below.*

BACKPLANE CONNECTORS

MULTIGIG RT CONNECTORS FOR VITA 41 AND VITA 46 (VPX) STANDARDS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 10 Gbps performance
- Differential, Single-ended and Power
- Customizable impedance matched printed circuit wafer interface
- Backplane connector system with "pinless" interface
- Superior crosstalk performance
- Optimized footprints for signal integrity and ease of board design
- Utilizes a 0.56 [.022] diameter via for backplane connector for lower cost board fabrication

Tyco Electronics VITA 41 & VITA 46 VPX backplane interconnects provides high speed data rates that traditional VME is not designed for by merging the latest packaging and connector technology with the latest bus and serial technology. The printed circuit based pinless interconnect family is comprised of modular components which can be used in a variety of combinations. VPX dramatically increases bandwidth with fewer pin counts and enables heterogeneous architectures to help preserve existing investments in technology and systems.

Z-PACK TINMAN BACKPLANE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Receptacle

Header - Open Ended

Header - Double Ended

- High speed: 12.5 Gbps
- High density: 31 pair/cm [80 pairs/in]
- Modular design for maximum design flexibility
- 3, 4, 5 and 6 pair per column versions (5 pair shown)
- 85 ohm versions compatible with IntelR QuickPath Interconnect (QPI) technologies
- Available with and without end walls for pin protection
- Meets industry reliability requirements of Bellcore/Telcordia
- Operating voltage: 250 VAC max.
- Temperature range: -65°C to +90°C

Z-PACK TINMAN BACKPLANE CONNECTORS (CONT.)

TE Connectivity's Z-PACK TinMan product is a new high speed, impedance matched connector system with extreme signal density. Available in both 100 ohm and 85 ohm versions, this connector system exists in 3, 4, 5 and 6 pair per column versions for maximum flexibility. Ground contacts positioned within each column of the connector, combined with unique contact lead frame arrangements, enable the Z-PACK TinMan connector to achieve low crosstalk and high through-put performance levels. Reliability is provided with a dual point of contact mating interface and compliant pin interface to the printed circuit board.

IMPACT BACKPLANE CONNECTOR SYSTEM

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Signal & Ground contact: Copper alloy
- Housing: Liquid crystal polymer, UL 94V-0
- Contact area plating: 30u" Gold min.
- Solder tail area plating:Tin or Tin/Lead
- PCB thickness: 1.60 mm (.062")
- Temperature range: 55°C to 85°C max.
- Current rating: 0.75 A per pin max.
- Durability: 200 cycles
- Operating voltage: 30 VAC RMS/DC max.
- Mating force: 0.30 N (9.066 lb) max. per pin
- Insulation resistance: 10,000 MΩ min.

The IMPACT backplane connector and cable system from TE pushes the speed and density envelope to meet the growing demands of next-generation telecommunication and data networking equipment; the system is available in 2-6 pair configurations with a complete range of guidance and power-solution options. The IMPACT system is available in two compliant pin design options on both daughter card and backplane connectors. The IMPACT system's mating interface provides in-line staggered, bifurcated contacts that provide 2 points of contact for the long-term reliability performance and built-in, ground-signal sequencing. This reduces the average mating force per connector to improve the mechanical mating performance of the system.

XCEDE® HIGH-PERFORMANCE BACKPLANE CONNECTOR SYSTEM

RoHS Compliant Available

FCI

- Contacts: Performance based plating copper alloy, tin on press-fit tails
- Performance level: Telcordia CO
- Housings: High temperature thermoplastic, UL 94-V0
- Wafer organizer: Stainless steel
- Mating force: 0.65 N maximum per contact
- Unmating force: 0.15 N minimum per contact
- Press-fit insertion force: 35.6 N maximum per tail
- Contact resistance: 10 mΩ max.
- Current rating: 1A Signal; 2A Wide ground; 6A Blade

FCI 's XCede® connector platform is designed for 25 Gb/s performance to provide the headroom to support future high-speed, serial data rate requirements demanded by next-generation equipment in data centers and service provider networks. The use of engineering polymers in a resonance-damping shield enables very low crosstalk across a wide frequency range. XCede connectors also address requirements for higher linear signal density at the interface of backplane and daughter card. Signal connectors can be configured with 2, 4 or 6 differential pairs per column, providing up to 82.4 differential pairs/inch, suiting architectures with multiple front or rear fabric slots and blade systems with cooling straight through the backplane. Complementary guidance and power modules are also included in the product range. A wafer organizer can be used to combine groups of right-angle signal, guidance and power modules as an integrated daughter-card connector.

AMP GUIDE/KEYING MODULES FOR ADVANCED TCA

RoHS Compliant Available

TE connectivity

Authorized Distributor

AdvancedTCA Guide Modules double as alignment guide and power contact and can be used in a wide variety of applications. For motherboard-to-daughterboard applications the vertical pin and right angle socket are used. For co-planer applications, the right angle guide pins are used with along with the right angle guide sockets. Both Vertical and right angle guide pins are available in short and long sizes to accommodate different connector configurations. Die cast zinc alloy with nickel finish.

FORTIS ZD NEXT-GEN BACKPLANE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Contacts: Gold plated copper alloy; Tin/lead on tails
- Housings: High temperature thermoplastic
- Shell shield: Copper alloy, Tin/lead plated
- Shell machined: Nickel plated 6061 Aluminum
- Durability: 500 mating cycles
- Operating temperature: -55°C to +125°C
- Contact engaging & separating force: 3 oz. typical
- 10 and 20 column modules
- 3-pair (9-row) and 2-pair (6-row) modules
- 6U configuration offers 300 differential pairs
- 6 row module enables 0.6" reduced form factor card pitch
- Modularity enables scalability for various card sizes

The Fortis Zd modular backplane connector system combines the highest performance mil/aero and commercial technologies into a user configurable platform. Built to be the most robust and highest performance backplane connector, it allows 12 Gb/s+ data rates. Extreme mechanical and electrical performance for the most demanding applications. A modular design allows for user configurability and modular evolution. The M55302 heritage Mini-Box separable interface provides 4 points of contact on all sides of the pin. Three shell varieties for application versatility, including plastic, shielded and a machined metal shell. 3-Pair and 2-Pair versions available to accommodate multiple slot pitches. Staggered daughtercard pin field supports 2 level maintenance Protected pin field on backplane for reliability and durability.

AMP Z-PACK 2MM HM PCB MOUNT CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Contact pitch is 1.5mm within a pair and 3.0mm pair within a column; column to column pitch is 2.5mm
- Card Pitch is less than 0.8 in. for 2 pair headers and 1.0 in. for 4 pair header

Z-PACK HM is a high speed, differential connector system. Feature a highly reliable dual beam contact system with fully encompassing grounds dedicated to each differential pair. The Z-PACK HM footprint is optimized for both routability and system performance with the use of 1.5mm x 2.5mm row column grid, 5 and 8 rows. Available in two versions.

PWRBLADE® CONNECTOR SYSTEM

UL CSA TÜV Rheinland

RoHS Compliant Available

FCI

- Housing: Glass-filled high temperature nylon; Color: Black
- Power Contacts: Gold plated Copper Alloy
- Signal Pins: Gold plated Phosphor-bronze
- Signal Contacts: Gold plated Copper Alloy
- Insulation Resistance: Power Contact: 10,000 Mohm; Signal Contact: 500 Mohm
- Withstanding Voltage: Power Contact: 2,500 VDC; Signal contact: 1,000 VDC
- Current Rating: 48A for single powered contact; de-rated to 30A for 10 powered contacts at 30°C temperature rise with zero airflow
- Current Rating: 60A for 10 contacts when tested to UL guidelines.

The PwrBlade® power distribution connector system from FCI includes power and signal contacts to provide power distribution and power control in a single connector. Options for either vertical or right-angle versions of PCB-mount headers and receptacles deliver support for coplanar, backplane or mezzanine connections. The connectors are ideal for robust power connections to embedded AC/DC power supplies or for board-to-board connections in servers, storage enclosures and communications equipment.

POWER CONNECTORS FOR ATCA™ APPLICATIONS

RoHS Compliant Available

3M

- ATCA™ Zone 1 power connector
- Backplane right angle header
- Daughtercard vertical socket
- Compliant to PICMG 3.0 R2.0 (AdvancedTCA™) specification
- High conductivity, precision formed contacts
- Precision formed compliant pin offers excellent retention to ensure a reliable connection

New 3M™ connectors for embedded standards (ATCA and Micro TCA) complement our 2mm Hard Metric, Compact PCI and UHM backplane connector product families, giving us a full portfolio of options for your high-speed, high-performance requirements. This addition includes MicroTCA signal and power connectors, ATCA power connectors, CompactPCI® power connectors, Hard Metric Power connectors, PC/104 connectors, and PC/104 Plus connectors.

VHDM H-SERIES BACKPLANE CONNECTORS

RoHS Compliant Available

molex

- Housing: Liquid Crystal Polymer, UL 94V-0
- Contact: Gold plated copper alloy, Tin on tails
- PCB Thickness: 1.60mm (.063") typical
- Operating Temperature: -55°C to +85°C

Designed for applications that require very high interconnect density and high-speed signal integrity. Enables an installed base to perform at 6.25 Gbps, enabling system upgrades without costly architecture redesigns. Fully backwards compatible with existing VHDM slots. The signal portion of the VHDM H-Series connector system consists of modules in increments of 10 columns or 25 columns in either 6 rows or 8 rows. Power contacts can handle 10.0A of current per blade, efficiently delivering up to 120.0A per 25.00mm (.984") of board edge with multiple mating levels for hot plug applications. Metal guide pins and key slots eliminate the possibility of plugging a daughter card into the wrong slot.

2300 SERIES PIN STRIP HEADERS

3M

Straight and right-angle headers are available in a one-row version with 40 contacts or two-row version with 80 contacts. End-to-end and side-by-side stackable strips can be broken to any length for prototyping. Solder standoffs make it easy to wash flux residue, reducing rework. 10μ″ gold and gold flash plating on phosphor bronze pins. Black, glass-filled polyester insulation material. 100μ″ tin-lead plating on solder tails. Solder tail length: 0.120″. Current rating: 1A.

804 AND 805 SERIES TRIPLE ROW INTERCONNECTS

RoHS Compliant Available

MILL-MAX®

Type **804** header and **805** receptacle interconnects are ideal for high pin count I/O and board-to-board applications. The triple row pin field allows for signal connections to be more densely packaged. Also, placing and soldering one connector rather than three SIP sockets or a single and double row combination increases assembly efficiency and improves positional accuracy. The **804** & **805** series connectors featuring high temperature thermoplastic insulators compatible with lead free soldering temperature requirements.

PC BOARD HEADERS & SOCKETS

SLIMSEAL LOW POWER SEALED LIGHTING CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Operating Current : 5 A (18-20 AWG) & 3.5 A (22-24 AWG)
- Maximum operating voltage : 250 VAC/VDC
- Dielectric withstanding voltage : 1500 VAC
- Operating temperature : -40°C to 105°C
- Seal rating : IP67
- Durability : 30 mating cycles
- Housings : UL94V-0 rated high temp thermoplastic
- Contacts : Receptacle: Tin plated Copper alloy; Tab : Tin plated Brass
- Integral Seals : Silicone Rubber
- UL 1977, CSA C22.2 No. 182.3
- Exposure : UL 746C F1 (suitable for outdoor use, wire-to-wire only)

The SlimSeal SSL connectors are low profile, single row connectors developed for indoor and outdoor LED lighting applications. These connectors provide low power, sealed solutions for free hanging, wire-to-wire interconnects and for robust, stable electrical and mechanical wire-to-board connections used in solid state lighting. Connectors are available in 2 through 4 contact positions. Cavities are marked with numbers to provide circuit identification. The housings are made of flame-retardant black thermoplastic, and the contacts are made of copper alloy.

IDC SOLID STATE LIGHTING (SSL) CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features

- Available in 1, 2, 3 and 4 positions
- SMT and thru-hole
- Closed end and feed thru
- 18-24 AWG stranded and solid wire
- Dual IDC slots for redundancy
- Wire placement "viewing" window
- Wire gauge color coded
- Tool-less termination

Applications

- LED lighting controls
- General illumination LED fixtures
- Connecting strings of pcb LED light modules
- Non-lighting wire-to-board applications

IDC SSL connectors are insulation displacement (IDC) SMT and thru-hole wire-to-board connectors designed for quick, tool-less termination of discrete wires onto LED printed circuit boards. These connectors use Tyco Electronics proven insulation displacement technology to provide a robust, stable electrical and mechanical power connection to single or multiple printed circuit boards in solid state lighting and non-lighting applications.

HERMAPHRODITIC BLADE AND RECEPTACLE BOARD-TO-BOARD CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features

- Available in 2, 4, and 6 positions
- Connector mates to itself
- Single part to be stocked and placed onto pcb per position
- Connector mates and unmates horizontally and vertically -3 axis mating
- Connector can be articulated from 90° to 180°
- Tape and reel packed for high speed SMT processes
- Low profile flat surface is compatible with SMT and reflow processing
- Rounded corners to minimize shadowing
- Redundant SMT pads
- Optional 2, 4 and 6 position dust cover available
- Solder pad footprint compatible with Tyco Electronics SMT Poke-In LED connector

The board-to-board Hermaphroditic Blade and Receptacle connector is a new SMT connector and is intended for use with in-line board-to-board applications.

2060 SERIES SURFACE MOUNT TERMINAL STRIPS W ITH PUSH-BUTTONS

RoHS Compliant Available

WAGO

1 pole | 2 poles | 3 poles | 2 poles - 8mm pad spacing

- Surface mount terminal strips with CAGE CLAMP®S connection and pushbuttons
- Direct push-in of solid conductors
- Pushbutton for connection of stranded conductors and for removal of all wire types
- Total height of only 4.5mm helps minimize shadowing in LED applications
- Large flat area for easy pick-n-place
- Wiring ports with balcony design - creates "lead-in" for ease of wiring, even at a slight angle

AMP BREAKAWAY HEADERS – UNSHROUDED

RoHS Compliant Available

TE connectivity

Authorized Distributor

Vertical

Right-Angle

- Full-stick headers break to any size needed
- Unshrouded vertical and right-angle versions available
- 40-positions single row and 80-positions double row configuration
- Copper alloy, drawn wire 0.025" (0.635) square posts
- Choice of 3 platings on contact area: 30µ" gold, 15µ" gold or tin-lead

RIGHT ANGLE MOUNT

All feature a flame-retardant, black thermoplastic housing, 94V-0 rated. All posts feature tin-lead on solder area with nickel underall. Post lengths include 0.230" (5.84) and 0.318" (8.08) for connector mating; 0.110" (2.79), 0.120" (3.05) and 0.125" (3.18) for PC board soldering 3.984" (0.156) long, pitch spacing: 0.100" (2.54 mm)

AMPMODU MOD II SHROUDED HEADERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 0.100" (2.54mm) Centers
- Vertical and right-angle versions available
- Single and double row configurations
- Insulation resistance: 5,000 megohms minimum initial
- Dielectric withstanding voltage: 750 RMS at sea level
- Operating temperature: -65°C to +105°C
- Current rating: 3 A

The AMPMODU interconnection system provides interconnections with a unique modular concept, utilizing precision formed receptacle contacts and mating posts. The 0.025 [0.64] square interconnection system is rated at 3 A per contact. Housings are black thermoplastic, flame retardant UL94V-0 rated. Contacts are copper alloy with tin, 15u" or 30u" gold on mating area. Headers avaialble with 0.066 [1.68] and 0.150 [3.81] end dimensions.

AMPMODU LEVEL V IDC CRIMP HOUSINGS AND COVERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Termination of Discrete Wire Sizes 26-22 AWG (0.12 - 0.3mm²)
- Termination of Jacketed Cable and Bonded Ribbon Cable (Conductors Separated)
- Stackable End-to-End and Side-to-Side on 0.125" (3.18) Centers
- Preloaded with Insulation Displacement Receptacle Contacts
- High Conductivity Copper Alloy Contacts are Duplex Plated
- Snap-on Hermaphroditic Cover

Fig. 1

Fig. 2

AMPMODU® Level V IDC connectors provide cost-effective discrete wire connections compatible with today's telecommunication packaging techniques. Designed to mate with 0.025 (0.64) square posts on 0.125 x 0.125 (3.18 x 3.18) centers. Comprised of double-row, black, thermoplastic housings preloaded with MT type insulation displacement receptacle contacts. These phosphor bronze contacts are nickel plated with 30μ" gold in mating area, tin-lead in termination area. For modular flexibility, connectors can be stacked end-to-end or side-to-side, maintaining a 0.125 x 0.125 (3.18 x 3.18) centerline spacing. Standard profile covers, *ordered separately below*, are constructed of black, flame-retardant thermoplastic. Cover simply snaps onto housing after the connector has been terminated. Current rating: 3A. Termination resistance: 12 milliohms (max.) UL recognized, CSA certified.

AMP ECONOMY POWER II (EP II) WIRE-TO-BOARD CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 3.96 mm (0.156") centerline
- Lance-less terminal
- Voltage up to 600 VAC
- Current up to 10 A
- Housing locking latch
- Polarization tabs
- Asymmetrical terminals can only be loaded one way
- Breakaway style Terminal Position Assurance (TPA)
- Probe tip windows for continuity testing
- 2-12 positions for discrete wires AWG 22-18

Economy Power II connectors offer two levels of mechanical and electrical reliability: A true locking latch prevents the plug housing and post header from vibrating apart, while a Terminal Position Assurance (TPA) device ensures a contact is fully seated within a housing and helps eliminate terminal back-out concerns. A visual aid confirms that the contact is home plus it provides easy access to a probe tip for continuity testing. Economy Power II connectors are used with 3.96mm (0.156) Economy Power straight headers *on page 759*

ECONOMY POWER (EP) 2.5MM PITCH WIRE-TO-BOARD CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features

- 2.5mm (0.098") Centerline Pitch
- 2-20 positions for discrete wires AWG 26-22
- Voltage up to 250 VAC
- Current up to 4.5 A
- Housing locking latch
- Polarization tabs
- Asymmetrical terminals can only be loaded one way
- Low insertion force terminals
- Anti-Fretting contact lubricant

Economy Power 2.5 (EP 2.5) is a new type of single-row crimp connector system. EP 2.5 is comprised of new plug housings, contacts, and headers, based on a 2.5 mm centerline (0.098" pitch), which makes it a very compact solution. The newly designed contact retainers provide Terminal Position Assurance (TPA). The inserted TPA retainers help prevent the contacts from backing out in applications with random vibration and help ensure full contact insertion within the housing.

AMP CST-100 CRIMP HOUSINGS, CONTACTS AND TOOLING

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Voltage rating: 250 V
- Current: 4 A maximum
- Wire range: 22-26 AWG
- Operating temperature -55°C to +105°C

Low-cost wire-to-board interconnections mate with MTA notched headers that are available; *go online or call*. White nylon housings, rated UL 94V-0, feature locking ramp and polarized tab. Accept phosphor bronze crimp contacts in choice of tin or 15μ″ gold plating; *order separately below*. Not interchangeable with CST-100 II contacts and housings. Mates with all MTA 0.100″ headers except MTA 0.100″ shrouded headers; *order separately on pages 758-759*.

Inverted Thru Board Card Edge **Inverted Poke-In Platform**

The Inverted Card Edge and Poke-In Platform Connectors provide 3.0 mm creep and clearance from all other conductive components on FR4 and metal clad printed circuit boards. The 2 position connectors share the same printed circuit board footprint while offering flexibility in providing either a direct power driver board one piece mating solution or a poke-in wire connection to the underside of the LED array boards. The ITB connectors are surface mounted at the same

9159 SERIES SOLID STATE LIGHTING CONNECTORS

RoHS Compliant Available

AVX INTERCONNECT A KYOCERA GROUP COMPANY

The **9159 series** of Board-to-Board interconnect system allows two PCB's to be mated end-to-end creating strips of LED lighting. Designed specifically for the unique Solid State Lighting (SSL) market requiring coplanar (horizontal-to-horizontal) PCB mating with a 5 Amp current rating in the smallest package available. The **horizontal plug and socket single sided SMT connectors** are perfect for both FR4 and metal boards where you need to butt the boards up together to minimize separation. With sizes from 2p-6p, these high reliability connectors boast gold plated beryllium copper receptacle contacts for harsh environments. The **cabled plug** was developed to bring power and signals onto the PCB's while keeping the same board level interface. This allows the designer to build a single PCB with a receptacle on one end and a plug on the other end to minimize cost and inventory. Regardless of where the PCB is used in the system, the cabled plug connector will then create the connection to the outside world. The optional latch can be inserted into the plug housing to assure positive attachment to the PCB in harsh environments without having to change the PCB connector. The **top loading socket** allows complete PCB's to be replaced in the field without having to dissemble the entire strip of boards. The connector has a two part insulator whereby the top of the connector will slide open allowing the plug connector to be pulled out either vertically or at a slight angle. Once the PCB is replaced, the cover is slid back like a Zero Insertion Force (ZIF) connector to the closed position. The PCB layout is identical to the standard horizontal socket to maintain family commonality at the PCB level.

9276 SERIES DISCRETE WIRE-TO-BOARD POKE-HOME CONNECTORS

RoHS Compliant Available

AVX INTERCONNECT A KYOCERA GROUP COMPANY

Applications
- Connecting discrete wire components directly to the PCB
- Bringing power and signals onto a PCB
- Daisy chaining PCB's together to create a continuous string of boards

Features
- Simple strip, insert and removal design
- SMT RoHS termination to the PCB with minimal footprint
- Accepts 18-24 AWG Solid and Stranded wires
- Expanded size offering to maximize application potential; 1, 2, 3, 4, 6 & 8 positions
- High spring force top contact provides a lance type retention to capture and retain the wire
- Insulator Material: Glass-Filled Nylon 46; UL94V0
- Contact Material: Tin plated Beryllium Copper / Phosphor bronze
- Replacibility: 5 Cycles
- Operating Temperature: -40°C to +125°C
- Current Rating: 6 A per contact
- Voltage Rating: 250 VAC

The new 9276 series connector provides a quick and reliable wire-to-board termination in a sleek 2.5mm pitch SMT package for a broad range of industrial and commercial markets. The 9276 series connectors are terinated by simply stripping the wire and inserting them into the connector making it termination friendly within the factory as well as in the field. Developed for harsh industrial and Solid State Lighting (SSL) applications, the connector was designed with a high spring force Beryllium Copper upper spring contact to accept 18-24 AWG solid or stranded wire to meet multiple applications with a single connector. The dual-contact design enables a maximize current rating of 6 Amps with minimal PCB spaceand provides two solder points for each wire eliminating the need for external anchor tabs. A small insertion/extraction tool allows the wires to easily be replaced up to 5 times.

9159 SERIES ONE PIECE CARD EDGE CONNECTORS

RoHS Compliant Available

AVX INTERCONNECT A KYOCERA GROUP COMPANY

The **9159 series** of Board-to-Board interconnect system allows two PCB's to be mated end-to-end creating strips of LED lighting. Designed specifically for the unique Solid State Lighting (SSL) market requiring coplanar (horizontal-to-horizontal) PCB mating. The 1-Piece Card Edge connector was developed to provide a reliable, low cost and simple means of connecting multiple PCB's together. The single stamped contact has dual contact beams to guarantee a high contact force on standard 1.6mm PCB's. These connectors are available in 2 through 5 positions and are on 2.0mm pitch centers to provide a 3 amp continuous rating.

9176-400 AND 9176-500 SERIES DISRETE WIRE IDC CONTACTS AND CAPS

AVX INTERCONNECT A KYOCERA GROUP COMPANY

RoHS Compliant Available

Applications
- Connecting discrete wire components directly to the PCB
- Bringing power and signals onto a PCB
- Daisy chaining PCB's together to create a continuous string of boards

Features
- IDC contact provides a gas-tight connection to the PCB for long term reliability
- Tested to automotive levels on shock, vibration and temperature cycling for reliability
- Reduced total applied cost versus solder or crimp processes
- Individual contacts can be located anywhere on the PCB based on specific application
- Wires can be removed and replace up to three times.
- Optional cap provides a positive strain relief even in the harshest conditions.

The new single contact 9176-400 and 9176-500 series of surface mount IDC connectors were developed for connecting individual wires directly to a PCB ranging from 18-24 AWG. This industry proven contact system has been tested to automotive levels of shock, vibration, and temperature cycling to prove their reliability and robustness. The simplicity of inserting a wire into an SMT contact with a small tool or optional retention/termination cap allows connection to a PCB without soldering. In SSL applications specifically, these contacts are used to bring power and signal onto the PCB or to daisy chain multiple boards together.

9176-400 SERIES DISCRETE WIRE IDC CONTACTS
The single 9176-400 series contact and cap accepts 22-24 AWG wires with an insulation diameter ranging from 1.0-1.5mm. These dual beam contacts support a 6A current rating with a large SMT solder base to provide maximum stability on the PCB.

Mfg. Part No.	Wire Size (AWG)	Current Rating (A)	Stock No.	Price Each 1-9

709176001432006	24AWG	6	25T0910	0.65

9176-500 SERIES DISCRETE WIRE IDC CONTACTS
The single 9176-500 series contact and cap accepts 18-24 AWG wires with an insulation diameter ranging from 1.1-2.1mm. These dual beam contacts support a 10A current rating with a large SMT solder base to provide maximum stability on the PCB.

9159 SERIES BOARD-TO-BOARD OPEN-ENDED CARD EDGE CONNECTORS

RoHS Compliant Available

AVX INTERCONNECT A KYOCERA GROUP COMPANY

9159 Series Open Ended Card Edge — 9159 Series Coplanar BTB Contact System

Features
- Miniaturized size, achieves 1mm in length for each number of contacts (4p = 4mm)
- Double ended/double sided contacts for increased pin count density on standard 1.6mm thick PCB
- Economical high force tin-to-tin contact interface
- Central support polarizing/location rib provides proper mating and PCB location
- High current capabilities: 3A 4p/6p and 2.5A 8p/10p
- Voltage Rating: 300 VAC
- Durability: 5 cycles
- Operating temperature range: -40°C to +125°C

9159 series open-ended card edge connectors provide the highest density to reliably connect two in-line PCB's together in a cost-effective assembled solution. The increased pin count allows for more flexibility in mixing and matching power and signal lines. The double sided configuration (separate contacts for both the top and bottom of the PCB) doubles the pin count in a 2mm pitch. Features a white Nylon 46 insulator, rated UL94V-0 and phosphor bronze contacts plated tin over nickel. Ideal for linear LED strip lighting and commercial/industrial co-planar or extended card applications.

9159 SERIES BOARD-TO-BOARD OPEN-ENDED CARD EDGE CONNECTORS (CONT.)

9159 SERIES COPLANAR BOARD-TO-BOARD CONTACT SYSTEM
9159 series gold-plated horizontal coplanar board-to-board contact system maximizes lateral PCB alignment and mating tolerances with a proven 2-pc connector solution. Contact height has been minimized to 1.2mm above the PCB to prevent any shadowing effect. No insulator allows contacts to be individually spaced to support any voltage rating with a full 5A current rating. The PCB can be designed with the LED's in the center of the PCB and the contacts on the outer edges. This optimizes the design for functionality and assembly at the best cost possible. Individual contacts can support board-to-board and wire-to-board applications. Copper alloy contacts feature a nickel undercoat — pin contact is plated gold in mating area and tin on tails and socket contact is plated gold over all.

9296 SERIES SINGLE POKE HOME WIRE-TO-BOARD CONTACTS

RoHS Compliant Available

AVX INTERCONNECT A KYOCERA GROUP COMPANY

NEW

9296 series dual-beam box contact surface mounts to a PCB and provides a simple and reliable wire termination without soldering of the wire. The unique contact design integrates several key features within the stamping to facilitate SMT pickup, wire guidance, high force retention and easy wire removal. Combined, these features provide all of the benefits of a full function connector, without the added cost of the insulator and labor. Constructed of copper alloy with tin over nickel plating. Staged current rating is based on wire gauge: 12AWG is 20A, 14AWG is 16A, 16AWG is 14A, 18AWG is 12A and 20AWG is 10A. Voltage rating is based on placement distance. Durability: 5 cycles. Operating temperature range: -40°C to +125°C. **Mfg. part no. 06-9296-7001-01-000** contact opening tool to insert/withdraw wire is ordered separately; *go online or call.*

9176 SERIES WIRE TO BOARD STRIP IDC CONNECTORS

RoHS Compliant Available

AVX INTERCONNECT A KYOCERA GROUP COMPANY

Applications
- PCB to PCB individual wire interconnect
- Device to PCB interconnect (LED Modules and LED Strips)

Features
- Small single row IDC
- Rated at 10 amps
- Insulators are end to end stackable for higher pin counts
- Uses simple hand tool for higher volume applications

The 9176 series from AVX offers customers the ability of connecting individual wires to a single row of contacts using IDC technology. Available as a 2 or 3 pin connector it is both low profile and has a small PCB footprint. The connector is SMT assembled to the PCB prior to assembly of the wire. Using a small application tool, the wires are then inserted into the contact slot. This process cuts the insulation and enables the individual conductors of the wire to form a homogeneous joint. The shape of the molding also forms a restraint to the wire when fully inserted in the contact. These connectors are supplied in tape and reel for easy pick and place. The wire options are 18 to 24 AWG stranded wire.

9177-600 SERIES IDC CONTACTS AND CAPS

RoHS Compliant Available

AVX INTERCONNECT
A KYOCERA GROUP COMPANY

Features

- IDC contact provides a "gas tight" wire termination to the PCB to meet harsh industrial environments
- Simple, robust design offers a high performance solution to hand soldering large gauge wires to a PCB
- single contact can handle up to 15A for high current applications with wire replacement up to 3 times
- Accepts 12-18 AWG of stranded wire and can be tested for compliance with solid wire

Applications

- Industrial pumps, motors and driver boards
- Solar and alternative energy products
- Commercial electrical equipment

9177-600 series IDC contact and cap were developed for Plated Through Hole (PTH) termination to the PCB.This addresses the rugged power type boards that have to handle larger wire gauges up to 12 AWG and 15A per contact of current. The PTH option provides robust PCB attachment and high current capabilities to replace older technology connectors or in most cases soldering stripped wires directly to the PCB. Features a phosphor bronze tin over nickel plated contact. White Nylon 46 insulator, rated UL94 V-0. Current rating: 15A, voltage rating: 600VAC. Operating temperature range: -40°C to +125°C.

RIB-CAGE™ 1.27mm (0.050″) HIGH DENSITY BOARD-TO-BOARD CONNECTOR SYSTEM

RoHS Compliant Available

FCI

- Housings: Glass-filled thermoplastic, UL94V-0, Color: Black
- Temperature Range: -55°C to +130°C
- Contacts: PCB Receptacles: Beryllium Copper; Pin Headers: Phosphor Bronze
- Contact Plating: 30u″Gold/GXT in Contact area; 100u (2.54um) Tin on tails
- Contact Resistance (LLCR): 20 mohm max initial; 25 mohm max after environmental test
- Current Rating: 1.0 amp DC per contact with all contacts energized (30 deg C Temp. Rise)
- Insulation Resistance: 50,000 Mohm min initial
- Withstanding Voltage: 800 VAC, RMS at 60 Hz
- Contact Durability: 200 mating cycles

Rib-Cage™ connectors optimize reliability in demanding applications. Rib-Cage™ is a versatile family of two-piece, two-row pin-and-socket connectors for right angle and mezzanine connections between printed circuit boards (PCB) or flexible printed circuits (FPC). Exclusive Rib-Cage™ multi-point, gold plated receptacle contacts provide optimal reliability in high vibration and shock-prone applications. High density 1.27mm (0.050″) double row contact grid occupies only 20% of the volume of comparable 2.54mm 0.100″ pitch systems. 6.42mm PCB stack height offers flexibility for mezzanine connection designs. Polarization prevents mis-mating.

MINITEK™ 2.00mm (0.079″) SMT RIGHT ANGLE UNSHROUDED HEADERS

RoHS Compliant Available

FCI

- Housing: High-temperature thermoplastic, Black
- Flammability rating: UL 94 V-0
- Pin: copper alloy
- Current rating: 2 A, 80°C ambient
- Contact resistance: 20 mΩ Max.
- Dielectric withstanding voltage: 650 V
- Voltage rating: 200 V
- Mating cycles (durability): 100
- Operating Temperature Range: -55°C to +125°C

Minitek™ Horizontal SMT Headers enable perpendicular printed circuit board connections on a 2 mm grid using surface mount technology. In a typical application the horizontal SMT header is soldered at the edge of the PCB and mates with any of various different types of receptacles. The components in the Minitek™ system including the SMT horizontal headers are fully intermateable.

MINI-JUMP™ SHUNT JUMPER SYSTEMS

RoHS Compliant Available

- Standard 2-Position for 0.100″ (2.54) Centers
- Mate with 0.025″(0.635) Square and Round Pins
- Contact Resistance: 15 Megohms
- Current Rating: 2.5A Max. Per Contact
- 65474 Series feature Blue Housings; 68786 and 71363 Series feature Black Housings
- UL Recognized, CSA Certified

Economical, stackable jumper systems are applicable for bussing, programming and switch replacement. Low-profile shunts stand 0.200″(5.08) above PC board; high-body shunts stand 0.360″ (9.15) above PC board. Dual-beam, phosphor-bronze contacts.

DUBOX™ 2.54mm (0.100″) LOW-PROFILE PCB VERTICAL RECEPTACLES

RoHS Compliant Available

- The Dubox™ contact has a pre-stressed, dual beam design to enable low insertion force
- 4-wall contact design for signal protection
- Current Rating: 3A DC Max. Per Indivdual Contact
- Insulation Resistance: 1000MΩ Min.
- Contact Resistance: 15mΩ Max. Initial, 20mΩ Max. After Environmental Tests
- Dielectric Withstanding Voltage: 1000V
- Housing: Glass filled thermoplastic
- Flammability rating: UL 94 V-0
- Mating cycles (durability): 200
- Operating Temperatures: -65°C to +125°C
- UL Recognized, CSA Certified

Vertical receptacles feature phosphor bronze contacts plated with 30μ″ gold in contact area and 100μ″ tin/lead on tails. High-temperature, thermoplastic housing. *For full dimensional information go online or call*

IP68 RATED 2.5MM PITCH HOTSHOE CONNECTORS

RoHS Compliant Available

HARWIN

- Environmental sealed to IP68 at 1.5m for 2 hours
- Available PC tail and solder cup tail suitable for 26AWG cable
- Gold-plated brass contacts
- Current rating: 1A per contact
- Voltage rating: 240VDC
- Durability: 10000 cycles
- Temperature range: -40°C to +100°C
- Recommended panel/ bulkhead thickness: 1.5mm

Plug

Receptacle

HotShoe IP 68 rated 2.5mm pitch connectors are constructed using spring-loaded contacts, maintaining a positive force against the mating connector. Low mating force enables rapid and effortless connection. Rugged and robust, made from highly-durable mold materials and designed to withstand a high level of dust, water and chemical agent ingress to IP 68. Ideal for use in portable equipment where separate battery modules are used and for data transfer docking stations.

- Glass-Filled Thermoplastic Housing, Rated UL94V-0
- Polarized Molding, Fully Shrouded Contacts
- Female Crimp 4-Finger Brass Shell Contacts
- Male Phosphorous Bronze Contacts
- Plating: Gold Contact Area, Tin/Lead Tails
- Operating Temperature: -55°C to +125°C

Fig. 2

High-reliability miniature connectors in vertical configurations. Jackscrews provide secure mating. Suitable for wire-to-board and board-to-board applications. 36 and 51 position connector available, *go online or call.*

2.00MM (0.079″) DUAL ROW DATAMATE L-TEK CONNECTORS (CONT.)

- Glass-filled thermoplastic housings, rated UL94V-0
- Polarized moldings
- Durability: 500 operations
- Female crimp 4-finger brass shell contacts
- Male crimp phosphor bronze contacts
- Plating: gold contact area, tin/lead tails
- Current: 3.3A per contact
- Operating temperature: -55°C to +125°C
- Ideal for COTS applications, proven history in Mil/Aero applications

Fig. 5 - Female PCB Mount

High-reliability miniature connectors in vertical or horizontal configurations. Suitable for board-to-board, board-to-wire and wire-to-wire applications. Choice of locking latch, unlatched or friction latch housing. *Order replacement contacts separately below; strain relief straps and tooling separately on page 775.*

molex

EXTreme LPHPower™ 45984, 45985, 46114

EXTreme PowerMass™ 75561-5000

EXTreme PowerMass™ 75545-5000

EXTreme MicroPower™ 75730-0210

EXTreme ZPower™ 76001-0010

EXTreme Power® family of high-current power interconnect products is comprised of several offerings that cover a wide range of current densities, mating terminations, and configuration choices that give system designers the ability to maximize power without wasting board space.

EXTREME LPHPOWER™ LOW-PROFILE HYBRID POWER CONNECTORS

EXTreme LPHPower™ is a mixed, high-current power and signal connector system designed with power blades parallel to the PC board. Its extremely low-profile 7.50mm (.295″) height enhances system airflow and provides up to 127A per linear inch of board space. Two isolated power blades per housing bay and can be mated in a right-angle, co-planar or vertical orientation. Mates in a traditional two-piece connector system, or as a one-piece receptacle-to-card edge / bus-bar application. Black thermoplastic housing, flammability rated UL94V-0. Copper alloy power contacts and phosphor bronze signal contacts both plated with select gold in contact area, tin on solder tail with nickel under all. Voltage rating: 250V max. Current rating (at 30°C temp. rise): 30A Power/1A Signal max.

EXTREME POWERMASS™ HIGH-CURRENT CONNECTORS

EXTreme PowerMass™ high-current, custom-configurable, board-to-board, modular connector system delivers up to 380A per inch of board space. Press-fit or solder-board termination for easy, reliable board mounting. Durable aligner guides provide blind-mating capabilities. Designed to support power supplies and systems requiring very high-current transfer in challenging and thermal-constrained spaces. LCP housing, flammability rated UL94V-0. Copper alloy contacts, plated with 30µ″ gold in contact area, 150µ″ tin on solder tail and 50µ″ nickel under all.

Mfg. Part No.	Description	No. of Circuits	Mount Type	Rating Amps/ Volts	Stock No.	Price Each 1-9

*40A per circuit (2 circuits)

EXTREME MICROPOWER™ 4MM (0.157″) PITCH HIGH-CURRENT HEADERS

EXTreme MicroPower™ high-current, right-angle headers can be used in VRM / DC-DC converters or any board-to-board application where power transfer is needed through a non-separable interface in a compact design. Offers high-current density, rated at 16A per blade at 30°C T-rise. Low profile design of 4.17mm (0.164″) off the PCB enhances system airflow. Black, LCP housing, flammability rated UL94V-0. Single inline row of direct solder copper alloy blades, plated with 100µ″ select matte tin over 50µ″ nickel. Voltage: 250V max.

Mfg. Part No.	Description	No. of Circuits	Mount Type	Stock No.	Price Each 1-9
● 75730-0207	Right-Angle Header	7	Solder	56R8942	2.78

● 75730-0216	Right-Angle Header	16	Solder	56R8948	5.63

EXTREME ZPOWER™ HIGH-CURRENT CONNECTORS

EXTreme ZPower™ high-current, one-piece ridged board-to-board connectors anchor to the base board with press-fit power pins and screw securely down from the top. Screw-contact interface accepts standard wire-crimp, ring-lug terminals for wire-to-board applications. These 30A and 50A headers not only transfer power between boards, but can double as an effective stand-off. Used in a variety of applications and industries where power connection between parallel boards or bus bars is necessary in a condensed space. Black LCP housing, flammability rated UL94V-0. Copper alloy pins are plated with 30µ″ gold in contact area, 100µ″ matte tin on solder tail and 50µ″ nickel under all. Press-fit PCB thickness: 0.093″ min. Voltage rating: 250V.

EXTreme GUARDIAN™ POWER CONNECTOR SYSTEM

RoHS Compliant Available

molex

FEATURES AND BENEFITS

- High-current density per inch supports up to 80.0A per blade
- Redundant contact design handles up to 600V and supports AC or DC high-voltage applications
- Small centerline spacing of 11mm reduces PCB footprint
- Recessed terminals, First-Mate-Last-Break (FMLB) allow hot-swapping of power units and reduce network downtime
- Gold or tin contact plating provides flexibility to suit customer applications
- Gold plating provides low interface resistance
- UL and CSA certifications meet all accredited agency safety requirement and approvals

EXTreme Guardian™ header and cable assemblies, previously named EXTreme Power™ Interconnect (EPIC), features small package sizes with a centerline pitch of 11.00mm. The system supports up to 80.0A per contact, provides good shielding characteristics in EMI-sensitive environments, features hot-plugging capabilities and UL safety features. These header and cable assemblies exceed high-current and reliability demands in top-end server and high-power applications. ***Power harness connector (46818) and crimp receptacle housing (170351) require high power terminals (46819)**

UL

- Voltage: 50 V
- Current: 1.0 A max.
- Contact: Tin plated Phosphor Bronze
- Wire Size: 28 to 32 AWG
- Insulation Diameter: 0.08mm (0.031″) max.
- Wire Strip Length: 1.00 to 1.30 mm (0.039 to 0.051″)
- Operating Temperature: -40° to +85° C

The new 1.00mm (.039″) pitch wire-to-board connector system from Molex was developed for various connections in Flat Panel Displays (FPD). The compact, small-circuit size features of this system also make it ideal for other applications such as Notebook PCs and other compact devices. The system is offered in both single and dual row versions. Friction and positive locks are offered for various application needs. Other features include mating guides, solder tabs and footprint compatibility with some competitive versions. Crimp terminals feature box-shaped design that provides 2 points of contact for secure electrical connection. Use with **501330 series** housings.

- Voltage: 125V
- Current: 1.0A (32AWG-0.8A)
- Contact Resistance: 20mΩ Max. Dielectric
- Withstanding Voltage: 250VAC, 1 Min.
- Insulation Resistance: 100mΩ Min.
- Insulation Diameter: 1.00 mm
- Housing: 9/6 Nylon, Rated UL94V-0
- Contact: Tin-Plated Phosphor Bronze
- Operating Temperature: -40°C to +85°C

These wire-to-board housings and headers are the smallest in the industry. They provide flexibility to organize a system to suit all requirements. PC board real estate saved for 10 circuits is 50% over 2.0mm pitch versions. The volume saved is 66%. **51021 series** receptacles mate with **53398, 53261, 53047, 53048 series** headers. New hand crimp tool terminates from a strip; enables building prototypes with ease. Female crimp terminals used with **51021 series** receptacles, constructed of tin-plated phosphor bronze; **sold in packages of 100**.

- Header Contacts: Tin plated copper alloy
- Crimp Terminals: Tin plated phosphor bronze
- Contact Resistance: 20mΩ max.min. (minimum)
- Voltage Rating: 125 VAC/VDC
- Current Rating: 1 A (0.8 A -32 AWG)
- Dielectric Withstand Voltage: 500 VAC/minute
- Crimping housing is polarized to prevent mis-mating with PCB header
- Crimping housing is equipped with friction locks to secure PCB header
- PCB header material (resin) meets halogen free requirement
- Housing meets EU Industry Safety Standard
- UL approved

FCI's 1.25mm pitch wire-to-board connector series consists of terminals, crimp housings and PCB headers in straight and right angle, surface mount and through mount configurations. It is a single row design, available with from 2 to 20 circuits. Unlike many other products for the same applications, FCI's 1.25mm wire-to-board range conforms to the EU Industry Safety Standard, PCB header material meets halogen free requirements and the products can be operated in the temperature range from -40°C to +105°C.

2.00mm (0.079″) DURACLIK WIRE-TO-BOARD SYSTEM SINGLE ROW, POSITIVE LOCK

RoHS Compliant Available

molex

- Current: 3A
- Voltage: 250V
- Contact Resistance: 20 milliohms max.
- Operating Temperature: -40 to +105°C

DuraClik is a new 2.00mm Wire-to-Board connector system for the Automotive market that provides high tolerance to vibration. These connector feature an inner positive lock that provides space saving and prevents lock breakage or half-way locking. Availabe in 2-8 circuits. They include wide solder tabs for secure PCB retention, and polarization features to prevent mis-mating.

SHERLOCK 2.00mm (0.079″) PITCH WIRE-TO-BOARD HOUSINGS AND HEADERS

RoHS Compliant Available

molex

- Voltage: 125 V
- Current: 2.0 A
- Contact Resistance: 20 mΩ max.
- Dielectric Withstanding Voltage: 500 V
- Insulation Resistance: 1000 MΩ min.

Compact low-profile design for space savings. Polarizing end walls prevent mismating. Five color choices for circuit identification. **35507 series** positive lock latch provides secure mating retention. Housing lance ensures good terminal retention. Mates with **35362** and **35363 series** headers. **35362** and **35363 series** positive locking ribs provide secure mating retention. Four-wall shroud with guide plate protects pins and facilitates mating. Contacts: tin/lead plated. **Type 502-12-8100** contacts available; *go online or call.*

RoHS Compliant Available

molex

Series 50351

Series 51103

Series 53375

Series 53426

- Voltage: 250 V
- Current: 3.0 A
- Wire Range: 22-28 AWG
- Contact Resistance: 20 mΩ max.
- Dielectric Withstanding Voltage: 1000 VAC/1 min.
- Insulation Resistance: 1000 MΩ min.

50351 series has four points of contact. Housing lance provides secure terminal retention. **51103 series** housing mates with **53375** and **53426 series** headers, use with **50351 series** crimp terminals. **53375** and **53426 series** headers contacts tin-plated. Locking ribs and holes accept either positive or friction-locking housings. Shrouded design protects and facilitates mating. Kinked PC tails provide secure PCB retention.

3.70mm (0.146") FLEXI-MATE BOARD-TO-BOARD AND WIRE-TO-BOARD CONNECTOR SYSTEM

RoHS Compliant Available

molex

Features

- Board-to-board, wire-to-board and terminator options
- Positive side latches on crimp housing
- Dual-contact wire-to-board and board-to-board terminal design
- Mating guide features on PCB connectors
- Shrouded contacts

Benefits

- Meets needs of LED TVs and lighting equipment that use interconnecting LED panels
- Space savings and easy mating/unmating
- Ensures reliable electrical contact
- Help facilitate mating and provide smooth insertion
- Protects contact area

Designed to meet the backlighting needs of LED TVs and room lighting applications, Molex's new Flexi-Mate family of connectors is the first of its kind on the market to provide a full range of both board-to-board and wire-to-board solutions. Molex's Flexi-Mate system includes board-to-board connectors that are used to snap together small panels containing LED lights and a wire-to-board option to connect the LED boards to the main power board. A terminating connector is also available that is used as a type of shorting device to complete an open-loop signal. The 3.00mm (.118") mated height meets the needs of TV and room lighting units that continue to strive for thinner designs. Other key features include a dual-contact terminal design for secure electrical contact, space-saving positive side locks for wire-to-board connections, and guide features that help facilitate mating and protect terminals during mating and unmating.

KK® SYSTEM 0.100″ (2.54) CENTER BREAKAWAY HEADERS

RoHS Compliant Available

molex

- Phosphor Bronze 0.025″ Square Pins
- Pins are Tin-Plated in Solder Area
- Voltage: 250 V
- Current: 4 A
- Contact Resistance: 20 mΩ Max.

Surface mount compatible, single row stick headers are available in straight and right-angle configurations. Dielectric withstanding voltage: 1500V. Insulation resistance: 50,000MΩ min. Temperature range: 0° to +75°C. Mate with **2695 series** KK® series crimp terminal housings; *ordered separately on pages 782-783*. UL recognized, CSA certified.

molex

TÜV Rheinland

- Patented new integral Terminal Position Assurance (TPA) on mated male and female terminal virtually eliminates terminal backout
- Polarized housing provides proper mating
- Terminals are fully isolated in housing
- Positive latch reduces accidental disengagement from receptacle

Fig. 1 Plug Housing

Fig. 2 Receptacle Housing

- 44441 Series mates with 43680 Series Plugs or 43160 Series headers

Voltage: 600V. Current: 18A. Insulation resistance: 1000 mOhms min. Housing: nylon, UL94V-0. Operating temperature: -40°C to +75°C. **44441 series** for use with **type 43375** terminal order separately; *go online or call.* **43680 series** plug housings for use with **type 43178** terminals order separately; *go online or call.* UL recognized, CSA certified.

Specifications:
- Current Rating: 1.0A AC/DC
- Voltage Rating: 50V AC/DC
- Contact Resistance: 20m ohm. max.
- Insulation Resistance: 500M ohm. Min. At 100V DC.
- Withstanding Voltage: 500V AC for one minute
- Operating Temperature Range: -25°C to +125°C
- Insulator: PBT (UL94V-0)
- Contacts: Gold plated Copper Alloy

Applications:
- Home Appliances
- Aviation Electronics
- Automobile Electronics
- Computer(PC) Peripherals

0.80mm (0.032″) CLE SERIES PC BOARD RECEPTACLES

c UL us

RoHS Compliant Available

samtec

Features:
- Tiger beam contact
- Ideal for pass-through applications
- Surface mount
- Mates with: **FTE** and **AW series**

Specifications:
- Current Rating: 0.75 A
- Pitch Spacing: 0.80 mm
- Insulator Material: Black liquid crystal polymer
- Contact: Gold plated Beryllium Copper
- Temperature Range: -55°C to +125°C
- Contact Resistance: 15mΩ max
- Insertion Force: 2.0oz (0.56N)
- Withdrawal Force: 1.2oz (0.33N)
- Max Cycles: 100 with 10μ″ Gold

2.54mm (0.100″) CES AND SLW SERIES LOW PROFILE RECEPTACLES

c UL us

RoHS Compliant Available

samtec

Single Row

Dual Row

Features:
- Low profile
- Chamfered closed entry (**CES series**)
- Dual leaf folded, closed bottom contact (**CES series**)
- Tiger Buy contacts (**SLW series**)
- **CES series** mates with: **TLW, TSW, MTLW, MTSW, EW, ZW** and **DW series**
- **SLW series** mates with: **TLW, TSW, MTLW, MTSW, EW** and **ZW series**

Specifications:
- Current Rating: **CES series** : 1A; **SLW series** : 3A
- Insulator Material: Black G.F. polyester
- Contacts: Tin (-T) or Gold (-G) plated Phosphor bronze
- Temperature Range: -55°C to +125°C with Gold; -55°C to +105°C with Tin
- Contact Resistance: 10mΩ max

2.54mm (0.100″) SL AND SDL SERIES LOW PROFILE SOCKET STRIPS

RoHS Compliant Available

samtec

Single Row

Dual Row

Specifications:
- Current Rating: 1A
- Pitch Spacing: 2.54mm
- Insulator Material: Black glass filled polyester
- Contact/Shell Materials: Beryllium Copper/Brass
- Plating: 30u″ Gold on contact area, tin shell
- Operating Temperature: -55°C to +125°C
- Contact Resistance: 10mΩ max
- Insertion Force: 9oz (2.50N)
- Withdrawal Force: 2.5oz (0.70N)

Features:
- Achieve low profile without sacrificing insertion depth
- Choice of four precision screw machined lead styles
- Exceptionally low profile down to 2.11mm (0.083″) off of board
- Mate with BBL or BDL for board stacking spaces down to 3.89mm (0.153″)
- Mates with: **TS, TD, HTS, BBS, BBD, BBL, BDL, BHS series**

2.54mm (0.100″) TSW SERIES 0.025″ SQUARE HEADERS

c UL us

RoHS Compliant Available

samtec

Features:
- Mates with: **SSW, SSQ, ESW, ESQ, BCS, BSW, IDSD, IDSS, CES, SLW series**

Specifications:
- Current Rating: 7A
- Insulator Material: Black glass filled polyester
- Contact: Gold plated Phosphor bronze
- Operating Temperature: -55°C to +125°
- Voltage Rating: 550VAC
- -G-: 0.25µm gold on contact area, gold flash on balance
- -L-: 0.25µm gold on contact area, matte tin on tail

BG302

BG303

BG304

BG305

BG306

Specifications:
- Current rating: 3 A
- Contact resistance: 20mΩ Max.
- Insulation resistance: 1000 MΩ Min.
- Dielectric withstanding voltage: 500 VAC
- Operating temperature: -40°C to 105°C
- Contact material: Copper alloy
- Standard insulator material: Polyester LCP, UL94-V0

White Lite connectors are a new range of connectors for SSL LED strip applications. These connectors are available in 2.54mm pitch in both surface mount and through hole. White Lite connectors offer both traditional mating pairs (perfectly aligning centre lines of horizontal mating PCB's) as well as economical one piece U-Shaped connectors (which can be soldered direct to a PCB or plugged into vertical PCB sockets). LCP insulators are natural colored to reduce light absorption not only providing better aesthetics but also a resistance to high process temperatures.

AVX INTERCONNECT
A KYOCERA GROUP COMPANY

Fig. 1

Fig. 2

Fig. 3

- Contact Material: Phosphor bronze
- Insulator Material: Heat resistance plastic
- Operating Temperature Range: -40 to +85°C for Series 6212, 6214, 6222, 6223, 6240, 6244, 6269, 6274; -20 to +85°C for Series 6238, 6239, 6298

Series 6212 is a top contact low profile ZIF with a total height of 2.0mm. Series 6212, 6214 and 6274 offer a Slide locking system. Total height is 4.1mm for Series 6214 and 4.4mm for Series 6274. Series 6222 and 6223 are low profile LIF connectors. Series 6222 is bottom contact and Series 6223 is top contact, both have a total height of 1.95mm. Series 6238 offers a Flip-top style locking which opens to a maximum of 135 degrees with a height of 1.1mm. Series 6238 also offers a positive "click" when operating the actuator and is equipped with strain relief metal and FPC guide function to stabilize the position of the FPC. Series 6239 and 6269 are 1.5mm in height and available in 5-30 positions. Series 6240 are 2.0mm in height and available in 6-54 positions. Series 6298 is ultra low profile and offers bottom contacts with a Flip-top style lock and a notch to ensure correct locating into the connector. Series 6298 is specially designed for LCD (Liquid Crystal Display) modules with back-light requirements.

MINI-PV™ 2.54mm (0.100″) CRIMP-TO-WIRE CONTACTS

RoHS Compliant Available

FCI

For use with Mini-Latch housings, *order separately on page 813*. Mate with 0.025″ square pins. Available in tin/lead or a variety of gold platings. Current rating: 3A continuous. UL recognized, CSA certified.

CLINCHER™ FLAT FLEX MALE AND FEMALE CONNECTORS

RoHS Compliant Available

FCI

Male Female

For use with thin film conductive ink circuits whose total combined thickness of conductor and insulation does not exceed 0.006″ (0.152). Simultaneously terminate flat conductor, flat cable or flexible circuitry without cable stripping. Mate with 0.025″ (0.635) square or round pins on 0.100″ (2.54) centers. Dual-metal PV™ contacts provide excellent electrical and mechanical performance. Clinching portion of contact forms gastight crimp to prevent contamination. Cupro-nickel contacts plated with 100μ″ tin/lead finish. Available with 30μ″ gold plating; *go online or call*. Current rating: 2A. Resistance: 15mΩ maximum. Maximum insertion force: 3N per contact. Minimum withdrawal force: 0.30N per contact. Blue polypropylene body, rated UL94V-0. Insulation resistance: 5x10⁴MΩ minimum. Temperature range: −65°C to +105°C. Withstanding voltage: >500Vrms at sea level. UL recognized, CSA certified. **NOTE:** To order parts for conductive ink circuits less than 0.00″ (0.15) total thickness, change first digit after dash in mfg. part no. from **"0"** to **"1"**; for example: **65801-039** would be changed to **65801-139**. Male Clincher™ connectors are available with up to 32 positions; *go online or call*.

XF3C SERIES 0.25mm PITCH FPC CONNECTORS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Wide molding wall on the rear bottom of the connector allows greater freedom in board design
- Rated current: 0.2A AC/DC
- Rated voltage: 50V AC/DC
- Withstanding voltage: 250 VAC for 1 minute
- Ambient operating temperature: -30°C to 85°C
- Dual contact, single sided FPC with an applicable thickness of 0.12 mm

F4S SERIES 0.4mm NARROW-PITCH, THIN AND SLIM CONNECTOR FOR BOARD-TO-FPC CONNECTION

RoHS Compliant Available

Panasonic

Socket

Header

- Space-saving (3.6 mm widthwise)
- The small size contributes to the miniaturization of target equipment.
- Highly reliable "TOUGH CONTACT" has strong resistance to adverse environments
- The simple lock structure gives tactile feedback that ensures a superior mating/unmating operation feel.
- Gull-wing type terminals The gull-wing type terminals facilitate automatic mounting inspections.
- Rated current 0.3A/contact (Max. 5 A at total contacts)
- Rated voltage 60V AC/DC
- Ambient temperature: –55°C to +85°C
- Insertion and removal life: 50 times

XF2 SERIES 0.5mm PITCH FPC CONNECTORS

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

- Patented locking mechanism for improved connection stability
- Rated current: 0.5A
- Rated voltage: 50VDC
- Withstanding voltage: 250 SVAC for 1 minute
- Pitch: 0.5mm
- **XF2M series** — 2mm low-profile, rotary-lock construction with double-sided contacts
- **XF2J series** — compact, 4.15mm low-profile with slide-locking, top-entry ZIF connector
- **XF2L series** — 1.2mm low-profile with slide-locking, side-entry ZIF connector
- **XF2U series** — 0.9mm low-profile, rotary-lock construction with dual contact
- **XF2W series** — 1.1mm low-profile, rotary-lock construction with dual contact
- Tape & Reel packaging

Highly reliable, low-profile **XF2 series** flexible printed circuit (FPC) connectors are ideal for a variety of compact surface mount electronics modules, from cell phones and PDAs, to thermostats and lighting controls. Other sizes in stock; *go online or call*.

451 & 452 SERIES RIBBON CABLE SOCKETS AND BOARDMOUNT HEADERS

NEW

RoHS Compliant Available

3M

Cable Sockets

Boardmount Headers

Features

- Current Rating:
  1.0 A, all lines energized, 30°C temp rise per EIA 364-70
  1.5 A, 6 lines energized, 30°C temp rise per EIA 364-70
  2.5 A, 1 line energized, 30°C temp rise per EIA 364-70
- Voltage Rating: 125V
- Insulation Resistance:> 1 x 10^9 Ohms at 500 VDC
- Withstanding Voltage: 1250VACrms at sea level
- OperatingTemperature: -65°C to +105°C

451 Series Ribbon Cable Wiremount Socket Assemblies and 452 Series Shrouded Boardmount Headers have an extremely small 1.27 mm (0.050″) Pitch. The design enables mass termination and has an innovative header ejector latch mechanism.

D89 SERIES 0.100″ x 0.100″ WIRE MOUNT IDC SOCKETS

RoHS Compliant Available

3M

- For 0.050″ pitch flat ribbon cable, 26 and 28 AWG stranded
- Preassembled for high-efficiency termination
- Double-recessed cover for cable terminating from either side
- Military polarization, with or without centerbump

3M™ **D89 series** wire mount sockets are designed for wire-to-board stacking applications, such as communications networking equipment, medical devices, industrial/factory automation equipment, infotainment/gaming and military systems. Features black, glass-filled polyester housing with 10μ" gold-plated phosphor bronze contacts. Polarization slots provide for quick connections while minimizing misalignments. Plastic strain relief minimizes stress on the socket/cable termination; *ordered separately below.* Mates with 3M™ **D2500 series** low-profile four-wall headers and **D3000 series** latch/ejector four-wall headers; *ordered separately on page 804.* Select 3M™ **3365 series** 0.050″ pitch cable; *ordered separately on page 1219.* Current rating: 1A. Temperature range: -55°C to + 105°C. UL recognized.

FLAT/FLEX RIBBON CABLE CONNECTORS

D2500 SERIES 0.100″ x 0.100″ LOW-PROFILE FOUR-WALL HEADERS

RoHS Compliant Available

Through-Hole, Vertical | Through-Hole, Right-Angle | Surface Mount

- Space saving low-profile design
- Choice of through-hole vertical or right-angle and surface mount vertical configurations
- Center slot polarization for quick connections while minimizing mis-insertions
- Dual slot polarization offers broader compatibility with other polarization designs
- High temperature housing suitable for "no-lead" soldering

3M™ **D2500 series** low-profile four-wall headers are available in through-hole vertical or right-angle and surface mount vertical designs. All feature a black, high temperature glass-filled polyester (PBT and PCT) housing, flammability rated UL 94V-0. Brass contacts are plated with 10μ" gold in wiping area, 40-120μ" matte tin on solder tails, and underplated with 50-100μ" nickel, . Mates with 3M™ **D89 series** wire mount IDC sockets; *ordered separately on page 803.* Current rating: 2A. Temperature range: -55°C to + 105°C. UL recognized.

2mm (0.079″) 158 SERIES IDC RIBBON CABLE SOCKETS

RoHS Compliant Available

- Insulation material: Gray, High temperature glass filled polyester
- Flammability: UL 94V-0
- Contact: Gold plated copper alloy
- Current rating: 1 A
- Insulation resistance: > 100 MOhm at 500 VDC
- Withstanding voltage: 500 VACrms
- Temperature range: -55°C to +105°C

This new line of 2 mm pitch Ribbon Cable to PCB interconnects consists of an IDC style cable mount socket (158 Series) and a shrouded PCB header in multiple configurations (159 Series). 158 Series ribbon cable sockets terminate to 3M **3625 Series** cable and provides a reliable ribbon cable to board interface in a variety of applications. Versions supplied with pre-assembled cover and packaged on 3M's unique "sword pack" enable higher speed termination operations (vs. traditional separated cover termination methods). Available in 8 through 50 positions. Contacts are 30u" gold plated copper alloy. They mate to 159 Series shrouded headers *on this page.*

PAK 100 3000 SERIES WIRE MOUNT SOCKET CONNECTORS

RoHS Compliant Available

- Industry standard IDC socket
- Positive locking metal "J" clips provide high cover retention
- Mates with 3M headers, plugs and pin strips for quick connect/disconnect capability
- Open or closed end covers available
- Accepts flat cable or discrete wire
- Military polarization, with or without centerbump
- Transfer adhesive on covers provides precision alignment between connector and cables resulting in high yield terminations
- Availability of pull tab to facilitate proper unplugging
- Availability of 2 types of strain relief (standard and low profile) to isolate the IDC interface
- Set the standard for MIL spec and IEC standardization

0.100 × 0.100″ (2.54 × 2.54) industry standard IDC polarizing socket connectors are available center-bumped or standard, in sizes 10 to 60 contacts, with open or closed end covers. Both standard socket and center-bumped socket connectors can be used with mating 3M headers and plug connectors. Accommodates flat cable or discrete wires. Wire accommodation: 26 AWG solid or stranded, 28 AWG solid or stranded; *order seperately on pages 1219-1220.* UL recognized, file E68080; CSA certified. *Order clip-on strain reliefs separately below.*

929 SERIES BOARD MOUNT SOCKETS

RoHS Compliant Available

- 0.100″ Spacing Between All Contacts
- Single- and Dual-Row
- Tin-Lead Plating or Gold Plating Over Nickel
- Black Polybutylene Terephthalate (PBT) Insulation
- Flammability Rated UL94V-0
- Current Rating: 1A
- Withstanding Voltage: 1500Vrms
- Temperature Range: –40°C to +105°C

Fig. 1

PAK 100 N2500 SERIES 0.100″ x 0.100″ LOW PROFILE BOX HEADERS

RoHS Compliant Available

Right-Angle Pin

Straight Pin

- Low profile, space saving design
- Center slot polarization prevents mis-insertions and reduces insertion time
- Dual slot polarization means broader compatibility with competitive polarization designs (not 8 or 10 pos.)
- Optional retainer clip for locking sockets in place and increasing connection reliability in vibration-prone environments
- Optional high temperature insulator suitable for "no lead" soldering operations
- High temperature option in through-hole version suitable for "paste in hole" reflow soldering techniques
- Exposed solder tails (on right angle version) provide ease of cleaning and reduced repair costs

Low-profile, space-saving 0.100 × 0.100″ (2.54 × 2.54) headers feature 4-wall, shrouded housing. 0.025″ (0.635) pins have 30µ″ gold plating in wipe area and 60/40 tin-lead on the solder tails. Pins are 0.112″ (2.84) long for 0.062″ (1.57) board. High temperature plastic insulator for vapor phase reflow process. Glass-filled polyester (PCT). UL recognized, CSA certified.

AMP-LATCH 2.0mm (0.079″) RIBBON CABLE RECEPTACLES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Hard Metric 2.0 mm x 2.0 mm (0.079″ x 0.079″) Mating Grid
- Accepts 1.0 mm (0.039″) Pitch Ribbon Cable
- Insulation Displacement (IDC) Contacts of Beryllium Copper
- Operating Temperature: -65°C to +105°C
- UL Recognized, CSA Certified

Feed-thru polarized and non-polarized receptacles. Beryllium copper contacts feature duplex gold-plating on mating end, tin-lead on termination end with all nickel underplating. Thermoplastic housing and termination cover, rated UL 94V-0.

AMP-LATCH NOVO RECEPTACLES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 0.100 × 0.100″ Centers
- Accepts 0.050″ Centerline Ribbon Cable
- Accept Wire Size Range 28-26 AWG, Solid or Stranded; *go online or call*
- Dual-Beam Phosphor Bronze Contacts
- Receptacle Consists of Housing and Cover
- Mate with 0.025″ Square or Round Pins
- Current Rating: 1 A per Contact Max.

Military-Polarized

Center- and Military-Polarized

Preloaded insulation displacement contacts. Novo dual mating beam design offers higher forces: mating 12.0 oz. max./unmating 1.5 oz. min. Dual-beam phosphor bronze contacts are duplex-plated with 30μ″ gold on mating end, tin-lead on termination end, with nickel underplate. Accept wire size range 28-26 AWG, solid or stranded; *go online or call.* Constructed of black, UL94V-0 rated thermoplastic. Black, UL94V-0 rated thermoplastic strain reliefs, *ordered separately below.* Available in military-polarized, or center- and military-polarized configurations.

AMP-LATCH® 609, 622, AND 636 SERIES RIBBON CABLE CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Beryllium Copper Contacts
- Contact Mating Area Plating: Gold 30μ″ Over Nickel
- Contact Termination Area Plating: Tin-Lead Over Nickel
- Glass-Reinforced Thermoplastic Housing, Flammability Rated UL 94V-0

Designed for mass termination of all types of flat cable to a variety of male headers in PCB applications which require repetitive connection and disconnection. Mechanical side-latched and polarization keyways. Tulip contacts provide up to 4 points of contact per conductor. Available with or without polarization tabs. UL recognized, CSA certified.

AMP-LATCH® VERTICAL EJECTOR HEADERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Current Rating: 1 A
- Dielectric Strength: >1000 V_{rms}
- Temperature Rating: -55° to +125°C

Vertical ejector design permits end-to-end soldering and uses minimum PC board space. Accommodates 0.062″(1.57) thick PC boards. Straight- or right-angle solder tails available. Mates with female socket transition connectors with or without strain relief. **608** or **609** in mfg. part no. denotes short ejectors for mating connectors without strain relief; **606** or **607** denotes long ejectors for mating connectors with strain relief. Blue glass-filled thermoplastic housing, rated UL 94V-0. Phosphor bronze contacts with 30 μ″ gold over 50 μ″ nickel in contact zone; tin-lead over nickel in termination area.

Authorized Distributor

Straight-Thru

Right-Angle

- Dual-Polarized Universal Ejection-Style Pin Headers
- 0.100 × 0.100″ (2.54 mm × 2.54 mm) Centers
- Straight-Thru or Right-Angle 0.025″ (0.64 mm) Square Posts
- 0.240″ (6.10 mm) Mating Post Length

4-sided black thermoplastic housing, rated UL 94V-0. All **mfg. part no. xxxx54-x** have phosphor bronze contacts plated with 30µ″ gold on post/pin mating end, bright tin-lead on termination end. Contacts mate with 0.025″ (0.64) square or round pins with 0.245″ (6.22) maximum and 0.195″ (4.95) minimum lengths. Rated: 1 A. Temperature range: –55°C to +105°C. *Order latches and polarizer separately below.* Mate with MOD IV center polarized double-row housings; *order separately on pages 753-754.* UL recognized, CSA certified.

AMP-LATCH® LOW PROFILE PC BOARD BOX HEADERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Vertical

Right Angle

- Current Rating: 1 A
- Dielectric Strength: >1000 V_{rms}
- Temperature Rating: –55° to +125°C
- UL Recognized, CSA Certified

Mates with female socket transition connectors in PC board applications, which require repetitive connection/disconnection. Low profile design maximizes packaging density. Available with straight or right-angle solder tails for use with 0.062″ (1.57 mm) thick PC boards. Fully shrouded to protect 0.102″ (2.59 mm) long, 0.025″ (0.635 mm) square mating pins and assure positive polarization. Center polarization slot mates with center polarization tab on female connectors. Blue glass-filled thermoplastic housing (UL 94V-0). Phosphor bronze contacts with 30 μ″ gold over 50 μ″ nickel in contact zone; tin-lead over nickel in termination area.

812 SERIES 0.100 x 0.100" IDC SOCKET CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

Meets MIL-C-83503/7B specifications. Compatible with **816 series** headers; *ordered separately on this page.* 0.100 x 0.100"(2.54 x 2.54) contact spacing terminates to 0.050" (1.27) flat ribbon cable; *order Amphenol Spectra-Strip® planar-ribbon cable separately on pages 1222-1223.* Center polarization and open-end covers for feed-thru and daisy-chain applications. 1A copper alloy contacts have 30µ" gold-over-nickel plate in contact area, tin on termination end. Glass-filled PBT gray insulation rated UL94V-0. Fit 26 AWG stranded, 28 AWG solid/stranded, 30 AWG solid wire. UL recognized, CSA certified. *Order strain relief and polarizing key separately below.*

QUICKIE™ 2.54mm (0.100") IDC RECEPTACLES

RoHS Compliant Available

FCI

IDC receptacles feature phosphor-bronze contacts plated with 30 µ" gold over nickel. Single-piece design for low-applied cost. Hertz Dot increases contact integrity. Gray thermoplastic housing, flammability rated UL 94V-0. Current rating: 1 A continuous. Insulation resistance: 50,000 MΩ min. Contact resistance: 15 mΩ max. Dielectric withstanding voltage: 1000 V min. Durability: 100 mating cycles.

QUICKIE™ 2.54mm (0.100″) LOW PROFILE SHROUDED HEADERS

RoHS Compliant Available

- Recessed pins assure proper alignment and eliminate damage during mating
- End windows for latching with IDC receptacle
- Housing: Glass filled, thermoplastic polyester
- Flammability rating: UL 94 V-0
- Pin: Phosphor bronze
- Plating: Gold over nickel
- Operating temperature range: -65°C to +125°C
- Color: Blue

MINI-PV™ 2.54mm (0.100″) SINGLE AND DOUBLE ROW MINI-LATCH HOUSINGS

RoHS Compliant Available

65039 Series Single Row

65043 Series Double Row

Discrete crimp-to-wire housings on 0.100″ (2.54) centers. Stackable end-to-end and side-to-side. Accept Mini-PV™ receptacles, range 22-36 AWG and crimp-to-wire male pins 22-32 AWG, *ordered separately*, go online or call. Modified polyphenylene oxide, rated UL94V-1. *Order* **mfg. part no. 65307-001** *polarization plug separately below.* UL recognized, CSA certified.

LAT-CON™ 0.050 ″ AND 0.100″ CENTERLINE IDC CONNECTORS

RoHS Compliant Available

PANCON CONNECTORS

- Glass-filled polyester housing, flammability rated UL94V-0
- Contact material: copper alloy
- Contact plating: 15µ″ gold over nickel
- Meet MIL-C-83503 specifications
- UL recognized, CSA certified

LATERAL-ENTRY IDC SOCKETS

Lateral entry reduces termination time up to 70%. Designed for 0.050″ center, 28 AWG stranded flat cable. Insulation displacement contact provide gas tight connections. Mate with LAT-CON™ headers; *ordered separately below.* Easily installed with **mfg. part no. MCP5** termination press and **mfg. part no. CPD64F50FM** LAT-CON™ die; *go online or call. Order strain reliefs separately below.*

MMIT SERIES MANUAL INDEX TOOLS

PANCON CONNECTORS

Manually terminates full line of MAS-CON® connectors, both end and through styles, with discrete wire. Easy termination for daisy-chain applications. Portable tool allows for on-site, factory, or remote use. Weighs less than 0.25 lbs.

RoHS Compliant Available

OMRON. ELECTRONIC COMPONENTS

XG4A Vertical Thru-Hole

XG4A Right Angle Thru-Hole

XG4A Right Angle Thru-Hole - Two Tier

XG4C Vertical Thru-Hole

XG4C Right Angle Thru-Hole

XG4E IDC Header

- Rated Current: 1.0 A
- Rated Voltage: XG4E: 250 VAC, XG4A & XG4C: 300 VAC
- Contact Resistance: 20 mOhms max
- Dielectric Strength: 500VAC for 1 minute
- Ambient Temperature Range: -55°C to 105°C

Locking Latch

XG4 Series flat cable connectors are available in different variations including a dual port ejector header (XG4A) a space-saving box-type header (XG4C) and IDC cable mount header (XG4E) which can be used for relaying. An endless number of combinations when combined with XG5 Series IDC connectors for discrete wires. Box-type Plugs (XG4C) can be locked using Lock Levers. Conforms to MIL standard MIL-C-83503, UL recognized.

- Rated Voltage: XG4M: 250 VAC; XG5M: 300 VAC
- Contact Resistance: 20 mOhms max
- Dielectric Strength: 500VAC for 1 min.; XG5M: 650VAC for 1 min.
- Ambient Temperature Range:XG4M: -55°C to 105°C; XG5M: -55°C to 85°C

XG4 Series flat cable connectors and XG5 Series IDC connectors for discrete wires can be combined into an endless number of combinations. XG5 Series connectors features two-slot IDC construction with insulation barrels offering a high reliability and large-current (3 A) discrete wiring capability. With a simple, unique lock-lever system, these connectors can be locked to XG4C Series box-type Headers. Conforms to UL and CSA standards.

LCEDI (LCD COAXIAL EMBEDDED DISPLAY INTERFACE) CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Ultra-low profile mating configuration
- Compatible and intermateable with I-PEX CABLINE-VS connector series
- Twin leaf contact structure
- Mixed cable use: Micro coax (Twin coax AWG#40 or smaller) and Discrete wire (AWG #32 Teflon or smaller)
- User friendly design that utilizes friction lock mechanism at shell when mated or an optional full lock mechanism with pull bar

LCEDI (LCD Coaxial Embedded Display Interface) connectors are the next generation of connectors designed to provide exceptional electrical performance in both LVDS and embedded DisplayPort (eDP) applications. The LCEDI connectors feature new technology that provides an interconnection between notebook LCD panels and main processor boards using micro coax cable at speeds of 2.7Gbps (or discrete wire AWG 32 teflon or smaller). The ultra-low profile mating configuration offers a user-friendly friction lock mechanism at the shell when mated, or an optional full lock mechanism with pull bar. These LCEDI connectors are licensed by I-PEX CO., LTD. and are fully compatible and intermateable with the I-PEX CABLINE-VS connector series, recently selected by VESA (Video Electronics Standard Association) as the global standard for LED backlight , wide panel (16 x 9) interface.

CFP COMPLIANT 40G AND 100G ETHERNET CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features

- Electronics high speed 148 position connector, supporting 10Gb/s per channel.
- Plug connector straddle mounts to the Optical Transceiver module
- printed circuit board for conventional processing.
- Receptacle connector is surface mount (SMT) processed to the host board for conventional processing.
- Design supports belly-to-belly port positioning (mounted
- on both sides of host board) for high density.
- Accepts all CFP MSA compliant optical transceivers.
- Provides EMI shielding at the host connector interface and at the bezel opening via integrated EMI gasketing.

The CFP compliant connector is a new ultra high speed pluggable I/O interface supporting 40 and 100 Gb/s ethernet applications. The integrated system provides the mechanical, EMI and thermal performance necessary to meet the demanding requirements of the CFP Multi Source Agreement (MSA) Optical Transceivers and OEM host line cards.

I/O CONNECTORS

QSFP AND QSFP+ CONNECTORS AND CAGES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- 4x solution featuring TE's 38 position EVERCLEAR connector
- Lightpipe and heatsink options available
- Through-bezel and behind-bezel cage options with proven EMI containment
- Direct attach copper cable for short reach applications
- Quick release latching system
- MPO connectors plug into QSFP parallel optic transceiver modules

Applications:
- Switches, routers, and host bus adapters (HBA's)
- Enterprise storage
- High density, high speed I/O
- Multiple channel interconnects

QSFP (Quad Small Form-factor Pluggable) is a new high-speed pluggable I/O interface. This interconnect system offers four channels, providing three times the density of SFP/SFP+ ports. QSFP and QSFP+ receptacles and cages are designed for data rates up to 14 Gb/s, supporting Fibre Channel, Ethernet, SDH/SONET and INFINIBAND standards. The cage/connector system will accept optical or copper interfaces.

38-POSITION SURFACE MOUNT CONNECTORS

QSFP and QSFP+ receptacles are double-sided (belly-to-belly), 0.8mm pitch surface mount PCB connectors. Both feature 38 copper alloy contacts in a black, liquid crystal polymer (LCP) housing, flammability rated UL94V-0. Designed for high-speed signal integrity, these connectors are part of TE's EVERCLEAR product family, which also includes connectors designed for Mini-SAS/SATA applications.

zQUAD SMALL FORM-FACTOR PLUGGABLE PLUS (zQSFP+) INTERCONNECT SYSTEM

RoHS Compliant Available

TE connectivity

Authorized Distributor

Connector Assembly

1x1 Cage Assembly

1x1 Cage Assembly + Heat Sink

1x3 Cage Assembly

1x3 Cage Assembly + Heat Sink

Features:
- Backwards-compatible with QSFP optical modules and cable assemblies
- Enhanced EMI cage helps provide excellent thermal performance/ EMI protection
- Coupled, narrow-edged, blanked- and formed-contact geometry/ insert molding
- Staggered press-fit pins for belly-to-belly applications

Specifications:
- High-temperature thermoplastic housing
- Nickel silver cage assembly
- Copper alloy EMI springs
- Zinc alloy front flange
- Aluminum heat sink with stainless steel clip
- Mating force: 40N max.
- Durability: 250 cycles min.
- Current rating: 0.5A max. per pin
- Voltage rating: 30VDC max.
- Operating temperature: -20°C to +65°C

Applications:
- Telecommunications: servers, switches, access routers/switches and cellular infrastructure
- Data Center: servers and storage
- Medical: diagnostic equipment
- Networking: network interface, routers, switches and storage
- Test and measurement equipment

zQSFP+ (z-Quad Small Form-factor Pluggable Plus) connector and cage assembly has been designed for applications in the telecommunications, data center and networking markets that require a high-speed, high-density connector. The interconnect offers four channels of high-speed differential signals with data rates ranging from 25Gbps

➤CONTINUED➤

zQUAD SMALL FORM-FACTOR PLUGGABLE PLUS (zQSFP+) INTERCONNECT SYSTEM (CONT.)

up to potentially 40 Gbps, and will support 100 Gbps (4x25 Gbps) Ethernet and 100 Gbps 4X InfiniBand Enhanced Data Rate (EDR) requirements. zQSFP+ 25GBps connector features a black liquid crystal polymer (LCP) housing, flammability rated UL94V-0, with 38 right-angle surface mount gold-plated copper contacts. Alignment posts provide stability for placement of the connector on the host pc board. Standoffs allow easy pc board cleaning after soldering, and the card entry slot accepts 1.0 ±0.1mm-thick integrated circuit card housed in the transceiver. Contact spacing on 0.8mm centerlines. Compatible with QSFP, QSFP+, and Mini-SAS applications.

SMALL FORM FACTOR PLUGGABLE (SFP+) CONNECTORS

NEW

TE connectivity

Authorized Distributor

1-2007394-5

1-2149490-5

- Support Ethernet, Fiber Channel, and InfiniBand standard applications for up to 16 Gb/s
- Improve thermal performance with enhanced side walls, vertical separators, and latch plate
- Outperform standard SFP+ cages by a 3% reduction in temperature
- Reduce EMI up to 12 dBm within the 10-15 GHz range with augmented latch plate
- Achieve improved electrical connection and product strength with reconfigured gasket retention plate

Introducing an enhanced line of Small Form Factor Pluggable (SFP+) connectors with TE Connectivity's (TE) portfolio of 16 Gb/s connectors designed for the data communications industry. The new SFP+ stacked connectors feature upgrades designed to improve thermal performance and increase electromagnetic interference emission (EMI) containment, enabling communication equipment to operate more efficiently and deliver increased bandwidth.

SFP/XFP CONNECTORS AND CAGES

RoHS Compliant Available

Amphenol Commercial Products

SFP/XFP series are high speed connectors available in 20 or 30 position connectors and cage combos for mounting to a host PCB. These connectors and cages are similar to Gigabit Converter Interface (GBIC), but are smaller in size and operate at much higher transfer rates. The single port version is rated up to 4.125 Gbps and the stacked (2 x 1) can go up to 8 Gbps. The cages are 1 piece construction with enhanced transceiver mating tabs.

SFP+ CONNECTORS AND CAGES

RoHS Compliant Available

FCI

Specifications:

- Housing: Black thermoplastic, UL94V-0 rated
- Contact: Gold plated phosphor bronze, tin on SMT leads
- Cage: Nickel plated copper alloy
- EMI fingers: Tin plated copper alloy
- Light pipe: Clear polycarbonate
- Light pipe bracket : Stainless steel
- EMI gasket: Conductive elastomeric
- Differential impedance: 100Ω +/- 10Ω @ 70ps rise time (20-80%)
- Connector durability:100 cycles
- Connector mating force: 18N maximum
- Cage: Press fit tail termination; insertion force 40 N per tail
- Operating temperature: -20°C to 85°C

FCI's SFP+ connectors & cages includes a 20 position, 0.8mm contact centerline spaced, SMT terminated card edge connector that is pick-n-place compatible. The EMI metal cages are offered in a single 1x1 configuration and also in 1x2 and 1x4 ganged configurations. The 1x1 and 1x4 cage configurations are also offered with light pipes that allows for displaying network activity via LED's mounted on the system PCB. The edge card connector and cages are designed to meet all signal integrity requirements and EMI requirements as defined by the SFF-8431 and 8461 specifications. Robust EMI fingers are included with each cage port in order to assure a robust and reliable EMI shield & termination when placed through the chassis opening.

Specifications:

- Housing: Black thermoplastic, UL94V-0 rated
- Contact: Gold plated phosphor bronze, tin on SMT leads
- Cage: Nickel plated copper alloy
- EMI fingers: Tin plated copper alloy
- Heat sink: Nickel plated aluminum alloy
- Heat sink mounting clip: Nickel plated copper alloy
- Differential impedance: 100Ω +/- 10Ω @ 70ps rise time (20-80%)
- Connector durability: 100 cycles
- Connector mating force: 40N maximum
- Cage: Press fit tail termination; insertion force 40N per tail
- Operating temperature: -20°C to 85°C

Cable Assembly Specifications:

- Full duplex 4 channel 850nm parallel active optical cable assembly
- Transmission data rate up to 10.3Gbit/s per channel
- Low power consumption of typical 0.8W per end
- Easy to use release mechanism
- Operating case temperature 0°C to +70°C
- 3.3V power supply voltage
- RoHS 6 compliant
- Laser Class 1

FCI's QSFP / QSFP+ connectors & cages includes a 38 position, 0.8mm contact centerline spaced, SMT terminated card edge connector. Also offered is an accompanying single unit (1x1) EMI metal cage that accomodates a heat sink and associated heat sink mounting clip. The edge card connector and cage are designed to meet all signal integrity requirements and EMI requirements as defined by the SFF-8436 specification. Robust EMI fingers on the cage port assure a robust and reliable EMI shield & termination when placed through the chassis opening.

QUAD SMALL FORM-FACTOR PLUGGABLE PLUS (QSFP+) INTERCONNECT SOLUTION

RoHS Compliant Available

molex

Quad Small Form-factor Pluggable Plus(QSFP+) solution is designed for high-density applications. QSFP+ has evolved to QSFP+ (meets 10 Gbps data rates) just as SFP+ went from SFP+ to SFP+ for 10 Gbps rates. The original QSFP+ MSA is no longer an appropriate designation for use, as the specifications now resides in the SFF Committee as "INF-8438".

0.80MM (0.31") SFP+ STACKED MULTI-PORT CONNECTORS

RoHS Compliant Available

molex

- Current: 0.5 Amp
- Voltage: 120V AC
- Contact Plating: Gold
- Elastomeric Gasket
- Capable of handling 10 Gbps data rates to meet
- SFP+ industry requirements

The new SFP+ Stacked Multi-Port Connectors are the latest additions to Molex's extensive Stacked SFP connector product line. These high-port-density connectors offer complete integration of the connector within a cage and include optional lightpipes to provide port-status indication to the user. These 25.50mm (1.004") height stacked connectors provide two rows of belly-to-belly vertically stacked SFP+ ports. The SFP+ product line encompasses connectors offered in six port configurations: 2-by-1,2-by-2,2-by-4,2-by-5,2-by-6 and 2-by-8. Superior Electro Magnetic Interference (EMI) protection required for SFP+ speeds is achieved with either an elastomeric gasket.

IPASS™ I/O SMT RECEPTACLES AND ACCESSORIES

RoHS Compliant Available

molex

iPASS™ system provides flexible speed compatibility for applications ranging from 1.5 to 6.0 Gbps, with capability up to 10 Gbps. Supports SAS, SATA, SFF and external PCI Express. **75586** right angle receptacles have 0.8mm (.031") pitch, feature standoffs for easy PCB cleaning after soldering. **75783** right angle internal receptacles have hood kits that act as disposable pick-and-place caps, align the connector to the hood during robotic placement. Rated 0.5A @ 30V. **74150** complies with PCI SIG specs, supports 2.5 Gps data transfer rate for Gen I and 5.0 Gps for Gen II. Inline SMT leads on 0.64mm pitch. **75581** is an integrated press-fit connector assembly with cage for one-step placement to PCB. .

CXP PLUGGABLE I/O CONNECTOR ASSEMBLIES AND CABLE ASSEMBLIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Specifications

- Housing material: Zinc diecast
- Connector housing: Black LCP UL94V-0
- Connector contacts: Gold plated phosphor bronze
- Heatsinks: Aluminum
- Heatsink Clips: Stainless steel
- Lightpipes: Clear Polycarbonate
- EMI Springs: Copper Alloy
- Current rating: 0.5 amps max. per pin
- Mating force: 210N min.
- Unmating force: 42N min.
- Durability: 250 cycles
- Max. PCB insertion force: 25N per pin

Features

- Standard CXP interface complies with InfiniBand CXP 12x QDR and IEEE 100 Gbps Ethernet
- Provides 12 channels of 10 Gbps data rates for 120 Gbps of total bandwidth in one-piece press-fit assembly
- Enhanced Footprint (EF), dual sourced footprint offers reduced cross-talk
- Pre-assembled (one-piece) connector and cage assembly offers one-step placement to the board
- EMI gasketing at bezel opening and EMI springs for plug-to-receptacle containment
- CXP cages accommodate belly-to-belly mounting (can be applied to both sides of the board)
- Offering includes multiple heat-sink, lightpipe and EMI/dust plug options to fit customer applications

UNIVERSAL SERIAL BUS (USB) 3.0 STANDARD CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Support 5 Gbps data rate for fast sync-n-go, minimizing wait-time
- Backward compatible with USB 2.0 connector
- Minimize connector form factor variations
- Comprehend ease-of-use aspects
- Optimized power efficiency
- Plug and Play capacity
- Shell: Tin plated copper alloy
- Contacts: Gold plated copper alloy; tin on solder tails
- Voltage rating: 100VAC/VDC
- Current rating: 1.8A applied to Vbus pin, GND pins 1, 4, 7; 0.25A applied to pins 2, 3, 5, 6, 8, 9
- Operating temperature rating: -55°C to +105°C

TE's USB 3.0 connector meets all standards of USB-IF. It supports 5 Gbps data rate for fast sync-n-go, a 10X performance increase over USB 2.0. The USB 3.0 connector is backward compatible with USB 2.0 while offering optimized power efficiency by eliminating device polling and reducing active and idle power requirements. It allows for the unit load of 150mA (which is a 50% increase over the minimum unit load of USB 2.0) up to 6 unit loads (which is 900 mA, an 80% increase over USB 2.0 at a registered maximum of 500 mA). This means that USB 3.0 has up to 80% more power based on the configuration of the device.

USB 3.0 CONNECTORS

RoHS Compliant Available

FCI

Specifications
- Functional temperature range : -55°C to +85°C
- Operating Current Rating: 1.8A
- Operating Voltage Rating: 30VAC(RMS)
- Insulation resistance: Initial 100mΩ minimum

Applications
- Desktop and laptop
- Digital audio
- High volume storage devices
- Scanners
- Game ports
- High definition A/V equipment
- Control boards

Features & Benefits
- Minimizes user wait-time
- Backward compatible with USB 2.0 connector
- Over 10 times performance increase compared to USB 2.0
- Support 5 Gbps data rate for fast sync-n-go
- High durability : Fully mated condition is confirmed by a definite tactile
- Right angle and vertical styles
- Compliant with physical, electrical & environmental requirements of USB 3.0

USB FIELD TV HARSH ENVIRONMENT CONNECTORS

RoHS Compliant Available

Amphenol Pcd

- No hazardous in-field cabling
- Toolless assembly
- IP68 sealed against fluids and dusts when capped or mated
- Shock, vibration and traction resistant
- Improved EMI protection
- Mechanical coding/polarization (2 positions)
- Shell size 15

The USB Field TV series allows the use of standard USB 2.0 connectors. This series utilizes the MIL Circular DTL-38999 Series III Tri-Start thread coupling mechanizm with anti-decoupling device, providing both audible and visual coupling. Fire retardant and low smoke per UL94 V0 and NF F 16101 & 16 102. Mating cycles: 500 minimum. Temperature range: -55° to +85°C. *Order caps and accessories separately below.*

USB AND IEEE 1394 CONNECTORS 690 / 628 SERIES

RoHS Compliant Available

EDAC INC

Features

- Right angle, vertical, and a unique right angle vertical foot print available
- Available with through-hole or SMT contact designs
- USB products are compatible with asynchronous and isochronous data transfer methods
- Compatible with industry standard plug and play technology
- Communication speed
  - -Up to 1.5 Mbps for standard 1.0 USB
  - -Up to 480 Mbps for standard 2.0 USB
  - -Up to 5 Gbps for 3.0 USB

Meets USB 2.0 specifications. Minimum mating cycles: 1500 per EIA 364-09. Insulator Housing: UL 94V-0 thermoplastic. Contact Material: Phosphor Bronze (USB), Copper Alloy (IEEE1394). Contact Plating: 30u Gold plating on mating area. Current Rating: 1 Amp maximum Voltage Rating: 30 volts AC rms maximum. Shield Housing: Copper alloy.

HIGH-SPEED USB RECEPTACLES

RoHS Compliant Available

FCI

- USB 2.0 Certified -- Up to 480 Mbps
- Plug-and-Play
- Hot Pluggable
- Simple, Flexible Design
- Current Rating: 1 A
- Withstanding Voltage: 30 Vrms
- PC Board Thickness: 1.57 mm
- USB Compliant

Style A Style A Double-Stack

Designed to combine all personal computing interface ports into one connector. Handles serial data rates of 1.5 Mbps to 12 Mbps asynchronous and isochronous. Ideal for desktop and laptop PCs, printers, plotters, disk drives, servers, CDs, monitors, televisions, digital cameras, ISDN and PBXs. High-temperature thermoplastic housing, rated UL 94-V-0. Copper alloy shell and contacts. The USB+Power interconnect system was developed by FCI to enable additional power to be delivered to peripheral devices connected using USB 2.0 cable links. The USB+Power connector interface includes four additional contacts for power delivery, each rated at 5A/contact, to supplement the connector's current-carrying capability. For many devices, this eliminates the requirement for a separate power source reducing the number of cables required. For peripherals not requiring the additional current, the USB+Power receptacle will mate with a standard USB

MICRO-USB CONNECTORS

RoHS Compliant Available

FCI

- Contact: Gold plated copper alloy
- Shield: Stainless steel
- Housing: LCP, Black for B-type, Gray for AB-type; UL94V-0
- Functional temperature range: -55°C to +85°C
- Low level contact resistance: 40 mΩ Max.
- Insulation resistance: Initial 1000 MΩ Min.; After 100 MΩ Min.
- Dielectric withstanding voltage: 100 VAC for 1 minute
- Mating force: 35N Max.
- Un-Mating force: 8N Min.
- Contact Resistance: 40mΩ Max.
- Mating cycles: 10,000 max. rated, 200 cycles per hour

Extremely small high reliability connectors comply with physical, electrical and environmental requirements of Micro-USB standard (USB 2.0). Approximately 60% smaller in size compared to mini-USB connector range. Receptacles available in B and AB type; mid-mount & reverse mounting styles for use in various applications. Plugs used for data transmission, earphone or charging applications. Passive Latching prevents unintentional cable release

Flexible USB Adapter

Right Angle USB Adapter, Exit 1

Right Angle USB Adapter, Exit 2

- Solves mismatched USB connector combinations
- Molded construction provides durability
- Gold plated contacts provide reliable connections with repeated mating cycles
- Easily convert existing cables to your needs

These USB adapters provide an economical way for users to solve gender and connector type mismatches among standard USB connectors. They are handy adapters to have on hand to solve mismatched USB connector combinations in the field. Eliminates the need to change cables. They feature a durable, fully-molded design with internal shielding that protects signals from EMI/RFI.

MILL-MAX®

USB

Mini USB

Features:

- USB & Mini USB receptacles for thru-hole & surface mount
- Plug retention tabs
- Kinked locating legs for secure PCB retention
- Fully compatible with USB 1.0 & 2.0 specifications
- Passes 16MHz Signal Attentuation per ASTM-D-4566
- Voltage: 30 VAC rms
- Current: 1 A max. per contact for 30°C temperature rise

Mill-Max now offers USB & Mini USB connectors fully compatible with USB specifications designed for thru-hole or surface mount at the edge of a printed circuit board. Mini USB receptacles are smaller and lighter than existing USB connectors for portable and handheld devices and are fully compliant with current USB 2.0 specifications.

EVERCLEAR MINI MULTI-LANE HIGH SPEED CONNECTORS AND CAGES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Applications:
- High Speed I/O
- Multiple Channels Interconnects
- Switches for Fibre Channel and InfiniBand Standards
- Internal and External SAS and SATA

Features:
- 26 and 36 position receptacles
- Keying options available
- Potential for data rates beyond 10 Gb/s
- High density 0.8mm contact spacing
- SMT PCB attachment for high speed signaling

Tyco Electronics' EVERCLEAR product family is the next generation high speed multi-lane interconnect for internal and external receptacle applications and external cable assemblies. The system is designed to be meet to SFF-8086, 8087 and 8088 standards.

MINI SAS HD INTERCONNECTS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Applications:
- Serial Attached SCSI (SAS 2.1)
- Serial data transmission
- HBA (Host Bus Adapter)
- RAID (Redundant Arrays of Inexpensive Disks)
- Workstations
- Rack-mount server
- Servers
- Storage rack
- High performance computer
- Switches

1x1 Receptacle Assembly

1X2 Receptacle Assembly w/ Light Pipe

Features:
- SFF-8644 and SAS 2.1 compliant and capable for SAS 3.0
- Broad band design for 6 and 12Gbps
- Board receptacle assembly provide 1x1(4x), 1x2(8x) and 1x4(16x) configurations
- Pre-assembled, one piece connector and cage assembly offers one-step placement to the board
- Lightpipe option available
- REACH and RoHS compliant
- Improved cable latch design
- Enhanced EMI skirt design
- Scalable 4x and 8x cable plug options
- 26, 28, and 30 AWG bulk cable

TE's Mini SAS HD receptacle assembly is the next-generation SAS high-density high-speed I/O interface. This interface was adopted for the SAS 2.1 standard and proposed for SAS 3.0 standard, and is designed to support 6G and future 12G SAS applications. The assembly is offered in 4x, 8x,and 16x versions. The reduced size of the Mini SAS HD system provides additional space for system designers.

SERIAL-ATTACHED SCSI (SAS) CONNECTORS

RoHS Compliant Available

FCI

Features:
- For high-speed serial storage interfaces of up to 6 Gb/s
- 29-position SAS connectors enable SFF-8482 HDD interface
- Provide dual signal ports (7 contacts/port) and 15 contacts for power
- SAS receptacles also accept SATA drives
- Designed to support hot-plugging and blind-mating of HDDs
- Connector retainers provide additional mechanical strength after soldering

Specifications
- Housing: High Temp Thermoplastic, UL 94V-0; Color: Black
- Contact & Retianer Base Material: Copper lloy
- Contact Plating: Gold
- Solder Area & Retainer Finish: Tin
- Contact Resistance: 30 mΩ max.initial; 15 mΩ max. change after test
- Current Rating: 1.5 A per contact
- Voltage Rating: 100 VAC Max
- Durability: 500 cycles
- Mating Force: 50N max.
- Unmating Force: 5N min.

The 29 Position SAS Receptacle and Plug connectors enable high-speed SAS interface up to 6 Gb/s. FCI's SAS product range supports hot plugging, blindmating of HDDs and feature retention clips that provide additional mechanical strength for robust PCB attachment. SAS vertical receptacles are typically used for storage backplane or HDD carrier applications. SAS right angle receptacles address server blade, storage blade, embedded systems, or HDD carrier applications. SAS headers are intended for interposer or port selector assemblies in removable HDD carriers

THROUGH HOLE VERTICAL RECEPTACLES

Mfg. Part No.	Description	Remarks*	Stock No.	Price Each 1-9	Price Each 10-24
10018182-001LF	In-Line Footprint with Forklock Retainers, 3.7mm Tails	Meets 6 Gb/s	43K4439	1.56	1.46
10036876-003LF	Thru-Hole Power & Grounds; SMT Signals; Wide Base, Molded Posts and Retainers, Hybrid Termination, 3.7mm Tails	Meets 6 Gb/s	40K1843	9.10	8.25
PRESS FIT VERTICAL RECEPTACLES					
10031077-001LF	In-Line Footprint with Forklock/ Harpoon Retainers, 2.10mm Hold Down Length	Meets 6 Gb/s	43K4441	2.73	2.51
10038064-001LF	Staggered Footprint, Full-Length, Wide Base, Molded Posts	6 Gb/s Capable	82R6877	5.75	5.28
SURFACE MOUNT VERTICAL RECEPTACLES					
10039845-001LF	Port 1 (SATA) Toward PCB, Solder-Tab Retainers	Meets 6 Gb/s	82R6878	6.93	6.28
SURFACE MOUNT RIGHT ANGLE RECEPTACLES					
10036587-001LF	SMT Retainers	6 Gb/s Capable	40P3615	6.06	5.56
SURFACE MOUNT VERTICAL PLUGS					
10041724-001LF	SMT Retainers	6 Gb/s Capable	73K1771	2.80	2.58
SURFACE MOUNT RIGHT ANGLE PLUGS					
10034524-001LF	Port 1 (SATA) Away From PCB, Forklocks Retainers	6 Gb/s Capable	12T2579	2.55	2.34

*Products listed as meeting 6 Gb/s data speeds are per SAS specification T10/1760-D Rev 15. Products deemed capable of meeting 6 Gb/s data speed depend on customer application and design optimization.

MINI SAS/SATA CONNECTORS AND CAGES

RoHS Compliant Available

FCI

Features:
- 26 position, 0.8mm centerline
- Pick-and-place compatible
- Robust die cast cages offered in 0 degree and 1 degree mounting styles
- Cages offered in single (1x1) and ganged (1x2) versions
- Compliant EMI gasket to assure cage to chassis shield termination

Specifications:
- Housing: Black thermoplastic, UL94V-0 rated
- Contact: Gold plated phosphor-bronze, tin plating on SMT leads
- Cage: Nickel plated copper alloy
- Differential impedance: 100Ω +/- 10Ω @ 70ps rise time (20-80%)
- Current rating: 0.5 amps maximum per contact
- Connector durability: 250 cycles
- Operating temperature:-40°C to 80°C

FCI's external I/O connectors & cages includes a 26 position, 0.8mm contact centerline spaced, SMT terminated card edge connector along with accompanying single unit (1x1) or 1x2 ganged EMI die cast cages. The edge card connector and cages are designed to meet all signal integrity requirements and EMI requirements as defined by the INCITS T10 SAS 2.0 and 2.1 specifications or the SATA-IO Serial ATA specification. They also conform to the mechanical requirements as described in the Small Form Factor (SFF) 8086 and 8088 documents. Either cage configuration is offered with either a 0 degree or 1 Degree angle mounting style and with or without location pegs. A robust EMI gasket is included with each cage port in order to assure a robust and reliable EMI shield & termination when placed through the chassis opening

iVDR CONNECTORS

RoHS Compliant Available

FCI

Features:
- Provide 26 contacts in a single row on 1.27mm pitch
- Surface-mount design is RoHS-compliant and compatible with lead-free soldering temperatures
- Low insertion force for high durability:10,000 mating cycles
- External dimensions match standard 22-position SATA connector
- The right-angle plug provides solder tabs for added retention
- Options for right-angle or vertical receptacle provide capability to install cartridges in either orientation to host board
- The right-angle receptacle features a fixed screw hole at each end while the vertical type features a solder tab retainer at each end

Specifications
- Housing: High Temp Thermoplastic, UL94V-0
- Contacts: Gold plated Copper Alloy
- Insulation Resistance: Initial 1000 Mohm minimum
- Current Rating: 1.5 A AC/DC maximum per contact
- Contact Resistance: Initial 30 mohm maximum
- Voltage Rating: 100 V AC/DC
- Durability: 10,000 cycles
- Temperature Range: 0°C to +65°C

Information Versatile Disk for Removable usage (iVDR) plug and receptacle connectors connect between a host system and an iVDR media cartridge, which may contain a hard disk drive or a solid state device. The iVDR is a new medium that provides the capability of sharing content, including movies, music and programs, over a variety of devices such as information appliances, home servers, video recorders, automobile A/V devices and personal computers. The electrical interface is based on Serial ATA for highspeed data transfer at 1.5 Gb/s. A low-insertion-force, blade-on-beam contact structure provides high durability and is rated for 10,000 mating cycles. The iVDR Consortium, of which FCI is a board member, aims at the standardization of the nextgeneration large capacity data platform that can be sed in applications from audio/visual devices to PC systems. iVDR is also capable of recording copyright-protected high-definition (HD) audio, video or image content. For protection of copyrighted content, SAFIA (Security Architecture for Intelligent Attachment) is used. Such iVDR are called iVDR-Secure.

eSATA CONNECTORS

RoHS Compliant Available

FCI

Features:
- Compliant with eSATA requirements in Serial ATA Specification
- Up to five times faster than USB2.0 or FireWire 400 external storage solutions
- Supports Gen 1 (1.5Gb/s) and Gen 2 (3Gb/s) data rates
- Provide external data backup and protection at up to 3Gb/s data transfer rate
- High-durability design supports 2500 cycles
- RoHS-compliant and compatible with lead-free processing temperatures
- Available range includes eSATA, eSATA/USB (2-in-1), and eSATA/ USB (2-in-1) + USB combo types

Specifications
- Housing: Glass filled LCP, UL94 V-0,Color: Black
- Contacts: Gold plated Brass
- Insulation Resistance: Initial 1000 Mohm minimum
- Current Rating: 1.5 A per contact
- Contact Resistance: Initial 30 mohm maximum
- Voltage Rating: 12 VAC Max
- Durability: 2500 cycles
- Temperature Range: -40°C to +105°C

eSATA products are aimed at external storage applications that require a single-lane Serial ATA cable connection up to approximately two meters in length. The connectors comply with the Serial ATA Specification issued by the Serial ATA International Organization (SATA-IO). A typical application is the connection between a desktop or mobile PC and an external storage drive, similar to existing USB or 1394 cable connections but at significantly higher data rates. The eSATA connectors support both Gen1 (1.5Gb/s) and Gen2 (3Gb/s) SATA data rates. The available connector range includes individual eSATA connectors, 2-in-1 combination connector designs capable of accepting either an eSATA or a USB cable plug, and stacked configurations that provide a USB port in addition to a 2-in-1 eSATA/USB port.

Mfg. Part No.	Description	Stock No.	Price Each 1-9	Price Each 10-24

(139080)

I/O CONNECTORS

MICRO SERIAL ATTACHED SCSI (MICRO SAS) CONNECTORS

RoHS Compliant Available

molex

78395-0001

78495-0001

- Housing: Black glass filled LCP UL94V-0
- Contact: Gold plated copper alloy
- PCB Thickness: 1.00mm (0.039")
- Voltage (max.): 30 V
- Current (max.): 1.5 A DC/AC rms at 60 Hz
- Low level contact resistance (min.): 45 mΩ (initial)
- Dielectric withstanding Voltage: 500 VAC
- Insulation resistance (min.): 1000 MΩ
- Operating temperature: 0 to +55°C

The introduction of 1.8-inch Hard Disk Drives (HDD) and Solid State Drives (SSD) has led to the development of a small form-factor interconnect with the performance headroom to meet requirements of mission-critical enterprise-storage interconnect needs. Molex's Micro Serial Attached SCSI (Micro SAS) connectors are the storage industry's smallest, next-generation high-speed serial I/O solution for 1.8-inch drives, enabling faster data rates up to 6 Gbps while being 100% backward compatibl ewith Molex Micro Serial ATA. Molex's Micro SAS features allow the coexistence of both storage technologies in the same system, opening the door for Micro SATA scalability and is the ideal solution for high-speed, high-bandwidth SAS applications.

SERIAL-ATA (SATA) CONNECTORS

RoHS Compliant Available

FCI

Applications:

- Notebook PCs
- Server and storage blades
- External storage systems
- HDDs and HDD carriers
- Processor and storage blades
- Mezzanine cards
- Embedded system boards
- Audio/video storage

The SATA connector system is designed for hot plugging and blind mating of HDDs. The 22-position, receptacle and plug connectors enable the implementation of the new high-speed, Serial ATA (SATA) hard disk drive (HDD) interface. The backplane receptacle accepts a SATA drive, but is keyed to block the installation of a Serial-Attached SCSI (SAS) drive. Staggered contact lengths provide sequential mating of contacts to enable hot plugging. Molded guide posts provide angled lead-in to compensate for connector misalignment, allowing self alignment during the mating process.

Mfg. Part No.	Description	Stock No.	Price Each 1-9	10-24
● 10029364-001LF	SATA Port Toward PCB, with Molded Posts and Forklocks, 2.67mm Offset	43K4440	3.35	3.07

MINI-CLAMP CONNECTORS

RoHS Compliant Available

3M

371 Series Plug — 373 Series Socket — 372 Series PCB Mount Socket

- Reduces wire consumed when used as part of the 3M complete factory automation offering
- Terminate discrete wire in a convenient IDC connector package in less time than conventional hand tools for crimp connectors
- Easy field termination with no special wire preparation - no stripping, no tinning, no special tooling
- Debris-free IDC termination eliminates waste by-products that may contaminate the work environment
- Wire Termination Operation with a general tool "pliers" reduces tooling cost
- Accommodates 20-26 AWG stranded wires with a broad range of wire diameters, color coded cover for easy identification
- Integrated wire retention cover design to retain the wires while terminating to the IDC
- Provides even quality, reduces waste
- Reduces maintenance work by providing higher connection reliability
- Rated 3 Amps
- Mating Latches provide a reliable interconnection in demanding applications
- Compact design saves board space
- High number of mating cycles - 300
- Link Connectors are designed to the CC-Link Partners Association (CLPA) specification

3M™ Mini-Clamp Connectors are designed to provide connection reliability and cost performance in I/O applications commonly found in a wide range of sensor control systems, including Factory Automation and Industrial Controls. 3M Mini-Clamp products use the advantage of 3M's IDC technology which does not require any special tooling or pretreatment of cables, and can be terminated using a standard pair of pliers. Benefits of the Mini-Clamp products include a simple installation process that does not create material debris or waste; a labor saving IDC termination process relative to traditional interconnect alternatives; ease of assembly for system building; and a design that provides for consistent quality and reliability. Features include semi-transparent cover, color-coded covers to provide for the proper wire usage, wire alignment and retention built into the cover. These features provide for proper wire termination along with latches and polarization to allow for proper mating of the connectors. The 3M Mini-Clamp Connectors are part of a serial field bus system solution that is designed to reduce the space of sensor wires in factory automation machines when compared to parallel wiring approaches. The total field installation costs (assembly and wiring) can be reduced when the 3M Mini-Clamp products are used – especially in combination with the 3M Link Connector offering."

2.54mm (0.100) PITCH LINK CONNECTORS

RoHS Compliant Available

3M

381 Series, 2 Position IDC | 381 Series, 4 Position IDC | 382 Series, 2 Position Right Angle

- Hermaphroditic four-point contact mating structures reduces the number of different components required to interconnect and ensures a reliable interconnect
- Easy, labor saving and reliable IDC termination
- T-Tap termination enable mid-cable terminations without special preparation or handling of the cable or wires in order to interconnect fieldbus and power lines at any point
- Easy field termination with no special wire preparation – no stripping, tinning or special tooling, Can terminate with a common pair of pliers
- Design accepts multiple wire diameters of 1.1 to 2.54 mm , conductor sizes of 18 to 22 AWG
- 5 Amp maximum current carrying capability per contact
- Latching mechanism maintains a reliable interconnection in demanding field applications

382 Series, 2 Position Vertical

The 3M™ 38X02 Series Link Connector includes 2 and 4 position wiremount and boardmount products and offers the advantages of insulation displacement contact (IDC) technology while providing a safe and reliable electrical connection. Wiremount connectors accommodate discrete or flat ribbon cable with conductor sizes between 18 and 22 AWG, and requires no more than a pair of pliers to make the termination.

SHRUNK DELTA RIBBON (SDR) I/O CONNECTORS & CABLE ASSEMBLIES

RoHS Compliant Available

3M

122XX-1150-00FR | 122XX-5150-00FR | 122XX-8250-00FR

3M™ SDR connector is a ribbon contact system with a 0.8mm contact pitch. SDR boardmount connectors are constructed of RoHS compliant high temp plastic bodies, 30µ″ gold contacts, polarized, stamped metal EMI/ESD interface with installed jack sockets and supporting boardmounting hardware. Applications include high density I/O and camera to C/L frame grabber applications meeting the new AIA Industrial Mini Camera Link® standard.

MINI D RIBBON (MDR) METAL JUNCTION SHELLS FOR ROUND CABLE

RoHS Compliant Available

3M

- Junction shell for 3M™ Mini D Ribbon (MDR) Plug Connectors
- 60° and straight metal junction shells for round cable
- Rugged two-piece die cast metal shell with 60° and straight round exit (compatible with 101XX-6000 EC plug)
- Reliable metal strain relief clamp provides grounding for cable shield
- Excellent EMI/ESD protection
- Quick release latching mechanism
- Available in 14, 20 (straight only) 26, 36, 40, 50, 68, 80 (60° only) and 100 position.

180° EXIT | 60° EXIT

The new 3M MDR zinc shells are designed to protect the termination between round profile cable and **mfg. part nos 102XX0-6000EC** Series IDC plug connectors *on this page.* The 60° degee exit shell is useful in vertical I/O applications such as cabinets where the cable hangs down and saves space compared to the 90° degree exit. The metal shell provides protection from EMI/RFI and puts less strain on the wire termination.

- Board mount, thru-hole, vertical, shielded, I/O receptacles
- Rugged die-cast metal stand
- Ribbon-style ccontacts
- Reliable plugging and unplugging
- 36-position used for IEEE 1284-C interface
- Temperature rating: -55°C to 105°C

Current rating: 1A. Insulation resistance: >5 × 10^8Ω @ 500VDC. Withstanding voltage: 500Vrms for 1 minute. Body: zinc with nickel plating; shroud: steel with nickel plating; insulation: glass-reinforced polyester. Color: black. UL recognized, CSA certified.

NANONICS DUALOBE RECTANGULAR CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Standard Sizes: 5, 9, 15, 25, 37, and 51
- Temperature Range is -200°C to +200°C
- Current rating: 1A per contact
- Low contact resistance (.003 – .008 ohms)
- 500 mating cycles
- Contacts: Gold plated Berillium Copper
- Plastic Insulators and Shells: 30% glassed filled Liquid Crystal Polymer (LCP).
- Metal Shells: 6061-T6 Aluminum with electroless nickel plating per MIL-C-26074.

NANONICS D-style rectangular connectors have earned the distinction of being the most popular and widely utilized style of Nano connectors. These connectors incorporate the DUALOBE polarization scheme. This polarization scheme negates the need for mating guide pins and does not increase the package size. The DUALOBE series of connectors are available in both machined aluminum and molded plastic shells, both in one and two row connector housings. Single row configurations commonly have standard pin counts from 5 to 51, while the higher density two row configurations have pin counts from 9 to 65. Termination configurations include wire, surface mount, thru-hole, solder cup, "duckbill", and panel mount.

34690 Vertical

34691 Right-Angle

34695 Hybrid Vertical

34696 Hybrid Right-Angle

34729 Black

31372 Hybrid

- Stackable connection system of readily available PCB headers
- Header and receptacle housings molded in standard USCAR color schemes
- No tooling necessary to produce custom multi-bay headers
- Pre-assembled, linear Mylar PC tail alignment strip for right angle headers
- Modular-housing design with standard dovetail features molded into the housings
- Headers can be ganged together to meet growing terminal quantity requirements
- PCB standoffs ensure all terminals are properly aligned into PCB
- Retain header to PCB during assembly and solder processing
- High temperature thermoplastic housing
- Headers feature tin plated copper alloy contacts
- Voltage rating: 500V max
- Operating temperature range: -40° to +100°C

The Stac64 connection system allows OEM and device manufacturers greater design flexibility to support both low-level signal requirements as well as power applications upwards of 30.0A. The standard product line based on the 0.64mm (.025") pitch terminal supporting low-level signal requirements and an additional 10-circuit 'power pocket' version based on 1.50 and 2.80mm (.059 and .110") pitch terminals to support power applications. This Stac64 is a standard product system based on USCAR-2 Class II mechanical and electrical performance characteristics for unsealed connector applications. The connectors mate to existing wire-harness connectors designed to the USCAR/EWCAP industry footprints. 20-circuit connectors are molded in standard USCAR colors for visual polarization and aid to assembly .

STAC64™ HYBRID STACKABLE CONNECTION SYSTEM

NEW

RoHS Compliant Available

molex

Series 34772, 14-circuit hybrid vertical header

Series 34773, 14-circuit hybrid right-angle header

Series 34969, 14-circuit hybrid female receptacle

Features & Benefits

- Stackable connection system of readily available PCB headers
- The header and receptacle housings are molded in standard USCAR color schemes for additional polarizations
- Pre-assembled, linear Mylar PC tail alignment strip for right angle headers
- Modular-housing design with standard dovetail features molded into the housings
- PCB alignment posts
- PCB standoffs molded into housings
- High temperature thermoplastic housing
- Pre-assembled TPA to receptacle housing shipped as single assembly

The Stac64™ stackable connection system provides single and multi-pocket PCB solutions, offering a diverse range of circuit sizes and greatly reducing time-to-market by completely eliminating custom tooling. Female connectors feature only pressure-activated design in the industry. The Stac64 connection system allows OEM and device manufacturers greater design flexibility to support both low-level signal requirements as well as power applications up to 30.0A. This system allows automotive manufacturers to use header assemblies as stand-alone components, to gang multiple headers together to support a large range of signal and power needs for devices and modules.

Male

Female

Centronics®-type connector offers a fast, economical method to achieve electrical interconnection. A trapezoidal-shape shell provides correct polarity. Shell: nickel-plated steel. Insulator: glass-filled thermoplastic. Insulator resistance: 1000MΩ min. @ 500VDC. UL94V-0. Working voltage: 500VDC. Current rating: 5 amps per contact. Copper alloy contacts with gold plating over nickel. Operating temperature range: –55°C to +105°C.

CLOUDSPLITTER CONNECTOR SYSTEM

NEW

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features & Benefits:

- Cat 5e and DC power in one connection to help standardize your inventory
- SMT Jack accepts standard RJ45 shielded plug in addition to CLOUDSPLITTER plug assembly
- Shielded SMT jack and cable plug
- Cable combines signal and power available in shielded or unshielded configuration
- Pre-terminated cable assemblies in standard lengths
- RoHS/REACH Compliant
- Lead-free reflow solder capable
- Cable is UL444 and CM rated
- Certified to UL 1863

The **CLOUDSPLITTER** connector system is a single cable solution for powered devices that delivers Cat5e performance and up to 250 watts of power over a single cable. The 8 position RJ45 jack is surface mountable and includes integrated LED indicator lights. The jack accepts CLOUDSPLITTER or standard RJ45 shielded plugs and provides DC power at 5A up to 50VDC over two integrated power contacts.

RJ11-6L-S
L Series

RJ45-8L-B
L Series

Cost-effective, space-saving solutions to the problems of RFI on signal lines. "Signal Sentry" filtered modular jacks are ideal for telecommunications equipment, computers, terminals and peripherials. Inductive and optional capacitive elements effectively remove common-mode noise from incoming signals and limits unwanted signal line emissions. **N series** jacks offer inductance and optional shielding plus a lower profile for board stacking applications. **L series** jacks, available with or without a shield, are offered with standard ferrite sleeve inductors or higher performance ferrite blocks. Mfg. part nos. with **S suffix** incorporate sleeve ferrites for handling crosstalk problems, while mfg. part nos. with **B suffix** incorporate block ferrites for higher performance. UL recognized, CSA certified.

FRJA SERIES SHIELDED AND FILTERED MODULAR JACKS

RoHS Compliant Available

Amphenol Commercial Products

Offer low-cost and effective EMC control within standard RJ-11 and RJ-45 connector footprints. EMC control is provided by completely shielded connector and/or with the use of high-resistivity, high-impedance ferrite block. Board layout changes are not required. Copper alloy, tin/lead-plated shield. Features fully enclosed contact body with a flat contact design that has 50µ" gold mating side and tin/lead in the PCB tail. Thermoplastic insert, which complies with UL94V-0. Dimensions: 0.735H x 0.575W x 0.510"D. Contact resistance: 20mΩ maximum. Insulation resistance: 500MΩ minimum. Current rating: 1.5A. Voltage rating: 125VAC. UL recognized, file no. E135615; CSA certified, file no. LR68598-11.

STANDARD RJ45 MAGNETIC JACKS

RoHS Compliant Available

EDAC INC

Features:

- Integrated Magnetics - Combines network magnetics with RJ 45 modular jack connectors
- Provides signal integrity, DC isolation and protection for PHY chip
- 19/100 or 1000 Base T options - Full IEEE 802.3 compliance
- Integrated Design - Reduces component inventory and process costs
- Spring fingers on shells - Guaranteed advanced EMI/RFI suppression
- Through Hole Right Angle termination unless otherwise indicated.

CATEGORY 5e & 6 FEED-THRU ADAPTERS

RoHS Compliant Available

L-com Global Connectivity

Shielded Keystone Feed-Thru

Shielded Right Angle Keystone Feed-Thru

Shielded Panel Mount Feed-Thru

- High Performance Ethernet Coupler for panel and wall plate mounting
- RJ45 Female connectors and straight through wiring for network system compatibility
- Fully shielded housing reduces EMI/RFI interference
- EIA/TIA 568A/B compliant insures compatibility and reliability in your application
- Category 5e & 6 performance ratings facilitate high-speed data communication
- Keystone Style Snap in mounting design for compatibility with common wall plates and rack panels
- Panel mount versions includes coupler, mounting frame and 4-40 machine screws

KEYSTONE STYLE FEED-THRU COUPLERS

These couplers utilize two RJ45 (8x8) modular jacks and feature an industry standard Keystone-Mount design. These couplers can fit into a standard keystone style opening as well as typical panels and wall plate openings. Shielded versions feature a stamped metal shell offering maximum protection from EMI/RFI

Mfg. Part No.	Category	Stock No.	Price Each 1-9	Price Each 10-24

KEYSTONE STYLE RIGHT ANGLE FEED-THRU COUPLERS

An exclusive product design from L-com, the new TDG1026KC series right angle Category 5E couplers offer true 90° connectivity and meet Category 5E standards. These unique right angle keystone couplers were designed to address tight fit applications commonly seen with wall plates and some patch panel designs. These robust right angle Cat 5E couplers fit standard .765" X .585" keystone openings and can be used for myriad voice, video and data applications

TDG1026KCS-R5E	5e, Shielded	80R9289	12.24	11.06

PANEL MOUNTED FEED-THRU COUPLER KITS

With a solid die-cast metal mounting frame, these unique coupler kits allow panel mounting in virtually any panel thickness. Designed to work with EIA/TIA 568A and B wiring, these couplers offer a reliable method to pass high-speed data communication through a chassis or rack panel. Kits include a snap-in coupler, mounting frame and 4-40 machine screws.

RJE56 SERIES - RJ45 PRESS FIT

The RJE56 series is designed for applications where soldering is just not an option. The pressfit contacts and shield tabs have the "Eye of the Needle" design and provide good PCB retention and reliable electrical performance.

Mfg. Part No.	No. of Ports	No. of Positions	No. of Contacts	Shield	LED Left, Right	Stock No.	Price Each 1-9
RJE56-188-0410	1	8	8	None	None	47W2078	1.79
RJE56-188-1410	1	8	8	Full	None	47W2079	2.17

RJE71 SERIES - RIGHT ANGLED, RECESSED, LOW PROFILE

The RJE71 of modular jacks meet category CAT6 performance per EIA-568-C.2. It supports Gigabit Ethernet Protocols and 10G Ethernet over lengths up to 50M. Shielding available for increased EMI performance and LEDs for Link Activity and Network Speed verification.

Mfg. Part No.	No. of Ports	No. of Positions	No. of Contacts	Shield	LED Left, Right	Stock No.	Price Each 1-24

RJE73 SERIES - RJ45 LOW PROFILE WITH LEDS

The RJE73 Modular Jack is a low profile RJ45 with LEDs and superior EMI shielding with a small foot print for space sensitive designs and built-in LEDs for link activity and network verification. This product is ideal for LAN applications such as adapter cards and routers.

HYPERJACK POE+ MAGNETIC MODULAR JACKS

RoHS Compliant Available

molex

- Integrated magnetics:
  - — Filter common-mode noise to provide signal integrity
  - — Protect PHY chips
  - — Provide DC isolation
  - — Offer low-mode conversion
- Spring fingers offer advanced EMI protection
- Help simplify PCB layouts by reducing components required
- Left and right green LEDs provide port status and activity feedback to user
- Supports Fast Ethernet (10/100) and Gigabit Ethernet applications
- Meets Category 5e performance
- Single-port (1-by-1), 8-position
- Right-angle (side-entry), through-hole solder termination
- Mates with FCC 68.5 / IEC 60603-7 plugs
- Ethernet 10/100/1000 compatible — IEEE 802.3 compliant
- PoE and PoE+ compatible — IEEE 802.3af compliant

HyperJack™ PoE+ (Power over Ethernet Plus) Integrated Connector Module (ICM) provides a cost-effective, plug-and-play, solution for implementing PoE and PoE+ management functions for Power Sourcing Equipment (PSE). This fully-integrated connector incorporates wire-wound components (magnetics) in a standard RJ45 jack. Feature phosphor bronze contacts with 1.27mμ gold plating on mating end over nickel underplating. Stainless steel shielded housing constructed of black, PBT; flammability rated UL94V-0. Current rating per contact: 1.5A max. Voltage rating: 57V max. Operating temperature range: -40° to +80° C. Supports a wide variety of applications including computer, network and telecommunications equipment.

Mfg. Part No.	Description	Stock No.	Price Each 1-9
● 85759-1001	HyperJack 8-Postion 1x1 PoE Plus PSE Modular Jack with LEDs	78R3035	13.24

PDJack™ POE+ INTEGRATED MAGNETIC MODULAR JACKS

RoHS Compliant Available

molex

- PoE integrated circuit included
- Bridge rectifiers to accommodate all Power Sourcing Equipment (PSE) types
- Detection and classification circuitry fully IEEE802.3at compliant
- Robust ESD and EMI (electro-magnetic interference) design
- Efficient thermal design
- Gigabit Ethernet magnetics with common-mode choke
- Connectors are available in Class 0, 1, 2, 3 and 4
- Housing: Nagase-D-Valox 420 SED Black, UL94-0\5V
- Shield: Stainless steel
- Contact: Phosphor Bronze (CuSn8)
- Plating: Contact area —1.27um Gold (Au) over 1.9um Nickel (Ni) Solder tail area —3um Tin (Sn)
- PCB thickness: 1.57mm

PDJack™ with integrated Power Device controller circuitry plus Ethernet connectivity simplifies PoE Plus implementation for any network device, reducing time-to-market, lowering costs and achieving considerable PCB space savings. Based on the RJ45 connector, the magnetic PDJack™ is the first integrated PD (Power Device) Jack in the market to combine a PoE+ PD controller and bridge rectifiers with gigabit magnetics in one connector and provide a complete drop-in, single port solution.

molex

33-100 Master and remote 31-001

SLT3 SINGLE LINE TESTER

Instant identification of most common voice and data cabling problems including shorts, opens, reversals, and miswires. The master and remote units separate for end-to-end testing of installed cabling. The continuously sequencing LED display immediately alerts you to problems in the cabling system. Both pieces snap and lock together when not in use. When the units are interlocked, the battery is disabled. Designed to fit in a tool box or pocket, and has a convenient ring feature for attaching to a belt or frame. A durable nylon carrying case may be purchased as an optional accessory. Frame adapters are available for testing from the punch down block to the wall plate.

Mfg. Part No.	Description	Stock No.	Price Each
33-100	SLT3 Single-Line Tester	57J2621	122.74

INSTALLATION TOOL

Mfg. part no. 31-001 provides reliable terminations and is compatible with KATT, 110 Style and Krone IDC Connectors. Handle is heavy duty nylon and blade is hardened steel.

INDUSTRIAL MINI I/O CONNECTOR SYSTEM

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 30V rated
- Current rating: 0.5 A
- 0.635 mm pitch
- Operating temperature: -40°C to 70°C
- Cable diameter: 6.7 mm Max
- Wire size: 22 AWG Max
- Durability: 1500 cycles
- Cable retention force: 98N (10kg)

The Industrial Mini I/O connector system is a small, compact, latching, wire-to-board I/O interface that is suitable for the stringent demands of an industrial device. It is one quarter the size of a conventional RJ45 plug and is designed with two points of contact for increased reliability in high vibration environments. It is polarized with two options available to prevent mis-mating. The unique latching system protects the plug from pull out during high vibration and accidental bumping. The system is most commonly used as an RJ45 replacement with 8 individual circuits that accommodate I/O signals and meets Cat5e requirements when used in an ethernet application.

HAR-PORT SERVICE INTERFACE FOR ETHERNET & USB

RoHS Compliant Available

HARTING

- Standard panel cut out to fit typical industrial control panels
- Panel cut out to IEC 60945-5
- Very simple assembly with only one M22 nut
- Cat 6 interface up to 10Gigabit speeds
- USB interface options include type A coupler

Harting har-port products address the need for easy to use service port solutions in today's common interfaces – USB & RJ45. har-port is a very small service interface for Ethernet and USB data connections and is mainly designed for IP20 indoor applications. Panel cut out and design fits all typical 22mm industrial control or emergency stop switches and control lamp cutouts. The simple design of the har-port interface makes it suitable for use it in a conference room table, to connect a USB memory stick or keyboard, or data interfaces on medical devices.

FIELD ATTACHABLE RJ45 ETHERNET MALE CONNECTORS AND CABLE

RoHS Compliant Available

Brad

Customize IP67 Ethernet cordsets to the specific length you need with RJ-Lnxx® field attachable male RJ-45 connectors and industrial rated category 5 cable. Ideal for use in harsh environments where vibration and contamination from water, oil, and dirt is common. Applications include outdoor telecom, oil exploration, defense, entertainment, display boards, retail and more benefits from this innovative, IP67 sealed design.

IP67 COMMON CORE INDUSTRIAL ETHERNET CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Housing : UV Resistant UL94V-0
- Gasket, Seal : UL94 HBF
- Temperature range : -40°C to +85°C
- Compliant to IEC 61076-3-106 Variant 1
- Tool-less connector
- For use with Cat 5e cable
- IP67 sealing performance
- Meets TIA/EIA 568 Category 5e requirements
- Protective covers available for both the plug and receptacle
- Positive lock coupling ring provides reliable connections in harsh environments

TE Connectivity now offers an IP67 field installable RJ45 connector. Utilizing our already existing "common core" design, the product can be applied in the field without the use of a tool. Designed for use in harsh environments, the connector features a quick-connect bayonet coupling mechanism. Applications include industrial machinery, diagnostic equipment, communications equipment, and industrial printers

IP67 METAL SHELL ODVA-COMPLIANT INDUSTRIAL ETHERNET CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Meets TIA/EIA-568 Category 5e requirements
- Housing, Coupling ring, Cable fitting : Chrome plated zinc die cast
- Gasket, Seal : UL94 HB
- UV resistant gasket material
- Positive lock coupling ring
- Polarized for proper mating
- Temperature range : -40°C to +85°C

TE Connectivity now offers an even more rugged connector series that meets the Ethernet/IP RJ45 requirements/standards. The IP67 Metal Shell ODVA-Compliant connector system is designed for use in the harshest environments. The connector features a quick-connect bayonet coupling mechanism per the IEC 61076-3-106 Variant 1. Applications include industrial machinery, diagnostic and communications equipment, industrial printers, outdoor signs, theatrical equipment, live events set up (music concerts or any event requiring the set up of a sound or video stage) or any ethernet application where an IP67 sealed, rugged connector interface is required.

CIRCULAR SEALED USB CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features
- IP 67 sealing performance
- ¼ turn bayonet coupling ring
- Standard A plug and standard B plug
- Through-panel mating receptacles
- Available in both plastic and metal shell configurations
- USB 2.0 compliant

Specifications
- Housing (Plastic) – High temperature thermoplastic, UL94V-0, black
- Housing (Metal) – Chrome Plated Zinc Die Cast Gasket, UL94 HB, UV Resistant Gasket Material
- Contact – Brass, gold plated on contact area, nickel underplated
- Shield – Steel, nickel plated, copper underplated
- Voltage Rating — 30VAC (rms)
- Data Rate – 480Mbits/s

Circular Sealed USB Connectors were developed to support the increasingly wide-spread use of the USB standard industrial applications. The Circular Sealed USB connector provides the popular High Speed USB standard for outdoor factory-floor and harsh environment applications where regular USB connectors do not offer the required level of ruggedness.

USB3F TV SERIES USB-A 3.0 INDUSTRIAL CONNECTORS

NEW

Amphenol Pcd

USB3FTV7AN | USB3FTV6A10G0PEN | USB3FTV2SA03NACR0S

- Sealed against fluids and dusts (IP68)
- Shock, vibration and traction resistant
- No cabling operation in field and no tools required
- Improved EMI protection
- Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device - Shell size 15
- 2 mechanical coding / polarization possibilities (receptacle insert rotation)
- USB3F TV plug retention in the receptacle: 100 N in the axis
- Mating cycles: 500 minimum

With USB Field, you can insert a standard USB 3.0 cordset into a metallic plug which will protect it from shocks, dust and fluids. No hazardous on-field cabling and grounding! Also available a version including plug + cordset: see next page. This metallic plug is connected into a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device for high vibrations.

RJ FIELD (MIL-C-26482) RUGGED HARSH ENVIRONMENT CONNECTORS

RoHS Compliant Available

Amphenol Pcd

- Accommodates a standard RJ45 cordset
- No hazardous in-field cabling
- Toolless assembly
- IP68 sealed against fluids and dusts when capped or mated
- Shock, vibration and traction resistant
- Mechanical coding/polarization (4 positions)
- Shell size 18

RJ Field bayonet connectors utilize the MIL-C-26482 quick ¼ turn bayonet coupling mechanism, providing both audible and visual coupling. The RJStop® system enables the use of RJ45 Ethernet Class D / Cat.5E connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments. Fire retardant and low smoke per UL94 V0 and NF F 16 101 & 16 102. Mating cycles: 500 minimum. Temperature range: -40°C to +85°C. *Order caps and accessories separately.*

RJ FIELD TV (MIL-DTL-38999 SERIES III) CONNECTORS FOR HARSH ENVIRONMENTS

RoHS Compliant Available

Amphenol Pcd

RJF TV Series — Square Flange Receptacles — Jam Nut Receptacles

- Accommodates a standard RJ45 cordset
- No hazardous in-field cabling
- Toolless assembly
- IP68 sealed against fluids and dusts when capped or mated
- Shock, vibration and traction resistant
- Mechanical coding/polarization (4 positions)
- Improved EMI protection
- Shell size 19

RJ Field TV Ethernet connectors utilize the MIL-DTL-38999 Series III threaded coupling mechanism, with anti-decoupling devise, providing both audible and visual coupling. The RJStop® system enables the use of RJ45 Ethernet Class D / Cat.5e connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments. Fire retardant and low smoke per UL94 V0 and NF F 16 101 & 16 102. Mating cycles: 500 minimum. Temperature range: -40°C to +85°C. *Order caps and accessories separately below.*

HARSH ENVIRONMENT 10Gb ETHERNET MICRO CONNECTORS

RoHS Compliant Available

Amphenol Pcd

Push-Pull or Thread Receptacles

Plugs

- Exceed 10Gb/s ethernet following IEEE 802.3an-2006: 10GBase-T
- Miniature: 15mm (0.59") max external diameter
- 4 pairs totally insulated throughout the connector allows minimum cross-talk
- Thread coupling mechanism allows 2000 mating cycles and high vibration resistance
- IP68 sealing mated and unmated receptacles

µCom series connectors are designed to address the latest trends of the industry: miniaturization and high speed, with the highest resistance for use in the harshest environments. Environmental testing is based on MIL-DTL-38999 series III military specifications. Machined and gold plated solder and crimp contacts are designed in accordance to the inner contact of M39029/77-429#16 M39029/76-425#16 38999 contact. Solder contact: 24AWG max. Crimp contact: 26AWG to 24AWG. Dielectric withstanding voltage: 1500Vrms. Temperature range: -55°C to +125°C.

MRJ HARSH ENVIRONMENT MODULAR JACKS

RoHS Compliant Available

Amphenol Commercial Products

- Cat 5 ethernet performance
- IP67 sealed in mated and unmated conditions
- Meets military shock and vibration levels
- Includes a feature that will not allow an RJ11 to enter
- Will not allow an improperly terminated plug to enter

Unique and innovative RJ connector design provides the ideal solution for network data transfer in harsh and demanding environmental conditions. Metal die cast outer shell. Current rating: 1.5A. Contact tail length: 0.100".

ETHERNET BUCCANEER® CIRCULAR CONNECTORS

RoHS Compliant Available

bulgin a brand of Elektron Technology

Fig. 1 Fig. 2 Fig. 3

- Dustproof and Waterproof to IP68
- Cat 5E Coupler Maintains Shielding
- Optimized IP68 Sealing Secures and Seals Cable Without Disrupting Signal
- Shroud for RJ45 Provides a Positive Guide For Alignment and Protects Against Damage During Handling
- Cat 5E Compliant With Data Rates Up to 100Mbps

Waterproof Buccaneer® industrial circular connector system offers a secure connection for Ethernet based networks, running up to 100Mbps, using the industry standard RJ45 connector as the base connection. Feature shielded connectors and couplers with S-FTP stranded cable that provides a high level of noise immunity. Patch cords have been independently tested to TIA/EIA Cat 5E levels. Patch Cord Specifications: TIA/EIA rating: Cat 5e, Sheath: PUR Jacket Black, Diameter: 6.1mm, Characteristic Impedance: 100Ω ±15Ω @ 100MHz, Capacitance: 1600pF/km, Operating Temperature: -25°C to +85°C. Wiring configuration 568-B. Mates with panel mounting connector PX0833.

6000 SERIES BUCCANEER® ETHERNET CONNECTORS

RoHS Compliant Available

bulgin a brand of Elektron Technology

PXM6037

PXM6034/B

PXM6033TP

- Push-pull latching system
- 30° twist locking
- Sealed to IP66, IP68 and IP69K rated when mated
- Cat 5e coupler maintains shielding
- Cat 5e compliant with data rates up to 100MHz
- Rewireable flex connector provides ability to field terminate
- Sealed through panel Ethernet prevents water ingress into equipment

PATCH CORD FLEX CONNECTORS

Mate with **mfg. part no. PXP6033TP** type panel mounting connectors. Overmolded patchcords with IP rated connector. Supplied with shielded RJ45 plug. Single end terminated. S-FTP cable construction. PUR jacket cable. Wiring configuration to 568-B. Exceeds EIA/TIA 5e.

Mfg. Part No.	Length (m)	Stock No.	Price Each 1-9	10-24	25-49

ETHERCON® RJ45 DATA CONNECTORS

RoHS Compliant Available

NEUTRIK

NE8FDV-Y110

NE8MC

NE8FBH-S

NE8FBH-LED

NE8FDY-C6

Rugged RJ45 Ethernet data connectors are designed to prevent breakage of the fragile latch and cover of standard RJ45 connectors. Pinouts provide additional terminal to PC board for better shielding. Diecast shell and chuck-type strain relief on cable end accepts all common RJ45 plugs (not included). Female chassis connectors are based on current NEUTRIK® "A and B" series and "D" series XLR receptacles with secure latching system. CAT 5e version complies with Class D (NE8FAH) or CAT 5E (IDC terminated receptacles) according to TIA/EIA 568B and ISO/EC 11801 standards. Compatible

CONTINUED

ETHERCON® RJ45 DATA CONNECTORS (CONT.)

with 10Base-T and 100Base-TX systems. CAT 6 version compatible with 1000 base-T systems. "D" series panel mount with metal housing and secure latching system. CAT 6 features tool-free termination. Color-coded rings (for receptacles) and boots (for cable carriers) available; *go online or call*.

RJ45 Plug

RJ45 Jack

- RJ45 plug-in connector for Gigabit Ethernet
- High cable sheathing diameter range up to 12 mm for some variants
- Suitable for connecting solid & stranded conductors 27-22 AWG
- Modules and couplers have a robust diecast zinc housing (Cat.6)
- Design results in enhanced vibration and shock resistance
- Dirt-resistant housing design with enhanced resistance to oils, greases, acids and alkalis

RJ45 Coupler

STEADYTEC is the future of connection technology in the field of data and signal transmissions. Established by the leading names in this branch of industry, the technology brand STEADYTEC forms the foundation for reliable, application-centric and conforming solutions for offices and harsh industrial conditions. All of the connectors are designed for ease of use and for quick on-site assembly. The gigabit connector for industrial standards with IDC connection technology has been developed to make wiring quick, easy and safe, without the need for any tools. In addition, zinc die-casting makes the connector extra robust and therefore suitable for industrial applications. It is also fitted with a protected locking clip for tough industrial applications.

OMRON. ELECTRONIC COMPONENTS

Field Assembly RJ45 Plug | Double Ended RJ-45-RJ45 Cordset | Double Ended M12-RJ45 Cordset

- Rated current: 2.5 A
- Rated voltage: 30 V
- Contact resistance: 20 mΩ max.
- Insulation resistance: 500 MΩ min.
- Withstand voltage 1,000 VAC for 60 sec
- Ambient operating temperature: -25°C to 70°C
- Ambient storage temperature: -25°C to 70°C
- Degree of protection: M12: IEC IP67, RJ45: IEC IP20
- Tough RJ45 connectors for use outside of panels
- Environment-resistance M12 connectors with IP67 protection
- M12 Smartclick mates with any threaded M12 socket
- Provides 'twist and click' connection with XS5P-T panel socket.
- M12 Smartclick connectors are shielded to protect against EMI.
- Separate RJ45 field assembly connectors for easy wiring on site.

Allow the use of low-cost telco (telephone) wire between computer and peripherals. Available in either DB-9, DB-15, or DB-25 connectors on one end and 4-, 6-, or 8-contact telco connectors on the other end. Provide both economy of installation and fast and simple changing of cables when moving equipment. Telco cables and connectors available separately; *go online or call.*

MODULAR ADAPTER KITS (CONT.)

- Adapt modular plugs to D-Sub ports for custom wiring applications
- Molded Dark Gray Plastic for professional looking results
- 50u Gold plated contacts for durability and longevity
- UL94V-0 Rated Plastic for standards compliance

Molded modular to D-Sub adapters gives you an easy way to adapt connection styles. Designed with RJ style jacks and D-Sub connectors, this series offers UL94V-0 protection in a sleek dark gray case with molded knurled thumbscrews.

17RR SERIES REAR-RELEASE CRIMP D-SUB CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

357-574

Shrouded contact and crimp protect against shorting or arcing. Meet EIA standard RS232C-RS449. 2-piece, black thermoplastic insulator, rated UL 94V-0. Voltage rating: 500VAC @ 5 amps. Wire types: 20 to 28 AWG. Temperature range: –55°C to +105°C. Shell plating: tin over nickel. Plugs feature grounding indents on front shell. Polarization by "D" shape. *Order stamped and formed contacts and termination tools separately below.*

617 SERIES PC BOARD MOUNT RIGHT-ANGLE D-SUB CONNECTORS WITH FRONT METAL SHELL

Amphenol Commercial Products

RoHS Compliant Available

With Ground Strap

With Boardlock

Front tin-plated steel shell helps reduce EMI/RFI emissions. Precision formed copper alloy contacts plated with 30 μ" gold over nickel in engagement area, tin/lead over nickel in end area. **E** in **mfg. part no**. denotes RoHS compliant (contacts are tin over nickel in end area). Current rating: 5 A. Voltage rating: 100 VAC. Glass-filled thermoplastic dielectric, rated UL 94V-0. Plugs feature grounding indents. Front mounting holes are #4-40 threaded. **617-A series** D-Subs have 0.120" (3.05 mm) diameter mounting hole with wrap-around ground strap and 0.318" (8.08 mm) footprint. **617-C series** D-Subs have split arrowhead boardlock and 0.318" (8.08 mm) footprint.

MIL-C-24308 METAL SHELL D-SUBS WITH CRIMP AND POKE TERMINALS

CINCH

Intermateable with all D-subs of comparable pin count and complying dimensionally with MIL-C-24308. Brass plug contacts or phosphor-bronze socket contacts; both machined and feature 50µ″ gold over copper plating. Cadmium-plated steel shell with yellow chromate coating. Diallyl phthalate insulator material, per MIL-M-14, Type SDG-F, monoblock construction for improved electrical performance. Discrete cable-to-board; -to-panel; -to-discrete cable. UL recognized.

D-SUB CONNECTOR CRIMP TOOL KIT

DURATOOL

Mfg. part no. 8455-0662 D-Sub kit includes a crimp tool frame and pre-packaged D-subminiature contacts. Ergonomic tool design features a full-cycle mechanism which allows crimps to conform to industry standards. Easy-load positioner provides proper contact orientation. Kit includes crimp tool with positioner, 100 D-subminiature pins, 100 D-subminiature sockets and a foam insert in a durable plastic storage case.

Mfg. Part No.	Stock No.	Price Each 1-4
8455-0662	16N1881	444.28

(8842)

CRIMP TOOL FOR STANDARD D-SUB CONTACTS

DURATOOL

3-STEP CRIMP
1. Insert contact into locator. 2. Close tool carefully until connector is held in place without distorting ears. Insert stripped wire. Squeeze handles. 3. Raise locator and remove contact.

All crimp configurations are fully machined to maintain tolerances to industry standards. Straight-line jaw closure provides consistent crimp. Wide cushion grips provide user-friendly feel. Locator and wire-stop properly orient contacts. Crimps conductor and insulator portions of contacts in one closure. Heat treated for extended use. For open-barrel contacts in 30-20 AWG wire sizes. Rated at 5000 cycles.

OPEN-BARREL CRIMP TOOLS

DURATOOL

Crimp tools have full cycle ratcheting action for precise termination of open-barrel contacts. **Mfg. part no. 1748** has two crimping nests for AMP® D-Sub sizes 28-24 and 24-20 AWG. **Mfg. part no. 1749** has 3 crimping nests for AMP® Multimate contacts 24-20, 18-16, and 28-24 AWG. A contact support and wire stop are provided. Locator and wire stop are provided. Both tools crimp wire and insulation in a single action.

Mfg. Part No.	Description	For Contacts	AWG	Stock No.	Price Each 1-4

(18632)

HIGH-DENSITY D-SUB CONNECTOR CRIMP TOOL

DURATOOL

Crimps high-density D-subminiature pin and socket open-barrel contacts. Locator and wire-stop provide proper orientation during crimping. Conductor crimps are B-type. Insulation crimps are oval type, produced in two cavities: A is 22-26 AWG, B is 28-30 AWG. Other crimp tools available; *go online or call.*

17S SERIES D-SUB CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

Economical rack and panel D-sub connectors feature fixed precision formed, gold over nickel plated copper alloy contacts for commercial use. Solder cup termination. Same specifications as **17D series** D-Subs, *ordered separately on this page.*

D SUBMINIATURE CRIMP CONNECTORS WITH STAINLESS STEEL SHELLS

RoHS Compliant Available

ITT

- Maximum current/contact: 40 Amp
- High Strength
- Intermatable to standard D Sub connectors
- Endurance: Continuous exposure to salt spray and corrosive chemicals

ITT identified a solution equipping the D Sub line connectors with stainless steel shells and hardware. The resulting product meets stringent requirements for corrosion resistance using MIL-Spec grade "P" grade stainless steel, while meeting JDEC standards for RoHS compliance.

ITT Cannon military, high reliability d-subminiature connectors with fixed solder contacts are qualified to MIL-C-24308. The solder cups accomodate wire sizes up to 20AWG maximum. 5A standard current rating. Shell material is steel with yellow chromate over zinc finish. Copper alloy contacts with gold over nickel plating in mating area, tin on balance (gold over nickel on balance for military version).

CANNON MIL-C-83513 STYLE MICROMINIATURE D CONNECTORS

RoHS Compliant Available

ITT

MDM-9PH0038

MDM-37SSB

- Yellow Chromate Over Cadmium Plating
- Liquid Crystal Polymer Insert

Panel Cut-Out

Microminiature D connectors are designed into places where standard D-subs had typically been used. These Micro-D Metal (MDM) connectors are made of a strong, lightweight aluminum shell with a high-quality liquid crystal polymer insert. Feature a unique twist-pin design that takes 7 light-gauge beryllium copper wires over 3 soft-drawn copper wires welded together to form a small, flexible bird cage. Twist pins are recessed in the insulator to protect the contacts from damage and appear to be slightly off-center. When mating to the socket contact this Posaline design will self-center, elongate, and twist inside the socket contact, providing excellent wiping action and maintaining maximum continuity even under the severest shock and vibration. Contacts are protected against moisture when mated by a silicone

VERTICAL PC BOARD CONNECTORS

MDM -PCB connectors are designed for use with flex circuitry, flat cable and PC or multilayer boards. They use the standard MDM metal shell and provide high density & high reliability in board-to-board, board-to-cable, and cable-to-cable applications. Terminations may be Board Straight (BS) or Condensed Board Right-Angle (CBR). Jackpost mounting for use with locking hardware.Feature 0.050″ center spacing and 0.109″ (+/- 0.015″) PC tail lengths.

MIL-DTL-83513 STYLE HIGH RELIABILITY MICROMINIATURE D CONNECTORS

CINCH

Features:
- Several styles of mounting hardware are available
- High-performance Dura-Con twist-pin contact
- Aluminum shell provides extra strength and EMI/RFI shielding capability
- Silicone elastomer compression interfacial seal protects contacts from each other and the metal shell
- Rugged twist pin contacts resistant to shock and vibration
- Ideal for harsh environment such as airborne or space applications

Specifications:
- Insulator material: UL94V-0 rated glass-filled polyester
- Shell material: Aluminum alloy
- Shell plating: Yellow chromate over cadmium
- Operating temperature: -55°C to 135°C
- Current rating: 3A
- Withstanding voltage: 600VAC
- **Suffix B** = No hardware, **F** = Float mount, **K** = Jackscrew, **L** = Low profile jackscrew, **P** = Jackpost

WATERPROOF D-SUBMINIATURE CONNECTORS

RoHS Compliant Available

L-COM Global Connectivity

Panel Mount Plug w/Cover

Cable Mount Receptacle w/Backshell

- Waterproof D-Sub connectors w/backshell kits & panel mount solder connectors with and w/o covers
- IP67 rating provides protection under harsh conditions
- Backshells conform to a variety of cable diameters by adjusting the sealing nut
- Panel mount connectors mount on any panel or enclosure 0.078″ thick or smaller
- Gold plated contacts provide reliable connections with repeated mating cycles
- Color: Black

Panel Mount Receptacle w/Cover

WATERPROOF D-SUBMINIATURE CONNECTOR AND BACKSHELL KIT

This waterproof kit includes solder cup connector, ABS housing, nylon seals, nickel plated brass thumbscrews and rubber sealing gaskets to assure IPC67 compliance. This connector will accommodate wire ranges from 30-20 AWG.

Mfg. Part No.	Gender	Pos.	Density	Stock No.	Price 1-9

WATERPROOF PANEL MOUNT D-SUBMINIATURE CONNECTOR KIT WITH COVER

Harsh outdoor or indoor environments can destroy electronic equipment. Standard HD15 connectors are not intended to withstand contaminants such as water and dust. These waterproof kits include solder cup connectors and are available in male or female genders. The connectors will accommodate wire ranges from 30 - 20 AWG. Backshell construction features ABS housings, nylon seals, nickel plated brass thumbscrews, and rubber sealing gaskets to insure IEC IP67 rating.

WATERPROOF PANEL MOUNT D-SUBMINIATURE CONNECTORS

Harsh outdoor or indoor environments can destroy electronic equipment. Standard D-sub connectors are not intended to withstand contaminants such as water and dust. These waterproof solder cup connectors will accommodate wire ranges from 30-20 AWG. Construction features gold plated brass contacts, nickel plated steel shells, and a silicone insulating ring. Maximum recommended panel thickness is 0.078″.

Mfg. Part No.	Gender	Pos.	Density	Stock No.	Price 1-9

D-SUB – DISCRETE WIRE CONNECTORS • D-SUB – FLAT RIBBON CABLE CONNECTORS

SEALED D-SUBMINATURE (IP-67) CONNECTORS

Switchcraft® Harsh Environment Connectivity Solutions A HEICO Company

Specifications

- Current Rating: Standard D-Sub: 5 A; High Density D-Sub: 2 A
- Dielectric withstanding voltage: 1000V AC for 1 minute
- Contact resistance: ≤ 25mΩ
- Insulation resistance: ≥ 500MΩ @ 500 VDC
- Life: ≥ 500 Cycles
- Operating Temperature: -55°C to +85°C

Cable Mount

Panel Mount

Features

- Waterproof D-Sub panel connectors and backshell kits meet IP67 rating.
- Rear mounting panel connectors fit into standard D-Sub holes.
- Gold plated contacts are standard.
- Backshell kits available for cable diameters 0.138 - 0.276 in (3.51- 7.01 mm).
- D-Sub solder cup contacts accepts wire ranges from 22-26 AWG.
- Panel mount connector comes with 2 mounting screws

841-17D AND G17K SERIES FLAT CABLE IDC CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

For modern peripheral equipment. Mass terminates to 0.050″ (1.27) flat ribbon cable. Available plastic or metal flange. 1-pc. universal hood. Black glass-filled polycarbonate insulator, rated UL94V-0. Phosphor bronze contacts with gold over nickel plating. Current rating: 1A. Voltage rating: 25VAC (VDE 0100 group A). Operating temperature: –25°C to +105°C. Wire size: solid 26/ stranded 28 AWG. Compatible with MIL-C-24308 and IEC proposal 48B (CO) 118. RS-232 and RS-449 standard. UL recognized E64911.

PLASTIC IDC CONNECTORS

Special contact design allows usage of standard 0.050″ flat ribbon cable while maintaining standard contact centers of 0.050″. Low-profile, fully intermateable connectors are suitable for compact requirements of modern peripheral equipment. Contacts: copper alloy, gold plated over nickel. 1-piece universal hood provides 3 locking varieties: plastic latch for one-hand operation and quick disconnect; screw locking; and metal spring latch locking. Insulation resistance: 1000MΩ at 500 VDC. Contact resistance: 15 mΩ max.. Wire size: 26-28 AWG. Hood accepts straight and right-angle cable entry. Operating temperature range: –55°C to +105°C.

METAL IDC CONNECTORS

D-subminiature pin and socket connectors allow highly reliable mass termination of standard 0.050″ pitch round-conductor flat ribbon cable. Gas-tight junction with each conductor at 4 places. Internal transition from standard 0.055″ contact spacing which allows termination of standard 0.050″ ribbon cable; no special cable preparation is required. Contact plating: gold plated-brass. Mating area has duplex plating. Insulator material: blue, glass-filled polyester, rated UL94V-0. 26-28 AWG.. Current rating: 1A per contact. Insulation resistance: 1000MΩ at 500VDC. Contact resistance: 15mΩ max. @ 1ADC. Operating temperature: –55°C to +105°C.

FCE17 SERIES FILTERED D-SUB CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

Solder Cup

Right-Angle

- Discrete filter (capacitor) provides EMI noise protection and brings assembly into FCC compliance, Docket 20780
- Designed to provide EIA RS-232 and RS-449 compatibility
- Pin and socket styles with solder cup or right-angle PCB termination
- Tin plated high-strength diecast shell with thermoplastic insert, rated UL94V-0
- Phosphor bronze contacts plated with 15μ″ gold on contact area over 100μ″ nickel

- Contact plating: Performance level 3, as per IEC 60 807-2, IEC 60 512-25-2
- Shell: Tin plated steel
- Mating conditions as per CECC 75 301
- Solder buckets accept 20 AWG
- Vertical & right angle solder pins for P.C.B. holes 1 ± 0.05 mm
- Temperature range: -55°C to +105°C
- Contact resistance: ≤ 15 mΩ
- Insulation resistance: ≥ 1000 MΩ
- Working voltage: 250 VAC max.
- Dielectric withstanding voltage: 500 V AC for 1 minute
- Working current: 7.5 A max.

17TW SERIES D-SUB HYBRID CABLE CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

Housing Arrangements

Combination (hybrid) D-subminiature metal shell cable connectors feature installed, non-removable screw-machine solder cup signal contacts combined with power and coaxial contacts, *order separately on this page*. Tin-plated steel shell. Gold over nickel-plated bronze female signal contacts or brass male signal contacts are fixed in the high-temperature, black thermoplastic insulator. Panel mount 0.122″ diameter holes. Current rating: 7.5 amps with 10 amp peaks. Voltage rating: 300Vrms at 50Hz. Dielectric withstanding voltage: 1000Vrms at 50Hz. Insulation resistance: 5000 megohms at 500VDC. Operating temperature: –55°C to +155°C with peaks up to 180°C. Flame retardant to UL94V-0. Choice of 3 shell sizes and 7 housing arrangements. UL listed, CSA certified.

17TW SERIES COAX AND HIGH-POWER REMOVABLE CONTACTS FOR D-SUB CABLE CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

17TW series coax and high-power contacts (size 8) for use in combination (hybrid) D-subminiature cable connectors, *order separately on this page*. Machined copper alloy female contacts, machined brass male contacts. Both feature gold over nickel plating. Straight coax contacts available crimp or solder. Impedance: 50 ohms. Current rating: 0.5A. Voltage rating: 150Vrms at 50Hz. Frequency range: 0-1GHz. High-power contacts are solder type. Current rating: 10 to 40A. Voltage rating: 300Vrms at 50Hz.

HARTING®

Plug with Solder Bucket Signal Contacts

Receptacle with Solder Bucket Signal Contacts

HARTING's mixed D-Sub range brings the advantage of an industry standard I/O interconnect product with the possibility to customize for any application. The range is designed around the standard D-Sub shell sizes with the possibility to have a blend of contacts such as signals with coaxial, power, high voltage or pneumatic contacts. Due to its construction, the product is fully shielded and helps reducing the EMI/RFI leakage. All contacts are machined with two different platings. When hot plug-in is required, first mate last break contacts can also be supplied. For connectors to be fitted on a board with SMT components, they can be supplied in an SMC (PiHIR) version which is assembled in the reflow solder process, thus reducing assembly cost.

COOLPOWER® LCC17 SERIES D-SUB CONNECTORS

RoHS Compliant Available

Amphenol Commercial Products

Features

- Fully interchangeable with standard D-sub sizes
- High current CoolBand power contacts for maximum performance
- 3W3 contact arrangements, male and female
- PCB solder tail, solder cup, crimp terminations
- CoolPower® D-sub male and female connectors must be used together.

Specifications

- Housing: High temperature resistant nylon, UL 94V-0, black
- Power contacts: Gold plated copper alloy
- Hardware: Nickel Plated Steel or Brass
- Current rating: Power 55A
- Contact Resistance: Power 0.25 mW max;
- Insulation Resistance: 5000 MW max
- Dielectric Withstanding Voltage: 1500 VDC
- Operating Temperature: -40°C to 105°C
- Durability: 250 mating cycles

CoolPower® connectors are intended for medium and high current applications where cost and space are as critical as performance. CoolPower® D-sub connectors offer the familiar shape and functionality of a combination D-subminature connector with high current, high performance Amphenol CoolBand contact technology. The LCC17 series is intended for use in higher amperage power supply and distribution applications where the current handling capabilities of typical combo D-sub connectors is insufficient.

D-SUB METAL JUNCTION SHELLS FOR EMI/ESD PROTECTION

RoHS Compliant Available

3M

- Provide EMI/ESD Protection
- Grounding Available For Discrete Wire
- Easy Assembly
- Steel Shell With Nickel Plating
- Includes 2 Jack Screws
- Straight Cable Exit

Accommodates 3M **mfg. part nos. 898XX, 899XX, 82XX** and **83XX** D-Sub connectors; *ordered separately on page 866.* Designed for use with 3M **mfg. part nos. 3659** and **3750** round-jacketed flat cable, *order separately on page 1220.*

AMPLIMITE HDP-20 AND HDE-20 SERIES QUIK-SNAP BACKSHELL KIT

RoHS Compliant Available

TE connectivity

Authorized Distributor

- All-Plastic Cable Clamp Kit for HDP-20 and HDE-20 Series D-Sub Connectors
- Ideal for Jacketed Cable
- Quick Assembly
- No Special Tools Required

Each kit has cable exit option of 180° or 120°, and includes 1 hinged clamp, 1 cable exit gate plug (used to close unused cable exit), 2 zinc-plated carbon steel screws, 1 stainless steel relief clip and 2 stainless steel retainer clips for metal-shell connector applications.

SHIELDED PLASTIC BACKSHELLS FOR D SUB CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Shell material: ABS, Ni plated
- Shell flammability: UL 94V-0
- Jackscrews: 4-40 UNC threaded
- Cable diameter range: 4.0 - 13.0 mm
- Temperature rating: -40°C to +110°C
- Shielding attenuation: >40bB (30MHz - 1GHz)

Straight Entry — 45° Entry

Metallised plastic backshells, for applications requiring an economic, lightweight and durable shell with shielding performance. Supplied complete with jackscrews, these compact shells include a range of cable grommets to suit cable diameters from 4.0 to 13.0mm. Backshells are available in either straight or 45 degree cable entry to suit 9 to 37 way standard density D-Subminiature connectors

CANNON SNAP-TOGETHER SHIELDED BACKSHELLS

RoHS Compliant Available

ITT

Each kit consists of 1 front shell, 1 rear shell, 1 cable clamp and 2 screws. For commercial applications. Material: thermoplastic, UL94V-0 rated. Temperature range: -20°C to +80°C. Snap-together design for quick assembly. Made of ABS polymer with nickel over copper finish. Attenuation: –44dB at 1000MHz. Requires two **mfg. part no. 250-8501-013** thumbscrews; *order separately below.*

DELUXE AND ECONOMY D-SUB CONNECTOR COVERS (CONT.)

Fig. 11

1-pc. plastic covers fit all standard EIA cable and D-Sub connectors from most manufacturers. Half-moon insert system grips and prevents slippage or twisting of cable. Black polypropylene cover and insert. 1-pc. dual exit plastic cover features slotted thumbscrews and hinged snap-locking design in 25 positions. Black nylon 6/6 cover, UL94V-2 rated, with black zinc-finished steel screw machined thumbscrews. 2-pc. plastic covers feature split-jacket insert system that accepts most cable sizes. Gray or black styrene plastic cover, rated UL94V-0, with zinc-finished steel hardware. Metallized-plastic covers feature nickel-over-copper plating, UL94-HB rated, and PVC insert, UL94V-0 rated. Feature compression insert system that performs effectively with foil or braid shields. Metal covers feature compression insert system that produces a strong mechanical connection with most cable sizes. Straight or right-angle cable exit design. Accommodate standard D-Sub connectors from most manufacturers.

AMPSEAL 16 CONNECTOR SYSTEM

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Keyed / polarized, prevents mismating
- Lanceless contacts, no damaged tangs or tangled contacts
- Integral CPA, protects against accidental unlocking
- Sleeved assembly for contact beam protection provides 50 durability cycles
- Attachment feature on pin housing provides connector clip mounting
- Integral TPA provides terminal position assurance with no additional assembly
- Sealing of interface and wires provides for environmental integrity

The AMPSEAL 16 Connector System is targeted for off-road and heavy duty industrial applications. This wire-to-wire and wire-to-device connector line was designed to meet the rigorous demands of an industry that requires the highest standards in performance. This connector family features the HDSF Size 16 Pin and Socket contacts as a terminal system. These contacts are stamped and formed versions of the screw machined MIL-C-39029 contacts. The 2-, 3-, 4-, 6-, 8- and 12-position housings will offer a one-piece assembly for both plug and cap.

AMP 0.140″ MATE-N-LOK (LARGE INSULATION) CONNECTORS, 0.240″ (6.10) CENTERLINE

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Contacts are on 0.240″ (6.09) centerline spacing
- Polarized, Natural color nylon housings
- Contacts fully protected in housings
- Low insertion/extraction forces
- Dual locking lances provide optimum contact stability
- Extraction tool removes both pins and sockets
- Wire range from 20 to 10 AWG
- Accepts insulation diameters 0.100 (2.54) to 0.180 (4.57)
- Dielectric withstand voltage: 3.0 KVAC between adjacent circuits
- Insulation resistance: 1000 Mohms min. initial between adjacent circuits
- Voltage rating: 600 V AC or DC
- Connector mating: 4.5 lb. max. per circuit
- Connector unmating: 0.8 lb. min. per circuit
- Contact retention : 30 lb. min.
- Durability: 25 cycles, mating and unmating
- Operating temperature: -55°C to +85°C

AMP UNIVERSAL MATE-N-LOK® II SOFT-SHELL CONNECTOR HOUSING KITS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Contact Diameter: 0.084″ (2.13mm)
- Centerline, Matrix: 0.250″ (6.35mm)
- Free Hanging Mount
- Packaging Method: Front and Rear Component
- White Nylon Housing, Flammability Rated UL94V-0
- Positive Lock
- Current Rating: 31A
- Voltage: 600VAC

Kits consist of front and rear caps or plugs. Mate with standard Universal MATE-N-LOK® housings and PC board headers and use standard panel cutouts and strain reliefs. Contacts, *ordered separately on pages 883-884*, are on 0.250″ (6.35) centerline spacing. Pins and sockets can be intermixed in the same housing. Housing design provides for complete contact insertion and features 3-point stabilization to control contact alignment and minimize stubbing. UL recognized, CSA certified, VDE approved. *Order application tools separately on page 884.*

Authorized Distributor

- Free hanging
- Voltage rating: 600VAC
- Rated UL 94V-2
- Max current rating: 20A
- Positive polarization helps prevent incorrect mating
- Circular design allows the connector to pass through ⅞ in. knock-out holes
- Uses standard universal Mate-N-Lok contacts and application tooling see *on this page*

AMP COMMERCIAL MATE-N-LOK® SOFT-SHELL CONNECTORS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Fully Polarized Nylon Housings, Rated UL94V-2
- Available in Panel Mount, Free-Hanging, and Motor Mount Versions
- UL Recognized, CSA Certified

Precision molded, soft-shell construction offers easy cavity identification. Built-in locking device, contact stabilization, and self-aligning features. *Order pin and socket contacts separately below and application tools separately on page 891.*

Authorized Distributor

- Polarized, Natural Color Nylon Housings, Rated UL94V-2
- Compatible with Other Soft Shell Connectors
- Accepts Wires with Insulation Diameters up to 0.110″ (2.79)
- Wire Range from 30 to 18 AWG
- 0.062″ (1.57) Pin Diameter
- 0.145″ (3.68) Centerline Spacing
- Voltage Rating: 250VAC
- Dielectric Withstanding Voltage: 1.0kVAC
- Durability: 10 Mating Cycles
- Insulation Resistance: 1000 Megohms Minimum Initial

Economical, commercial-grade receptacle and plug connector housings available in 1 circuit, 2 thru 4 in-line circuit, and 4 thru 9 matrix circuit sizes for free-hanging wire-to-wire connection. Feature cavity identification, low contact-mating force, dual-locking lances and detent and positive locking. Pre-tin plated brass contacts, *order separately below,* can be used in either plug or receptacle. UL recognized, CSA certified. *Order application tools separately below.*

TE connectivity

Authorized Distributor

- 3mm (0.118″) centerline spacing
- Voltage rating: 250VAC
- Current rating: 5A
- Operating temperature: -40°C to 105°C

The Micro MATE-N-LOK 3mm Connector System is a wire-to-wire and wire-to-board connector system with contacts on a 3 mm [.118] centerline. Single- row and dual-row configurations are available.
Crimp, snap-in pin and receptacle contacts are used to terminate 24-20 [0.2-0.6] and 30-26 [0.05- 0.15] AWG wire. Plug and receptacle housings allow wire-to-wire and wire-to-panel configurations. Header assemblies for wire-to-board interconnections include vertical and right-angle components. Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476.

3.96mm (0.156″) PITCH POWER DOUBLE LOCK (PDL) CONNECTOR SYSTEM

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Fully polarized
- Power circuit connectors of compact design
- Uses double lock plate on the wire side to prevent/resist halfway mating of contacts
- Double lock plate compatible with high-count positions of more than 3 rows
- Tab and receptacle contacts resist scraping of contacts at mating/unmating
- Semi-inner locking system that helps prevent/resist disengagement by external pressure
- Both wire-to-wire and wire-to-board applications available from the same series lineup
- Board-mounted headers are compatible with resin coating
- Design complies with a range of safety standards
- The housing lance design helps prevent/resist entanglement of contacts with one another
- Voltage Rating: 300V AC for wire-to-wire applications, 50V AC for wire-to-board applications
- Current Rating: 10A max. using 16 AWG on 2-position connector
- Operating Temperature: -30°C to +105°C

AMP Power Double Lock Connectors are compact enough for use in power circuit application and are ideally suited for wiring in refrigerators, air conditioners, washing machines, gas equipment, copying machines and automatic vending machines. These connectors can be used with or without a double lock plate which helps prevent/resist halfway mating of contacts. Contacts accept 20-16 AWG wire with insulation outer diameter of 2.0-3.1mm. The tab header for board mounting has a locking mechanism and is compatible with resin coating which will not hinder the plug locking function. The solder tail section of the tab contact has kink features while the solder tab secures the header on the board firmly during soldering. Other color options are available for select sizes; *go online or call.*

Authorized Distributor

Plug Housing | Free-Hanging Receptacle Housing | Panel-Mount Receptacle Housing | TPA Locking Plate

Features

- Audible 'lock' latch provides positive feedback when plug and receptacle are mated
- Ribs surrounding audible 'lock' latch prevent wires from becoming snagged underneath
- Optional Terminal Position Assurance (TPA) locking plate keeps contacts fully seated within housing and provides against contact backout
- Keying/color code prevents mis-mating on the assembly line — Key A Natural
- For wire-to-wire and wire-to-panel applications in choice of:
  Single row: 1x2, 1x3, 1x4 and 1x5
  Dual row: 2x3 and 2x4
  Matrix: 3x3, 3x4 and 3x5

Pin | Socket

- Centerline spacing: 6 mm
- Row-to-row spacing: 8.1 mm
- Voltage rating: 600V AC/DC
- Current rating: up to 20A per line
- Operating temperature: -55°C to 105°C
- UL recognized E28476

Power Triple Lock (PTL) connector system improves connection stability and reliability. Features a reduced size high-performance functional design that includes free-hanging and panel mount receptacles. Plug housings feature an anti-snag locking latch to prevent wires from becoming tangled under the latch. In addition to household appliances, such as refrigerators, dishwashers, washers and dryers, cookware, water heaters, vacuums, garage door openers, the PTL connector system is ideal for products related to heating, ventilation and air conditioning, industrial machinery and lighting, automotive, commercial building, and rail. Other connector sizes, keying/color options and **mfg. part no. 1971789-1** CPA (Connection Position Assurance) lock device are available; *go online or call.*

MIL-C-26500 48 SERIES WIRE SPLICE CONNECTORS

RoHS Compliant Available

Amphenol Aerospace

- Push-mating/twist-pull unmating
- Uses size 16 standard M39029/31-229 pin and M39029/32-248 socket contacts
- Environmental sealing grommet
- Metal collet retention
- Weight- and space-saving design
- Color coded connector halves — blue or red

Amphenol® **48 series** wire splice connector is an economically priced, lightweight and space-saving connector design that can be used for various applications. The push-mating/twist-pull unmating feature provides a simple solution to many design requirements without sacrificing performance. The metal retention clip is utilize for a single size 16 pin and socket contact; *ordered separately below.*

AT LED SERIES CONNECTORS

NEW **Amphenol** SINESYSTEMS

Features
- Field Serviceable
- Cost-effective
- Quick diagnosis reduces troubleshooting time
- Environmentally-sealed for harsh environments
- Plug and Play - assembled the same as a standard connector

AT Series™ connectors with LED are a high-performance, cost-effective solution specifically designed for heavy duty applications, while still maintaining the strengths of the AT Series™ product line. The connector design incorporates an integral latching system that ensures a definitive electrical and mechanical connection. Connector housings are manufactured with a thermoplastic material that is not only durable, but has excellent UV resistance, dielectric/mechanical properties and environmentally RoHS compliant. The sealing system is comprised of an internal and rear silicone, multi-sealing perimeter against environmental ingress. The LEDs are available in both 12V (grey) and 24V (black). Contacts are derived from quality copper alloy to ensure an electrically-reliable connection. AT Series™ connectors are compatible with other existing standard products industry-wide.

ATM SERIES™ CONNECTORS

NEW **Amphenol** SINESYSTEMS

Features
- Current Capacity: Size 20, 7.5A (max)
- Wire Range: Size 20 contacts will accept wire ranges of 16 thru 22AWG
- Temperature: Operating temperature range: -55°C to +125°C at rated current

ATM Series™ connectors are a high-performance, cost-effective solution specifically designed for smaller AWG applications, while still maintaining the strengths of the AT Series™ product line. The connector design incorporates an integral latching system that ensures a definitive electrical and mechanical connection. Connector housings are manufactured with a thermoplastic material that is not only durable, but has excellent UV resistance, dielectric/mechanical properties and environmentally RoHS compliant. The sealing system is comprised of an internal and rear silicone, multi-sealing perimeter against environmental ingress. Contacts are derived from quality copper alloy to ensure an electrically-reliable connection. ATM Series™ connectors are compatible with other existing standard products industry-wide.

Fig. 1 Fig. 2

- Fully Isolated Terminals to Protect Contacts from Damage
- Uses Standard Mini-Fit™ Series Terminals
- Low Profile to Accommodate Height Constraints (5557 Series)
- Wire-to-Plug for Panel Mount or Free-Hanging Applications (5559 Series)
- Positive Housing Locks to Mate with Mini-Fit, Jr.™ Receptacle (5559 Series)

Designed for high-current/high-density power and signal applications in wire-to-wire and wire-to-board configurations. Volt rating: 600. Contact resistance: 10 milliohms. Operating temperature: 40°C to +105°C. **5557 series** receptacle housings mate with **5559 series** single-row connectors, *ordered separately below*, and **5566** and **5569 series** single-row connectors ordered separately; *go online or call*. Receptacles accept Mini-Fit™ **5556 series** terminals and plugs accept Mini-Fit™ **5558 series** terminals; *both ordered separately on pages 898-899*. UL recognized, CSA certified, TUV approved.

Kinked PC Tails

Vertical SMT with Solder Tab

Vertical SMT with Solderable Retention Clip

- Dielectric Withstanding Voltage: 1500VAC
- Insulating Resistance: 1000mΩ Min.
- High-Temperature LCP Housing, Rated UL94V-0
- Current: 5A
- Voltage: 250V
- Temperature Rating: –40°C to +105°C

Surface mount or surface mount compatible, 3.0mm center shrouded locking headers are available in vertical and right-angle configurations. Kinked solder tails enhance PC board retention. Contact: brass. Plating: tin or gold. Contact resistance: 10mΩ max. Mate with **43645 series** or **43025 series** receptacles, *ordered separately on page 901.*

44242 SERIES DUAL-ROW TEST PLUGS

Test plug can be used for testing single and dual row connectors. For single row use a test plug with twice the number of circuits as the connector being tested.

0.118″ (3.00) MICRO-FIT 3.0™ RECEPTACLE HOUSINGS

RoHS Compliant Available

molex

Fig. 1

Fig. 2

Designed on a 3.0mm grid for rugged wire-to-wire applications. The positive latch secures the housing to the header. Fully isolated terminal silos reduce arcing potential. Rated UL94V-0. Integral pull tabs for ease in unmating. **43025 series** mates with **43020 series** plugs, *ordered on this page*, and **43045 series** headers, *ordered on pages 899-900 and on pages 901-902*. **43645 series** mates with **43640 series** plugs, *ordered on this page* and **43650 series** headers *on pages 899-900 and on pages 901-902*. Both series for use with **43030 series** terminals, *ordered on pages 902-903*.

0.118″ (3.00) MICRO-FIT 3.0™ RIGHT ANGLE HEADERS

RoHS Compliant Available

molex

Right Angle SMT with Solder Tab

Right Angle SMT with Solderable Retention Clip

- Dielectric Withstanding Voltage: 1500VAC
- Insulating Resistance: 1000mΩ Min.
- High-Temperature LCP Housing, Rated UL94V-0
- Current: 5A
- Voltage: 250V
- Temperature Rating: –40°C to +105°C

Surface mount or surface mount compatible, 3.0mm center shrouded locking headers are available in vertical and right-angle configurations. Kinked solder tails enhance PC board retention. Contact: brass. Plating: tin or 30μ″ gold. Contact resistance: 10mΩ max. Mate with **43645 series** or **43025 series** receptacles, *ordered separately on this page*.

43650 SERIES SINGLE ROW, RIGHT-ANGLE SURFACE MOUNT COMPATIBLE HEADERS WITH PEGS

Fully polarized to mating receptacle. UL File No: E29179. CSA File No: LR19980. TÜV License No: 43645. Voltage: 250V. Current: 5.0A max. Housing: high-temperature LCP, UL 94V-0. Mate with **43645 series** receptacles. Compatible with PC board snap-in peg locks.

CRIMP AND EXTRACTION TOOLS FOR 0.118″ MICRO-FIT 3.0™ APPLICATIONS

Mfg. Part No.	Description	Stock No.	Price Each 1-4
63819-0000	Ratcheting Crimp Tool	94M4867	310.67
11-03-0043	Extraction Tool	94B5648	17.27

(16741)

0.118″ (3.00) MICRO-FIT BMI™ CONNECTORS

RoHS Compliant Available

molex

- Housing Rated UL94V-0, 5A Current
- Voltage: 250 VAC rms or DC
- Temperature Range: -40°C to +105°C

Fig. 1

Fig. 2

Micro-Fit 3.0, BMI™ (Blind Mate Interface) features an innovative panel mounting design that securely locks the plugs and receptacles in place in the panel cutout, while allowing for removal. The plugs and headers feature a funnel entry to guide the mating receptacle or receptacle header into place. Micro-Fit 3.0, BMI housings and headers mate exclusively with the BMI components.

44133 SERIES DUAL ROW, PANEL MOUNT RECEPTACLES — FIG. 1

Receptacle floats in panel cutout up to 1.27mm (.050″) in any direction with a 1.57mm (.062″) panel thickness. Can be utilized with BMI board-to-board connectors. For use with **43030 series** terminals.

Mfg. Part No.	Circuits	Stock No.	Price Each 1-9	10-99

44133-1200	12	18M8120	1.05	0.83

44300 SERIES DUAL ROW, PANEL MOUNT PLUGS — FIG. 2

Panel thickness: 1.57mm (.062″). Can be utilized with BMI board-to-board connectors. For use with **43031 series** terminals.

44300-0400	4	18M8128	0.46	0.35
44300-1400	14	57H1196	0.90	0.75

44428 SERIES DUAL ROW, RIGHT ANGLE HEADERS WITH PEGS

Can be utilized with BMI wire-to-wire connectors. 1.57mm (.062″) PCB thickness. Surface mount compatible (SMC). Black, glass filled nylon housings
